defence technology and production *The Economics of European Integration* Willem Molle, 2017-07-12 This title was first published in 2001 As economic integration touches ever more areas of society more and more people are confronted by the bewildering complexity of the functioning of the European Union Rather than merely focusing on the description of EU policies this study of the economics of European integration seeks to select the most relevant aspects and developments place the wide variety of issues in a robust conceptual structure integrate theoretical developments with the results of empirical research and of policy analysis explain the logic of the dynamic processes describe the structural features of the European economy highlight the response of private companies to changes in the regulatory environment depict the historical developments so as to give a sound basis for the understanding of the present situation and the likely future development and set the European developments in the light of global developments In practice Western Europe is the focus of major parts of this book **The Organisation for Economic Co-operation and Development (OECD)** Richard Woodward, 2009-05-08 The Organisation for Economic Co operation and Development OECD is one of the least written about and least understood of our major global institutions This new book builds a well rounded understanding of this crucial though often neglected institution with a range of clearly written chapters that outline its origins and evolution bringing its story fully up to date present a clear framework for understanding the OECD set the institution within the broader context of global governance outline key criticisms and debates evaluate its future prospects Given the immense challenges facing humanity at the start of the 21st century the need for the OECD as a venue where the world s leading states can discuss on an informal and ongoing basis the conundrums of globalization has never been greater The clarity and rigour of these chapters cut through the layers of misunderstanding and misconception that surround the OECD often dismissed as a rich man s club a think tank and a consultative forum This new book dismantles these labels to provide a holistic understanding of the organization This concise and accessible introduction is essential reading for all students of international relations politics and world history and affairs **A European Security Architecture after the Cold War** G. Aybet, 2000-06-05 A European Security Architecture after the Cold War provides a critical account of the re projection and redefinition of Western values and security institutions in the post Coldwar era This transformation is explored in three stages The first stage covers the period 1990 91 and explains the preservation of a western security community inherited from the Cold War through a process of institutional reconstruction largely carried out on paper The second stage from 1991 to 1992 sees the incorporation of a purpose for these institutions as a framework for the implementation of collective security The third stage explores the emerging questions of legitimacy surrounding the new tasks of these institutions as they become embroiled in the war in the former Yugoslavia The precedents of legitimate intervention in upholding democracy free markets and human rights in the post coldwar era are examined from the perspectives of international law and Gramscian derived concepts of legitimacy focusing on the acceptance of military power by civil society and how intervention in these terms becomes a

Decision Making Within International Organisations Bob Reinalda,Bertjan Verbeek,2004-07-31 Following the end of the Cold War and in the context of globalization this book examines the extent to which member states dominate decision making in international organizations and whether non state actors for example non governmental organizations and multinational corporations are influential The authors assess the new patterns of decision making to determine whether they are relatively open or closed privileged networks The organizations examined include the Council of Europe the United Nations the EU G8 the World Trade Organization International Maritime Organizations the World Health Organization and the OECD

Robertson,2013-12-01 **National Political Elites, European Integration and the Eurozone Crisis** Nicolò Conti,Borbála Göncz,José Real-Dato,2018-06-18 The global financial economic and sovereign debt crisis since 2008 has led to increases in political disaffection among citizens a loss of legitimacy of political institutions the discredit of mainstream parties and the rise of extremist or anti system political alternatives This comparative volume sheds greater light on this critical juncture in the recent history of the European Union EU by focusing on the evolution of attitudes of national political elites It examines whether the crisis has affected the legitimacy of the EU integration project as perceived by national political elites and consequently if the elite consensus that constituted one of the most solid fundamentals supporting that project has been eroded Analysing these changes across the different dimensions in which support for the EU is organized and its relationship with the evolution of support towards European integration among citizens in member states the book addresses a basic question How have these events affected the perceptions of the EU of national political elites Ultimately it sheds light on the evolution of the relationship between the perception of the EU and the national contexts as well as the likely evolution of the project of European integration in the near future This book will be of key interest to scholars and students of political elites EU politics European integration political parties and more broadly to comparative politics European studies and sociology

European Yearbook / Annuaire Europeen 1960 Council of Europe/Conseil de L'Europe,1962-01-07 The European Yearbook promotes the scientific study of nineteen European supranational organisations and the OECD Each volume contains a detailed survey of the history structure and yearly activities of each organisation and an up to date chart providing a clear overview of the member states of each organisation *International Institutions and Socialization in Europe* Jeffrey T. Checkel,2007-02-19 Since the path breaking work of Karl Deutsch on security communities and Ernst Haas on European integration it has been clear that international institutions may create senses of community and belonging beyond the nation state Put differently they can socialize Yet the mechanisms underlying such dynamics have been

unclear This volume explores these mechanisms of international community building from a resolutely eclectic stand point Rationalism is thus the social theory of choice for some contributors while others are more comfortable with social constructivism This problem driven perspective and the theoretical bridge building it are the cutting edge in international relations theory By providing more finely grained arguments on precisely how international institutions matter such an approach sheds crucial light on the complex relationship between states and institutions between rational choice and social constructivism and in our case between Europe and the nation state
