Häberlen, 2014-07-24 *Learning How to Feel* explores the ways in which children and adolescents learn not just how to express emotions that are thought to be pre existing but actually how to feel The volume assumes that the embryonic ability to feel unfolds through a complex dialogue with the social and cultural environment and specifically through reading material The fundamental formation takes place in childhood and youth A multi authored historical monograph *Learning How to Feel* uses children s literature and advice manuals to access the training practices and learning processes for a wide range of emotions in the modern age circa 1870 1970 The study takes an international approach covering a broad array of social cultural and political milieus in Britain Germany India Russia France Canada and the United States *Learning How to Feel* places multidirectional learning processes at the centre of the discussion through the concept of practical knowledge The book innovatively draws a framework for broad historical change during the course of the period Emotional interaction between adult and child gave way to a focus on emotional interactions among children while gender categories became less distinct Children were increasingly taught to take responsibility for their own emotional development to find authenticity for themselves In the context of changing social political cultural and gender agendas the building of nations subjects and citizens and the forging of moral and religious values *Learning How to Feel* demonstrates how children were provided with emotional learning tools through their reading matter to navigate their emotional lives *A History of Women's Writing in Germany, Austria and Switzerland* Jo Catling, 2000-03-23 This volume makes the wide ranging work of German women writers visible to a wider audience It is the first work in English to provide a chronological introduction to and overview of women s writing in German speaking countries from the Middle Ages to the present day Extensive guides to further reading and a bibliographical guide to the work of more than 400 women writers form an integral part of the volume which will be indispensable for students and scholars of German literature and all those interested in women s and gender studies
