The nineteenth century was a turbulent period in the history of the philosophical scrutiny of religion Major scholars such as Hegel Fichte Schelling Newman Caird and Royce sought to construct systematic responses to the Enlightenment critiques of religion carried out by Spinoza and Hume At the same time new critiques of religion were launched by philosophers such as Schopenhauer and Nietzsche and by scholars engaged in textual criticism such as Schleiermacher and Dilthey Over the course of the century the work of Marx Freud Darwin and Durkheim brought the revolutionary perspectives of political economy psychoanalysis evolutionary theory and anthropology to bear on both religion and its study These challenges played a major role in the shaping of twentieth century philosophical thought about religion Nineteenth Century Philosophy of Religion will be of interest to scholars and students of Philosophy and Religion and will serve as an authoritative guide for all who are interested in the debates that took place in this seminal period in the history of philosophical thinking about religion

The Worlds of Positivism Johannes Feichtinger,Franz L. Fillafer,Jan Surman,2018-01-25 This book is the first to trace the origins and significance of positivism on a global scale Taking their cues from Auguste Comte and John Stuart Mill positivists pioneered a universal experience based culture of scientific inquiry for studying nature and society a new science that would enlighten all of humankind Positivists envisaged one world united by science but their efforts spawned many Uncovering these worlds of positivism the volume ranges from India the Ottoman Empire and the Iberian Peninsula to Central Europe Russia and Brazil examining positivism's impact as one of the most far reaching intellectual movements of the modern world Positivists reinvented science claiming it to be distinct from and superior to the humanities They predicated political governance on their refashioned science of society and as political activists they sought and often failed to reconcile their universalism with the values of multiculturalism Providing a genealogy of scientific governance that is sorely needed in an age of post truth politics this volume breaks new ground in the fields of intellectual and global history the history of science and philosophy     *Planning the Greenspaces of Nineteenth-Century Paris* Richard S. Hopkins,2015-05-11 In the second half of the nineteenth century state and municipal governments oversaw the explosive growth of public parks squares and gardens throughout the city of Paris In *Planning the Greenspaces of Nineteenth Century Paris* Richard S Hopkins skillfully weaves together social and cultural history to argue that the expansion of these greenspaces served as more than simple urban embellishment Rather they provided an essential component of the Second Empire's efforts to transform and revitalize

France's capital city and their development continued well into the Third Republic Hopkins brings a new dimension to the study of nineteenth century Parisian urbanism by considering the parks and squares of Paris from multiple perspectives the reformers who advocated for them the planners who constructed them the workers who maintained them and the neighborhood residents who used them As public areas over which private citizens felt a high degree of ownership these spaces offered a unique opportunity for collaboration between city officials and residents Hopkins examines the national and municipal goals for the greenspaces their intended contributions to public health and the roles of park service employees and neighborhood groups in their ongoing centrality to Parisian life Hopkins's study moves deftly from the aspirations of the political authorities to the ways in which new public spaces contributed to community building and neighborhood identity Drawing on extensive archival research he depicts a greenspace design and development process that illustrates the dynamic relationship between citizens and city

*The Science of History in Victorian Britain* Ian Hesketh, 2016-09-12 New attitudes towards history in nineteenth century Britain saw a rejection of romantic literary techniques in favour of a professionalized scientific methodology The development of history as a scientific discipline was undertaken by several key historians of the Victorian period influenced by German scientific history and British natural philosophy This study examines parallels between the professionalization of both history and science at the time which have previously been overlooked Hesketh challenges accepted notions of a single scientific approach to history Instead he draws on a variety of sources monographs lectures correspondence from eminent Victorian historians to uncover numerous competing discourses

*The Origins of Agnosticism* Bernard Lightman, 2019-12-01 Originally published in 1987 *The Origins of Agnosticism* provides a reinterpretation of agnosticism and its relationship to science Professor Lightman examines the epistemological basis of agnostics learned ignorance studying their core claim that God is unknowable To address this question he reconstructs the theory of knowledge posited by Thomas Henry Huxley and his network of agnostics In doing so Lightman argues that agnosticism was constructed on an epistemological foundation laid by Christian thought In addition to undermining the continuity in the intellectual history of religious thought Lightman exposes the religious origins of agnosticism

**Liberalism and Sociology** Stefan Collini, 1979-07-05 In this wide ranging book Stefan Collini deals with the relationship between Liberalism and sociology in late nineteenth and early twentieth century Britain He discusses in particular the crucial contributions of L T Hobhouse the leading Liberal political theorist of the period who is also generally regarded as the Founding Father of British sociology Based upon extensive original research the book draws together themes from three fields which are normally pursued in historiographical isolation It examines the moral and intellectual inspiration of the New Liberalism which came to dominate Edwardian politics explores the nature of the systematic political philosophy in this period and shows how the contemporary understanding of sociology was bound up with attempts to provide a theoretical and historical grounding for the belief in Progress especially in opposition to Social Darwinist and other biological social theories

Throughout the intellectual context necessary to a properly historical understanding of these ideas is reconstructed in detail and particular attention is paid to the structure of the moral and political discourse of the time

**The Descent of Ideas**  
 Donald R. Kelley, 2017-09-29 The history of ideas better known these days as intellectual history is a flourishing field of study which has been the object of much controversy but hardly any historical exploration This major new work from Donald R Kelley is the first comprehensive history of intellectual history tracing the study of the history of thought from ancient medieval and early modern times its emergence as the history of ideas in the 18th century and its subsequent expansion The point of departure for this study is the perspective opened up by Victor Cousin in the early 19th century on Eclecticism and its association with the history of philosophy established by Renaissance scholars Kelley considers a broad range of topics including the rivalry between ideas and language the rise of cultural history the contributions of certain 19th and 20th century practitioners of the history of ideas in interdisciplinary areas of philosophy literature and the sciences and finally the current state of intellectual history The central theme of the book is the interplay between the canon of philosophical thought and the tradition of language and textual study the divergence of the latter marking the descent of ideas into the realm of cultural history

**Auguste Comte and John Stuart Mill on Sexual Equality**  
 Vincent Guillin, 2009-08-31 Vincent Guillin uses the issue of sexual equality as a prism through which to examine important differences epistemological methodological and theoretical between Auguste Comte and John Stuart Mill He succeeds in showing how their differing conceptions of science and human nature influence and affect their respective approaches to philosophy and to the analysis of female in equality in particular Guillin shines a bright searchlight into long neglected aspects of both men's thinking for example Mill's proposal to construct an ethology or science of character formation and Comte's seemingly bizarre interest in phrenology and the ways in which these shaped their views of women's intellectual and political capacities Guillin's wide ranging study examines both men's major and minor works their correspondence with one another and the reasons for the final acrimonious break between two of the nineteenth century's most original and important thinkers

**The Science of Pleasure**  
 Harvie Ferguson, 2005-09-29 In this rich and original work the author argues that science is the highest expression of bourgeois thought and whilst it may have liberated mankind it has also devised new forms of repression discipline and control

**Writing History in the Third Republic**  
 Isabel Noronha-DiVanna, 2010-02-19 Writing History in the Third Republic offers new insight to the historiographical output of French historians between 1860 and 1914 a period often referred to as of positivistic historians or the *cole m thodique* Asserting their independence from Germanic influence by emphasising the French element in their work historians in the period described their approach as methodical and positivistic and maintained that this was a distinctively French way of studying history A heightened concern with sources with facts as basis for all true knowledge and with truth itself were unifying elements of the historiography of those historians now called *cole m thodique* The *cole* represented the most sophisticated theoretical considerations about history and a method for historical studies in

French academia in the late nineteenth century The purpose of this book is to reassess whether or not this school is legitimately to be seen as having emerged in the Third Republic in response to political developments of nineteenth century France or if the so called methodiques share more in terms of philosophy of history and methodology than previously emphasized by scholars This book contributes to the debate surrounding the role of history and its method offering a counter argument to postmodernist scholars while reassessing the contribution of twentieth century theorists of history to the history of historiography The Norton History of the Human Sciences Roger Smith,1997 Beginning with the Renaissance s rediscovery of Greek psychology political philosophy and ethics author Roger Smith recounts how the human sciences gradually organized themselves around a scientific conception of psychology and how this trend has continued to the present day in a circle of interactions between science and ordinary life influencing and influenced by popular culture Photos drawings **Herbert Croly of the New Republic** David W.
