European Security and Hybrid Threats Zeynep Arkan,2025-03-21 Hybrid threats have been defined in various ways by different security actors with their scope continuously expanding to encompass emerging insecurities within the evolving security environment As an umbrella term encompassing a wide spectrum of threats with complex and multidimensional features the notion of hybrid threats remains inherently vague and amorphous This lack of clarity presents significant challenges for policymakers who must constantly identify potential dangers anticipate risks and formulate effective responses to safeguard their polities and populations Consequently a persistent sense of insecurity has become a defining characteristic of the current European security landscape This new normal of European security is characterised by a series of un known unknowns that fall under the elusive concept of hybrid threats However rather than accepting this evolving security paradigm at face value this study calls for a critical examination of its underlying assumptions core concepts and broader political implications It argues that the hybrid threat narrative demands a re evaluation of what security means in contemporary Europe and how it is operationalised Moreover the study underscores the expansive nature of the hybrid threat framework which has the potential to include virtually any domain ranging from education and technology to research and public infrastructure thereby contributing to the securitisation of all aspects of social and political life This expansive and ambiguous framing raises important questions about the limits of security and allocation of resources carrying considerable implications for democratic governance in Europe Dr Zeynep Arkan is an Associate Professor of International Relations at Hacettepe University Ankara and a Visiting Fellow at the sterreichisches Institut f r Internationale Politik Vienna She holds a BSc from Middle East Technical University Ankara an MA from Exeter University Exeter and a PhD from the University of Kent Canterbury

New Security Challenges in Postcommunist Europe Andrew Cottey, Derek Averre, 2002 Cubism was the most influential artistic movement that emerged in the twentieth century The hallmarks of its style were stamped on the art design and architecture and its aesthetic principles governed the representation of modernity across all the arts Yet just what cubism was or stood for at the time of its emergence is still in dispute while the explanations offered for its importance for twentieth century art and its legacy for the present are bewildering in their variety This fascinating book offers a way beyond this confusion a narrative of its beginnings consolidation and dissemination that takes into account not only what the style and the movement signified at the time of its emergence but also the principal writings through which cubism's significance for modernism has been established Visually stunning with over 100 illustrations this is an essential work for all students and teachers of modern art history
