Introducing Sociology Using the Stuff of Everyday Life Josee Johnston,Kate Cairns,Shyon Baumann,2017-01-06 The challenges of teaching a successful introductory sociology course today demand materials from a publisher very different from the norm Texts that are organized the way the discipline structures itself intellectually no longer connect with the

majority of student learners This is not an issue of pandering to students or otherwise seeking the lowest common denominator On the contrary it is a question of again making the practice of sociological thinking meaningful rigorous and relevant to today s world of undergraduates This comparatively concise highly visual and affordable book offers a refreshingly new way forward to reach students using one of the most powerful tools in a sociologist s teaching arsenal the familiar stuff in students everyday lives throughout the world the jeans they wear to class the coffee they drink each morning or the phones their professors tell them to put away during lectures A focus on consumer culture seeing the strange in the familiar is not only interesting for students it is also the authors suggest pedagogically superior to more traditional approaches By engaging students through their stuff this book moves beyond teaching about sociology to helping instructors teach the practice of sociological thinking It moves beyond describing what sociology is so that students can practice what sociological thinking can do This pedagogy also posits a relationship between teacher and learner that is bi directional Many students feel a sense of authority in various areas of consumer culture and they often enjoy sharing their knowledge with fellow students and with their instructor Opening up the sociology classroom to discussion of these topics validates students expertise on their own life worlds Teachers in turn gain insight from the goods services and cultural expectations that shape students lives While innovative the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester A map on pages ii iii identifies core sociological concepts covered so that a traditional syllabus as well as individual lectures can easily be maintained Theory method and active learning exercises in every chapter constantly encourage the sociological imagination as well as the doing of sociology

Anderson, Ien Ang, Andrea Del Bono, Donald McNeill, Alexandra Wong, 2019-01-25 Chinatowns are familiar places in almost all major cities in the world. In popular Western wisdom the restaurants, pagodas and red lanterns are intrinsically equated with a self-contained immigrant Chinese district, an alien enclave of the East in the West. By the 1980s when these Western societies had largely given up their racially discriminatory immigration policies and opened up to Asian immigration, the dominant conception of Chinatown was no longer that of an abject ethnic ghetto; rather, Chinatown was now seen as a positive expression of multicultural heritage and difference. By the early 21st century, however, these spatial and cultural constructions of Chinatown as an 'other' space, whether negative or positive, have been thoroughly destabilised by the impacts of accelerating globalisation and transnational migration. This book provides a timely and much-needed paradigm shift in this regard through an in-depth case study of Sydney's Chinatown. It speaks to the growing multilateral connections that link Australia and Asia, and especially China, together, not just economically but also socially and culturally, as a consequence of increasing transnational flows of people, money, ideas and things. Further, the book elicits a particular sense of a place in Sydney's Chinatown that of an interconnected world in which Western and Asian realms inhabit each other and in which the orientalist legacy is being reconfigured in new deployments and more complex delimitations. As such, Chinatown Unbound engages with and contributes to making sense of the epochal shift in the global balance of power towards Asia, especially China.

Plastic Culture Woodrow Phoenix, 2006-06-26 In *Plastic Culture*, British comics artist and illustrator Woodrow Phoenix explores our relationship to toys in the twenty-first century, with particular emphasis on Japan, an exporter of both merchandise and ideas. Toys based on comics, movies and TV shows, from Astro Boy, Godzilla and Gatchaman to Power Rangers, Sailor Moon and Pokemon, have had a powerful effect on the West and have kick-started trends in design and pop culture that have crossed from Japan to the West and back East again. With its blend of incisive analysis and stylish photography, this is a book that will appeal to a wide range of readers, from those interested in the latest trends in contemporary art to toy collectors young and old, and to anyone with an interest in Japan's influence on contemporary pop culture.

Seven Going on Seventeen Jacqueline Reid-Walsh, 2005 The tween is the new girl on the block in girlhood studies. Although the study of tween life may have derived from a particular marketing orientation at the end of the twentieth century, it is not limited by it. On the contrary, this collection of essays shows that tween is not a simple or unified concept, nor is it limited to a certain class of girls in a few countries. This collection, by an international group of authors, highlights specific methodologies for working with and studying tween-age girls, provides challenges to the presumed innocence of girlhood, and engages in an analysis of marketing in relation to girlhood. In so doing, this book offers a reading on these three or four years in a girl's life that suggests that this period is as fascinating as the teen years and as generative in its implications for girlhood studies as studies of both younger and adolescent girls.
