European Firearms:

European Weapons and Armour Ewart Oakeshott, 2012 The story of arms in Western Europe from the Renaissance to the Industrial Revolution A treasury of information based on solid scholarship anyone seeking a factual and vivid account of the story of arms from the Renaissance period to the Industrial Revolution will welcome this book The author chooses as his starting point the invasion of Italy by France in 1494 which sowed the dragon s teeth of all the successive European wars the French invasion was to accelerate the trend towards new armaments and new methods of warfare The author describes the development of the handgun and the pike the use and style of staff weapons mace and axe and war hammer dagger and dirk and bayonet He shows how armour attained its full Renaissance splendour and then suffered its sorry and inevitable decline culminating in the Industrial Revolution with its far reaching effects on military armaments Above all he follows the long history of the sword queen of weapons to the late eighteenth century when it finally ceased to form a part of a gentleman s every day wear Lavishly illustrated EWART OAKESHOTT was one of the world s leading authorities on the arms and armour of medieval Europe His other works on the subject include *Records of the Medieval Sword* and *The Sword in the Age of Chivalry* Weapons Law in Western Europe, 1550-2020 Gunner Lind, 2024-12-09 This book is a transnational history of European weapons law that utilizes the law and primary sources to trace the development from early portable firearms to modern day weapons Challenging many conventional assumptions this book establishes that weapons control in the current sense is a new phenomenon Control with possession only became dominant between 1918 and 1939 thereby establishing a high degree of uniformity for the first time Weapons law is old in Western Europe but only as a palette of possible solutions Possession control triumphed as a tool against Communist and Fascist attacks on democracy and remained as an instrument against crime and accidents It is argued that previously the laws on possession furthered rather than hindered ownership For centuries governments sought security by encouraging trusted men to arm themselves rather than disarming the suspect Legislators used a range of carrying restrictions sometimes many but mostly few as a tool against armed crime The author examines attitudes and policies towards power law violence social hierarchy national defence and civic freedom This volume offers historians and social scientists a new perspective on the long term development of Western European states and societies and it will be of value to undergraduate and postgraduate students of history sociology and politics *Firearms* Kenneth Warren Chase, 2003-07-07 This book is a history of firearms across the world from the 1100s up to the 1700s from the time of their invention in China to the time when European firearms had become clearly superior It asks why it was the Europeans who perfected firearms when it was the Chinese who had invented them but it answers this question by looking at how firearms were used throughout the world **Firearms** Helen Poole, Simon Sneddon, 2021-11-18 *Firearms Global Perspectives on Consequences Crime and Control* explores the many dimensions of the illicit use of firearms across the globe including legal social science technical and research perspectives on the issue Employing a global set of case studies the

book introduces students to the core issues related to the trafficking manufacture availability and criminal use of firearms as well as firearms markets national and international legal frameworks to control firearms the response of the criminal justice system the role of civil society in affecting change and how students can get involved through research and action Firearms will be of great interest to students of Criminology Criminal Justice International Law International Development Policing Crime Control and Community Safety Firearms Roger Pauly,2008-04-28 With graphic prints photographs a timeline and a glossary this engaging and insightful technography sheds light on one of the most important inventions in the history of the human race **China and Europe** Hongqi Li,Thomas H. C. Lee,1991 Guns for the Sultan Gábor Ágoston,2005-03-24 Gabor Agoston s book contributes to an emerging strand of military history that examines organised violence as a challenge to early modern states their societies and economies His is the first to examine the weapons technology and armaments industries of the Ottoman Empire the only Islamic empire that threatened Europe on its own territory in the age of the Gunpowder Revolution Based on extensive research in the Turkish archives the book affords much insight regarding the early success and subsequent failure of an Islamic empire against European adversaries It demonstrates Ottoman flexibility and the existence of an early modern arms market and information exchange across the cultural divide as well as Ottoman self sufficiency in weapons and arms production well into the eighteenth century Challenging the sweeping statements of Eurocentric and Orientalist scholarship the book disputes the notion of Islamic conservatism the Ottomans supposed technological inferiority and the alleged insufficiencies in production capacity This is a provocative intelligent and penetrating analysis which successfully contends traditional perceptions of Ottoman and Islamic history **Firearms in American History** Charles Winthrop Sawyer,1910 *Hafted Weapons in Medieval and Renaissance Europe* John Waldman,2005-08-01 The development treated in this volume of a variety of staff weapons in the Medieval and Renaissance periods in Europe is of importance as the repeated success of their use caused substantive political changes Their typology use and smithing techniques as well as correlations with contemporary artistic renditions are discussed in great detail Surviving specimens from museums and collections throughout the Western Hemisphere are used Conservation issues are also dealt with The book is heavily illustrated with black and white color photographs and drawings and has a foreword by Walther Karcheski Chief Curator of Arms and Armor of the Frazier Antique Arms Museum It is intended as a reference for historical scholars artists museum curators private collectors and the art market and is a timely clarification of the nature of these arms **Firearms control** Great Britain: Parliament: House of Commons: Home Affairs Committee,2010-12-20 The Home Affairs Committee reports that well designed legislation which regulates and restricts the legal supply of firearms can help to reduce gun crime The committee recognises that thousands of people use firearms responsibly for recreation and in their work It has no intention of restricting such activity However the committee today concludes that interpreting and applying the current 34 pieces of legislation governing the control of firearms places an onerous burden on the police and on

members of the public who wish to abide by the law because it is so complex and confused In particular the committee recommends introducing one licensing system to cover all firearms which require a licence and identifies age restrictions on firearms use as a particular area of uncertainty Although the majority of firearms related crimes are not committed with licensed firearms the committee is also concerned about the use of legally owned weapons in domestic shootings including those related to domestic abuse The Committee has several recommendations including a review of the minimum age limits on the use of firearms and eligibility for firearms certificates recommends tighter restrictions and clearer guidance to the police on the granting of firearms and shotgun licences to individuals who have engaged in criminal activity considering requiring the police to consult the domestic partners of licence applicants in making the decision as to whether to grant a licence suggests that the Government considers requiring advocates raising the fees charged to applicants so that it covers the costs of licensing to ensure that police spending cuts do not jeopardise the rigour of the licensing process Finally the committee was concerned at evidence of the significant criminal threat posed by reactivated and converted firearms in response to tighter regulations on genuine lethal weapons **Illicit Firearms Markets and Organized Crime** ,2024-12-13

much less of a technological edge over its Asian adversaries than is usually believed Substantially dealing with the issue of technology transfer between the world and Europe these studies underline the interactive nature of the process
