**The European Economy Between the Wars** C. H. Feinstein, Peter Temin, Gianni Toniolo, 1997 The European Economy Between the Wars provides a full and up to date economic history of Europe in the inter war period The authors place the Great Depression of 1929 33 and the associated financial crisis at the centre of the narrative and present these as both the culmination of the economic consequences of the First World War the post war peace treaties and the policies and practices of the 1920s and as a powerful influence on the subsequent economic history of the 1930s Indescribing and explaining these developments the authors show that errors in international economic policy especially the commitment to the gold standard were a principal cause of both the deep crisis and the partial recovery The overall theme is illustrated at every point by a discussion of similarities and contrasts in the economic history and policies of individual countries large and small The basic approach is chronological the style is clear and straightforward and the book is accessible to students in a range of disciplines The work takes full account of recent research and there is an annotated guide to further reading with a substantial bibliography *The World Economy between the Wars* Peter Temin, Gianni Toniolo, 2008-02-12 The European Economy between the Wars OUP 1997 has become the definitive economic history of Europe in the inter war period Placing the Great Depression of 1929 33 and the associated financial crisis at the center of the narrative the authors comprehensively examined the lead up to and consequences of the depression and recovery The authors now expand their scope to include the entire world economy and have created a new edition The World Economy between the Wars New material focuses on the structure of the world economy in the 1920s including a special focus on the United States Japan and Latin America **Innovations in the European Economy between the Wars** Francois Caron, Paul Erker, Wolfram Fischer, 2011-11-02 No detailed description available for Innovations in the European Economy between the Wars *Europe Between the Wars* Martin Kitchen, 2014-01-14 Martin Kitchen s compelling account of Europe between the wars sets the twenty year crisis within the context of the profound sense of cultural malaise shared by many philosophers and artists the economic crises that plagued a Europe ruined by war and the social upheavals caused by widespread unemployment and grinding poverty amid a noticeable improvement of living standards This thoroughly revised edition with completely new sections on intellectual cultural and social history is richly illustrated with contemporary photographs It is an up to date and lively account of a critical period of European history when the old world collapsed the dictators offered seemingly exciting alternatives and democracies were put to the supreme test Written for undergraduate students studying 20th century European history this new edition of a classic will challenge and provoke a deeper understanding of the interwar years **Evolving Financial Markets and International Capital Flows** Lance E. **The Oxford Handbook of European History, 1914-1945** Nicholas Doumanis, 2016 The period spanning the two World Wars was unquestionably the most catastrophic in Europe's history Despite such undeniably progressive developments as the radical expansion of women's suffrage and rising health standards the era was dominated by political violence and chronic instability Its symbols were Verdun Guernica and Auschwitz By the end of this dark period tens of millions of Europeans had been killed and more still had been displaced and permanently traumatized If the nineteenth century gave Europeans cause to regard the future with a sense of optimism the early twentieth century had them anticipating the destruction of civilization The fact that so many revolutions regime changes dictatorships mass killings and civil wars took place within such a compressed time frame suggests that Europe experienced a general crisis The Oxford Handbook of European History 1914-1945 reconsiders the most significant features of this calamitous age from a transnational perspective It demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional continental and global developments Readers will find innovative and stimulating chapters on various political social and economic subjects by some of the leading scholars working on modern European history today

**The Great Depression of the 1930s** Nicholas Crafts, Peter Fearon, 2013-02-28 Understanding the Great Depression has never been more relevant than in today's economic crisis This edited collection provides an authoritative introduction to the Great Depression as it affected the advanced countries in the 1930s The contributions are by acknowledged experts in the field and cover in detail the experiences of Britain Germany and the United States while also seeing the depression as an international disaster The crisis entailed the collapse of the international monetary system sovereign default and banking crises in many countries in the context of the most severe downturn in western economic history The responses included protectionism regulation fiscal and monetary stimulus and the New Deal The relevance to current problems facing Europe and the United States is apparent The chapters are written at a level which will be comprehensible to advanced undergraduates in economics and history while also being a valuable source of reference for policy makers grappling with the current economic crisis The book will be of interest to modern macroeconomists and students of interwar history alike and seeks to bring the results of modern research in economic history to a wide audience The focus is not only on explaining how the Great Depression happened but also on understanding what eventually led to the recovery from the crisis A key feature is that every chapter has a full list of bibliographical references which can be a platform for further study
