European History: 1914 to 1935 Essentials , The Birth of a Great Power System, 1740-1815 Hamish
Scott, 2014-07-22 The Birth of a Great Power System 1740 1815 examines a key development in modern European history the
origins and emergence of a competitive state system H M Scott demonstrates how the well known and dramatic events of
these decades the emergence of Russia and Prussia the three partitions of Poland the continuing retreat of the Ottoman
Empire the unprecedented territorial expansion of Revolutionary and Napoleonic France halted by the final defeat of
Napoleon were part of a wider process that created the modern great power system dominated by Europe s five leading
states Enhanced by maps and a chronology of principal events this comprehensive and accessible textbook is fully up to date
in its coverage of recent scholarship Unlike many other treatments of this period Scott extends his beyond the French
Revolution of 1789 in order to demonstrate how events both before and after this great upheaval merged to produce the
central political development in modern European history This book addresses the crucial phase in the emergence of the
modern international system which with the subsequent addition of the USA Japan and Russia has prevailed until the present
day *Ideology and Foreign Policy in Early Modern Europe (1650-1750)* Gijs Rommelse, 2016-05-13 The years 1650 to 1750
sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de
ideologized period However the essays in this collection contend that this is a mistaken assumption For whilst international
relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding
hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly
argued that ideology had a fundamental part to play in this crucial transformative stage of European history Many early
modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the
anarchism materialism and power political nature of international relations In contrast this volume provides alternative
perspectives viewing international relations as socially constructed and influenced by ideas ideology and identities Building
on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting
political and economic ideology firmly back into the picture By engaging with and building upon recent theoretical
developments this collection treads new terrain Not only does it integrate cultural history with high politics and foreign
policy it also engages directly with themes discussed by political scientists and international relations theorists As such it
offers a fresh and genuinely interdisciplinary approach to this complex and fundamental period in Europe s development
