Boyd, 2017-01-04 The sculpture of the early bronze age Cyclades has been systematically studied since the time of Christos Tsountas at the end of the 19th century But that study has been hampered

by the circumstance that so many of the subsequent finds come from unauthorized excavations where the archaeological context was irretrievably lost Largely for that reason there are still many problems surrounding the chronology the function and the meaning of Early Cycladic sculpture This lavishly illustrated and comprehensive reassessment sets out to rectify that situation by publishing finds which have been recovered in controlled excavations in recent years as well as earlier finds for which better documentation can now be provided Using the material from recent excavation projects and drawing on the papers presented at a symposium held in Athens in 2014 it is possible now to undertake a fresh overview of the entire body of sculpture from the Cycladic islands which has been found in secure archaeological contexts Beginning with early examples from Neolithic settlement sites and extending into a consideration of material found in later contexts the 35 chapters are divided into sections which examine sculpture from settlements cemeteries and the sanctuary at Kavos concluding with a discussion of material techniques and aspects of manufacture
