European Food Law With 1999 Update:

European Food Law Raymond O'Rourke, 1999-08 European food law has developed piecemeal over time There has been no central text setting out the principles and defining the obligations of those working in the European food industry In 1997 the European Commission published a Green Paper on Food Law identifying the basic goals This book is for lawyers Environmental Health Officers and all dealing with the regulation of the food industry in Europe It gives the user a quick reference to all the EU laws and leading cases pertaining to specific food related issues Full details about the implementation into national law of the major food law directives are provided in an annex **European Food Law** Raymond

O'Rourke, 2001 Concern is growing throughout Europe over the safety of food products The threat posed by BSE and the risks inherent in mass food production have alerted the public and consumer groups to insist on increased safeguards and higher standards involving both legal regulation and the establishment of a European Food Authority *Milk and Dairy Products as Functional Foods* Ara Kanekanian, 2014-04-09 There continues to be strong interest within the food industry in developing new products which offer functional health benefits to the consumer The premium prices that can be charged make these added value products lucrative for manufacturers and they are also commercially popular Dairy foods are central to this sector they are good delivery systems for functional foods yoghurts milk drinks spreads and are also rich in compounds which can be extracted and used as functional ingredients in other food types *Milk and Dairy Products as Functional Foods* draws together a wealth of information regarding the functional health benefits of milk and dairy products It examines the physiological role and the claimed health effects of dairy constituents such as proteins bioactive peptides conjugated linoleic acid CLA omega 3 fatty acids vitamin D and calcium These constituents have been shown to be for example anticarcinogenic anti inflammatory antihypertensive hypocholesterolemic immune modulating and antimicrobial This book examines the evidence for these claims and investigates practical approaches for utilising these attributes The book is aimed at dairy scientists and technologists in industry and academia general food scientists and technologists microbiologists and nutritionists together with all those involved in the formulation and production of functional food products European Food Regulation after Enlargement Karolina Žurek, 2011-11-11 This book presents a critical legal

perspective on the current direction of EU food regulation Analysing three regulatory mechanisms mutual recognition scientific risk regulation and standardisation in the evolution of food legislation in the EU the book shows the inadequacy of the current framework in facing the challenges of enlargement Using the particular experience of a new member state Poland the book argues that an enlarged Europe must not disregard diverse socio economic implications of market regulation Due to historical legacies and a bias in favour of homogeneity the EU food regulatory regime has generated a one dimensional crisis oriented approach As a result it tends to overlook other legitimate concerns such as quality diversity and local traditions This book argues that this need not be so **The Impact of WTO SPS Law on EU Food Regulations**

Chris Downes, 2014-03-20 This book brings a fresh perspective on the emerging field of international food law with the first detailed analysis of the process and implications of domestic compliance with the World Trade Organisation WTO Sanitary and Phytosanitary SPS Agreement It investigates the influence of WTO disciplines on the domestic policy making process and examines the extent to which international trade law determines European Union EU food regulations Following controversial WTO rulings on genetically modified foods and growth hormones in beef awareness and criticism of global rules governing food has grown considerably Yet the real impact of this international legal meta framework on domestic regulations has remained obscure to practitioners and largely unexplored by legal commentators This book examines the emergence of transnational governance practices set in motion by the SPS Agreement and their role in facilitating agricultural trade In so doing it complements and challenges conventional accounts of the SPS regime dominated by analysis of WTO disputes It reviews legal commentary of the SPS Agreement to understand why WTO rules are so commonly characterised as a significant threat to domestic food policy preferences It then takes on these assumptions through an in depth review of food policies and decision making practices in the EU revealing both the potential and limits of WTO law to shape EU policies It finally examines two important venues for the generation of global food norms the WTO SPS Committee and Codex Alimentarius to evaluate the practice and significance of transnational governance in this domain Through detailed case studies including novel foods food additives vitamin and mineral supplements and transparency and equivalence procedures this book provides a richer account of compliance and exposes the subtle but important influence of WTO obligations

The Many Faces of Differentiation in EU Law Bruno de Witte, Dominik Hanf, Ellen Vos, 2001 The introduction by the Amsterdam Treaty of the flexibility clauses authorising a majority of Member States to cooperate more closely in areas covered by the Treaties has been received with mixed feelings Flexibility is by no means a new phenomenon in the EU's development It has been on the Community's agenda already since the 1970s The Single European Act introduced several provisions allowing for flexible approaches to the single market whilst the Maastricht Treaty launched a differentiated approach to the EMU and social policy In addition to these forms of differentiation in primary Community law for many years there has also been a number of quite important though less visible forms of differentiation in secondary Community law This book aims to link both levels of differentiation and seeks to unveil the many faces of differentiation in EU law It analyses whether and to which extent there is a shift in European integration from a system of unity and uniformity to one of flexibility and differentiation A first series of contributions to the book analyse a number of exemplary policy fields EMU social policy environment free movement of persons justice and home affairs in order to identify their degree of differentiation A second set of contributions examine various horizontal institutional matters of cross sectoral importance These two main parts are framed by introductory articles on the development of flexibility and by contributions drawing on the constitutional limits to differentiation The contributions are made by Dominik Hanf Jos M de Areilza Jean Victor Louis Sean Van Raepenbusch Ludwig Kramer Georgia Papagianni Grainne de Burca Ellen Vos Linda Senden Sacha Prechal Wouter Devroe Deirdre Curtin Bruno De Witte Eddy De Smijter en Jan Wouters

Private food law Bernd van der Meulen, 2023-09-04 Since the turn of the Millennium world wide initiatives from the private sector have turned the regulatory environment for food businesses upside down For the first time in legal literature this book analyses private law initiatives relating to the food chain often referred to as private voluntary standards or schemes Private standards are used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU legislature and to manage risks and liability beyond the traditional limits of food businesses We see that litigation is no longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP BRC IFS SQF and ISO These private standards incorporate public law requirements thus embedding them in contractual relations and exporting them beyond the jurisdiction of public legislators Other standards focus on corporate social responsibility or sustainability This book also addresses how private religious standards such as Kosher and Halal play a role in defining specific markets of growing importance It is noted that organic standards have found an interesting symbiosis with public law Another development on this topic is that food businesses are inspected more often by private auditors than by public inspectors Effects in terms of receiving or being denied certification far outweigh public law sanctions In short private law has changed an entire legal infrastructure for the food sector It emerges as competing with the public law regulatory infrastructure This book is of interest to all who concern themselves with food law legislation and litigation and the evolving role of private standards on changing the landscape of food chains and innovation
