*Helmut von Werz* Cordula Rau,Georg von Werz,2014-11-24 Helmut von Werz gründete bereits 1946 in München sein Architekturbüro. Dem 1952 Johann Christoph Ottow als Partner beitrug. 1971 kamen Erhard Bachmann und Michel Marx als Partner hinzu. Einige Bauten dieses Architekturbüros wurden zu ihrer Zeit aufgrund ihrer Modernität und des Einsatzes neuer Materialien kontrovers debattiert wie zum Beispiel der Neubau der Archaischen Staatssammlung in München, welcher als einer der ersten Stahlbetonbauten mit rostbildenden Corten Stahlplatten realisiert wurde. Im Werk von Helmut von Werz wird der Geist der Nachkriegsarchitektur sichtbar, der einerseits vom Mahalten und Bewahren geprägt war, sich andererseits der Avantgarde gegenüber nicht verschloss.      The Skira Yearbook of World Architecture Luca Molinari,2008      *Y08* Luca Molinari,2008 A quintessential Skira Architecture publication which presents Skira's point of view on world architecture

Vienna, architecture Leopold Dunzl,2000      **Old & New** Frank Peter Jäger,2012-11-05 Most of the buildings that will be needed in Europe in the coming decades have long since been built. The building tasks of the future lie in the skillful reuse and transformation of existing building stock, whether it be the redevelopment of historic city centers, the building of extensions onto residential structures, the expansion of public buildings, or the redevelopment of entire factory areas. Building in the existing fabric calls for highly specific approaches in planning, construction, and implementation. It spans a broad range of building tasks, from working within the guidelines of historic preservation and renovating carefully and cautiously all the way to the complete transformation of what exists. In addition to aesthetic transformation, technical aspects such as improving energy efficiency and working with contaminated building materials also play an important role. This book provides a comprehensive overview of architectonic strategies of continuing to build. It presents intelligent ideas and approaches for working with existing building stock and divides them into three categories according to the method selected: addition, transformation, and reuse. Presented in this volume are everyday projects such as the revitalizing of structures from the 1950s to the 1970s, for example, the renovation of Siedlung Heuried in Zurich by Adrian Streich Architects, but also more specialized examples such as the open air library made of elements recycled from the facade of a department store in Magdeburg, Salbke by Karo Architekten. Interviews with experts provide helpful background information on selected topics.
