Rhodes in the Hellenistic Age Richard M. Berthold, 2018-10-18 This book offers a detailed political history of Rhodes from the foundation of the Rhodian republic in the fifth century B C to the conclusions of Rhodes alliance with Rome in the second a period in which Rhodes was a major Mediterranean power Richard M Berthold provides a complete account of Rhodian foreign affairs exploring the principles and reasons behind Rhodes foreign policy decisions He traces Rhodes history through the stormy years of the fourth century to the independence and prosperity of the third arguing that Rhodes achieved economic and political success by pursuing a course of studied neutrality Berthold maintains that Rhodes did not willfully abandon its neutral stance during the second century but rather was forced by events to support Rome a posture that ultimately led to Rhodes loss of independence

Politics of Association in Hellenistic Rhodes Christian A. Thomsen, 2020-07-09 Christian Thomsen offers a study of political institutions on the island state of Rhodes an important power in the eastern Mediterranean and the first city of the Hellenistic world

Politics of Association in Hellenistic Rhodes Thomsen Christian Thomsen, 2020-07-09 A new perspective on political organisation in Hellenistic Rhodes and the ancient Greek citystate The first comprehensive study of Rhodes in more than 20 years and one of the few books dedicated to a single Hellenistic city state Introduces the reader to Hellenistic Rhodes an important but also remarkably understudied city state of the ancient Greek and Roman world Challenges traditional assumptions about political organization in the ancient Greek city state Documents the existence of an alternative conception of the ancient Greek city state which will inspire new approaches to the study of the ancient Greek city state politics and society Christian Thomsen offers a study of political institutions on the island state of Rhodes an important power in the eastern Mediterranean and the first city of the Hellenistic world Using Aristotle's notion of the polis as an association of associations as its point of departure

Thomsen provides an analysis of political institutions taking a broader view of what constitutes an institution than traditional studies of the ancient Greek city state Among the institutions surveyed are the family civic subdivisions such as tribes and demes as well as private associations He argues that these organisations served as important junctions in the networks of political elites and shaped the political landscape of Hellenistic Rhodes Religious Life in Late Classical and Hellenistic Rhodes Juliane Zachhuber,2024-07-10 The ancient state of Rhodes was famous for many things in the Hellenistic period it emerged as an economic powerhouse thanks to its strategic position on maritime trade routes its status further bolstered by its proud independence in an era of great kings and its cultural successes and heritage celebrated by contemporaries as well as later writers But what did this state look like on the inside and what social and religious forces contributed to its success This book explores the origins of the Rhodian state in the late fifth century BC a union born out of three separate city states Lindos Cameiros and Ialysos By digging deep into the abundant epigraphic culture that survives narratives emerge that tell the stories of these Rhodians and their communities Despite the political unification and the foundation of a famed and successful capital city Rhodes town the three old centres continued to exhibit distinctive and seemingly lively local religious cultures What these looked like and the question of whether they indicate cultic vitality rather than ossification is considered in detail by examining the local pantheons and the religious dynamics and interactions that characterised and shaped them Pulling together the diverse threads and local customs a diachronic religious history of Rhodes is sketched The role religion played in the social landscape of Hellenistic Rhodes is addressed through a thorough examination of priesthoods Finally providing a counterbalance to the institutional side of religion the lived experience of Rhodian religious associations is depicted The resulting picture offers a nuanced insight into the religious life and history of a Hellenistic city state Roman Mold-blown Glass E. M. Stern,Toledo Museum of Art,1995 The Toledo Museum of Art has one of the largest most extensive and most varied collections of Roman glass vessels and objects from the eastern Mediterranean currently housed in any museum Foreword p 9 **Classica et Mediaevalia vol.45** Ole Thomsen,Karsten Friis-Jensen,Signe Isager,Jens Erik Skydsgaard,Ole L. Smith,Birger Munk Olsen og Gudrun Haastrup,2001-12-17 Classica et Mediaevalia is an international periodical published annually with articles written by Danish and International scholars The articles are mainly written in English but also in French and German The periodical deals from a philological point of view with Classical Antiquity in general and topics such as history of law and philosophy and the medieval ecclesiastic history It covers the period from the Greco Roman Antiquity until the Late Middle Ages *Democracy Beyond Athens* Eric W. studies and the ancient world in particular Using theoretical models of social network analysis this book illuminates aspects of the economic social religious and political history of the ancient Greek and Roman worlds Bringing together some of the most active and prominent researchers in ancient history this book moves beyond political institutions ethnic and geographical boundaries in order to observe the ancient Mediterranean through a perspective of network interaction It employs a wide range of approaches and to examine relationships and interactions among various social entities in the Mediterranean Chronologically the book extends from the early Iron Age to the late Antique world covering the Mediterranean between Antioch in the east to Massalia Marseilles in the west This book was published as two special issues in Mediterranean Historical Review *Inconsistencies in Greek and Roman Religion. 1, Ter Unus* H. S. Versnel,1990 This is the first of a two volume collection of studies in inconsistencies in Greek and Roman religion Their common aim is to argue for the historical relevance of various types of ambiguity and dissonance The first volume focuses on the central paradoxes in ancient henotheism The term henotheism a modern formation after the stereotyped acclamation EIS O QEOS one is the god common to early Christianity and contemporaneous paganism denotes the specific devotion to one particular god without denying the existence of or even cultic attention to other gods After its prime in the twenties and thirties of this century the term fell into disuse Nonetheless the notion of henotheism represents one of the most remarkable and significant shifts in Graeco Roman religion and hence deserves fresh reconsideration **Hellenistic Rhodes** David Morehead Young,1962

The Dance of the Islands Christy Constantakopoulou,2007-10-04 A study of the history of the Aegean islands and changing concepts of insularity with particular emphasis on the fifth century BC Island connectivity was expressed on many levels Constantakopoulou investigates island interaction in the areas of religion and imperial politics in particular

Harrison,2013-02-28 From his first publication Aratos of Sicyon 1933 to his death in 2008 F W Walbank established himself as one of the leading ancient historians of the last century His many publications not least his three volume commentary on the Greek historian of Roman power Polybius transformed the study both of Polybius and of the history of the Hellenistic world Polybius and his World honours Walbank s achievement by bringing together a number of leading scholars in the fields of Hellenistic historiography and history The twenty chapters including an introduction by the volume s editors re examine a number of central Polybian themes Polybius position between Greece and Rome his account of the Roman constitution and the relationship of his work with Xenophon Phylarchus Aratus of Sicyon and Livy amongst others The book looks at Polybius text in the light of narratological perspectives and for the wealth of source material it offers for the economic historian whilst three chapters also consider aspects of Walbank s own life and work especially the relationship between his political commitments and his academic work the genesis of his Polybian commentary and the personal backdrop to his career

The Local Horizon of Ancient Greek Religion Hans Beck,Julia Kindt,2023-04-13 Which dimensions of the religious experience of the ancient Greeks become tangible only if we foreground its local horizons This book explores the manifold ways in which Greek religious beliefs and practices are encoded in and communicate with various local environments Its individual chapters explore the local in its different forms and formulations Besides the polis perspective they include numerous other places and locations above and below the polis level as well as those fully or largely independent of the city state Overall the local emerges as a relational concept that changes together with our understanding of the general or universal forces as they shape ancient Greek religion The unity and diversity of ancient Greek religion becomes tangible in the manifold ways in which localizing and generalizing forces interact with each other at different times and in different places across the ancient Greek world **The Dodecanese and the East Aegean Islands** Marc Dubin,2002 A

framework of the Greek world reveals that interaction with the Aegean was a fundamental aspect of their history

Athenian Power in the Fifth Century BC Leah Lazar, 2024-01-03 Athenian Power in the Fifth Century BC provides a new analysis of the fifth century BC Athenian empire a central topic in ancient Greek history Challenging orthodox approaches which have been mostly empirical monolithic and focused on Athens the book argues that Athenian power was flexible and a matter of negotiation between the Athenians and their allies It brings the allies to centre stage as active agents and considers how the Athenian empire operated in different regions The first three chapters focus on political fiscal and religious interactions between the Athenians and their allies in Athenian contexts The subsequent three chapters then offer studies of the empire in three different regions the North Aegean Rhodes and the straits between the Aegean and the Black Sea showing how the empire employed overlapping but differentiated regional strategies This book is distinct from previous contributions in three key ways First it offers new perspectives on well known Athenian epigraphic and literary sources while also utilising different categories of non Athenian evidence including varied forms of material culture Second it provides sophisticated economic analysis Third the monograph makes use of critical historical comparison with other imperial powers with later Athenian power and with the operation of fifth century Athenian power in different regions Rome's Economic Revolution Philip Kay, 2014-01-23 In this volume Philip Kay examines economic change in Rome and Italy between the Second Punic War and the middle of the first century BC He argues that increased inflows of bullion in particular silver combined with an expansion of the availability of credit to produce significant growth in monetary liquidity This in turn stimulated market developments such as investment farming trade construction and manufacturing and radically changed the composition and scale of the Roman economy Using a wide range of evidence and scholarly investigation Kay demonstrates how Rome in the second and first centuries BC became a coherent economic entity experiencing real per capita economic growth Without an understanding of this economic revolution the contemporaneous political and cultural changes in Roman society cannot be fully comprehended or explained The Elemental Analysis of Glass Beads Laure Dussubieux, Heather Walder, 2022-10-03 Glass beads both beautiful and portable have been produced and traded globally for thousands of years Modern archaeologists study these artifacts through sophisticated methods that analyze the glass composition a process which can be utilized to trace bead usage through time and across regions This book publishes open access compositional data obtained from laser ablation inductively coupled plasma mass spectrometry from a single analytical laboratory providing a uniquely comparative data set The geographic range includes studies of beads produced in Europe and traded widely across North America and beads from South and Southeast Asia traded around the Indian Ocean and beyond The contributors provide new insight on the timing of interregional interactions technologies of bead production and patterns of trade and exchange using glass beads as a window to the past This volume will be a key reference for glass researchers archaeologists and any scholars interested in material culture and exchange it provides a wide range of case studies in the

investigation and interpretation of glass bead composition production and exchange since ancient times
