Derek Howard Aldcroft,Simon P. Ville,1994 The years between 1750 and 1914 saw the industrial transformation of European

and a fundamental reorientation of its economy This textbook is among the first to eschew country by country analysis of Europe s economic development instead it offers a continent wide thematic analysis of the sectors involved **European Economic History** William I. The Cambridge Economic History of Modern Europe: Volume 2, 1870 to the Present Stephen Broadberry,Kevin H. O'Rourke,2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach The Cambridge Economic History of Modern Europe rethinks Europe s economic history since 1700 as unified and pan European with the material organised by topic rather than by country This second volume tracks Europe s economic history through three major phases since 1870 The first phase was an age of globalization and of European economic and political dominance that lasted until First World War The second from 1914 to 1945 was one of war deglobalization and depression and the third was one of growing integration not only within Europe but also between Europe and the global economy Leading authors offer comprehensive and accessible introductions to these patterns of globalization and deglobalization as well as to key themes in modern economic history such as economic growth business cycles sectoral developments and population and living standards
