Hegels Transcendental Induction Suny Series In Hegelian Studies:

Hegel's Transcendental Induction Peter Simpson, 1998-01-01 Hegel's Transcendental Induction challenges the orthodox account of Hegelian phenomenology as a hyper rationalism arguing that Hegel's insistence on the primacy of experience in the development of scientific knowledge amounts to a kind of empiricism or inductive epistemology While the inductive element does not exclude an emphasis on deductive demonstration as well Hegel's phenomenological description of knowledge demonstrates why knowing becomes scientific only to the extent that it recognizes its dependence on experience Simpson's argument closely parallels Hegel's own in the Phenomenology of Spirit highlighting those sections like Hegel's analysis of mastery and slavery that contribute to the argument that knowing is both vulnerable and responsive to the way in which experience resists our attempts to make sense of things Simpson's argument connects his account of Hegelian phenomenology with traditional accounts of induction and with a number of other commentators The central thesis about the inductive development of the Phenomenology is worked out with care This thesis allows the author to present fresh and often compelling re readings of such often commented on themes as the natural consciousness desire slavery morality and forgiveness Since Hegel himself does not describe his method in terms of induction this book suggests a truly interesting shift of perspective on the Phenomenology Daniel Berthold Bond Bard College

The Routledge Guidebook to Hegel's Phenomenology of Spirit Robert Stern, 2013-02-11 The Phenomenology of Spirit is arguably Hegel's most influential and important work and is considered to be essential in understanding Hegel's philosophical system and his contribution to western philosophy The Routledge Guidebook to Hegel's Phenomenology of Spirit introduces the major themes in Hegel's great book and aids the reader in

understanding this key work examining The context of Hegel s thought and the background to his writing Each separate part of the text in relation to its goals meaning and significance The reception the book has received since its publication The relevance of Hegel s ideas to modern philosophy With a helpful introductory overview of the text end of chapter summaries and further reading included throughout this text is essential reading for all students of philosophy and all those wishing to get to grips with Hegel s contribution to our intellectual world **The Philosophical Review** ,1998 *American Book Publishing Record* ,1997 **Forthcoming Books** Rose Arny,1997 **Bibliographisch repertorium van de wijsbegeerte** ,1998 *Bibliografisch Repertorium Van de Wijsbegeerte* ,1998 **Whitaker's Books in Print** ,1998 **Review of religious research** ,1987 **Hegel's Transcendental Induction** Peter Alan Simpson,1993 *Hegel's Grand Synthesis* Daniel Berthold-Bond,1989-07-03 This book offers the first genuinely systematic treatment of Hegel s eschatology in the literature It is an investigation into Hegel s project to demonstrate the ultimate unity of thought and being consciousness and reality self and world The author traces the project through Hegel s epistemology metaphysics and philosophy of history The grand synthesis creates a basic tension an ambivalence that reaches its most acute formulation in Hegel s eschatological language of a final completion or fulfillment of history This conflicts with his dialectic and Heracletian metaphysics of becoming Berthold Bond concludes that a substantially new approach to Hegel s eschatology is needed **The Philosopher's Index** ,1995 An international index to philosophical periodicals **Hegel's Phenomenology of Self-Consciousness** Leo Rauch,David Sherman,1999-05-27 Presents a new translation with commentary of chapter IV Self Consciousness of Hegel s Phenomenology of Spirit **Subject Guide to Books in Print** ,1996 **Who's Who in Science and Engineering 2008-2009** Who's Who Marquis,Marquis Who's Who,2007-12 Hegel's Transcendental Ontology Giorgi Lebanidze,2018-12-14 Hegel s Transcendental Ontology argues that Hegel presents the kernel of his metaphysics in the Doctrine of the Concept the final part of his Science of Logic The Concept has three moments universality a process through which conceptual content of empirical determinations is formed particularity a holistic system of inferentially interrelated determinations comprising the totality of conceptual content and individuality the totality of objects conditioned by the shared system of empirical determinations that comprise the particular moment The book details these three moments as well as the specific schema of their relation to one another One of its aims is to offer a resolution to the recent debate between Kantian and traditional metaphysics based readings of Hegel that has been dominating Hegel scholarship The author claims that Hegel walked a narrow path between Scylla of offering just another version of the traditional kind of metaphysics and Charybdis of abstaining from making any substantive claims about the nature of reality and focusing exclusively on the analysis of the faculty of understanding Hegel left behind traditional approaches to the problems of metaphysics and through a radical reformulation of the relationship between thought and being proposed a new kind of metaphysics that is Kantian through and through **Hegel: Lectures on the Proofs of the Existence of God** ,2007-03-29

The Hegel Lectures Series Series Editor Peter C Hodgson Hegel's lectures have had as great a historical impact as the works he himself published Important elements of his system are elaborated only in the lectures especially those given in Berlin during the last decade of his life The original editors conflated materials from different sources and dates obscuring the development and logic of Hegel's thought The Hegel Lectures series is based on a selection of extant and recently discovered transcripts and manuscripts Lectures from specific years are reconstructed so that the structure of Hegel's argument can be followed Each volume presents an accurate new translation accompanied by an editorial introduction and annotations on the text which make possible the identification of Hegel's many allusions and sources Lectures on the Proofs of the Existence of God Hegel lectured on the proofs of the existence of God as a separate topic in 1829 He also discussed the proofs in the context of his lectures on the philosophy of religion 1821-31 where the different types of proofs were considered mostly in relation to specific religions The text that he prepared for his lectures in 1829 was a fully formulated manuscript and appears to have been the first draft of a work that he intended to publish and for which he signed a contract shortly before his death in 1831 The 16 lectures include an introduction to the problem of the proofs and a detailed discussion of the cosmological proof Philipp Marheineke published these lectures in 1832 as an appendix to the lectures on the philosophy of religion together with an earlier manuscript fragment on the cosmological proof and the treatment of the teleological and ontological proofs as found in the 1831 philosophy of religion lectures Hegel's 1829 lectures on the proofs are of particular importance because they represent what he actually wrote as distinct from auditors transcriptions of oral lectures Moreover they come late in his career and offer his final and most seasoned thinking on a topic of obvious significance to him that of the reality status of God and ways of knowing God These materials show how Hegel conceived the connection between the cosmological teleological and ontological proofs All of this material has been newly translated by Peter C Hodgson from the German critical editions by Walter Jaeschke This edition includes an editorial introduction annotations on the text and a glossary and bibliography

Hegel's Trinitarian Claim Dale M. Schlitt, 2012-11-15 Hegel's philosophical interpretation of Trinity as a dialectically developing movement of Spirit is one of the most profound readings of Trinity in Western thought In Hegel's Trinitarian Claim Dale M Schlitt provides a careful detailed presentation of this claim in Hegel's major published works and in his lectures on the philosophy of religion taking a critical look at how Hegel presents his claim that to think of God as subject and person one must think of God as Trinity Although agreeing with Hegel's conclusion Schlitt argues on the basis of an immanent critique of Hegel's thought that Hegel is not able to defend that claim in the way in which he proposes to do so Schlitt argues instead that Hegel's trinitarian claim can be justified when Spirit is no longer seen as a movement of thought but as a movement of enriching experience This close analysis provides an excellent point of entry into the wider study and critical consideration of Hegel's systematic philosophical project as a whole Originally published in 1984 and available now in paperback for the first time this edition features a new preface and postscript

Hegel's Philosophy of Universal

Reconciliation Stephen Theron, 2013-07-16 This book is the final one in a series of four on Hegel as theologian first presented as such in *New Hegelian Essays* Cambridge Scholars Publishing 2012 In *From Narrative to Necessity* 2012 we then set forth the essential theme of Hegel's theology as the transcendence of picture thinking In a third volume *Reason's Developing Self Revelation* 2013 we specified this same theme as humanity's accomplished future ultimate end of life the Idea Here finally we discover the reconciliation of Mind with itself as the nerve of Hegel's thought Hence this book is subtitled *Logic as Form of the World* picking up on Gottlob Frege's rhetorical question What is the world without the reason The first chapter recapitulates that intimate union of God and man the Christian confessional movement would manifest set forth here philosophically This leads naturally to an identification of faith the virtue with the habit of rationality Religious apologetic is found to fall short of philosophy which forms a system chapter 15 In *Logic and the World* chapter 18 we further specify such logical knowledge as issuing in rational will called love in J M E McTaggart's Hegelian writings Man himself herself is finally identified with Mind as both the uniquely determining form the Idea of our self transcending nature universalising the individual individualising the universal and equally form of the world Here the thrust of Hegel's metaphysics confirms those of Aristotle on this point Last after some historical and practical reflections medieval thought the clergy Marxism we end where we began with the transforming effect of Hegel's thought as developing the doctrine of a divine creation in particular while also developing the doctrine of this development itself in anticipatory development therefore of J H Newman's classic essay of 1845 on *The Development of Christian Doctrine*
