and multiculturalism Langiulli's introduction and the contributions place existentialism as a genuine tradition in the history of philosophy. European Existentialism is an invaluable collection for philosophers, educators, and all those interested in the existentialist tradition. Existential America George Cotkin, 2003. As Cotkin shows, not only did Americans readily take to existentialism, but they were already heirs to a rich tradition of thinkers from Jonathan Edwards and Herman Melville to Emily Dickinson and William James, who had wrestled with the problems of existence and the contingency of the world long before Sartre and his colleagues. After introducing the concept of an American existential tradition, Cotkin examines how formal existentialism first arrived in America in the 1930s through discussion of Kierkegaard and the early vogue among New York intellectuals for the works of Sartre, Beauvoir, and Camus.

Decolonizing Existentialism and Phenomenology Jina Fast, 2023-11-15. *Decolonizing Existentialism and Phenomenology* analyzes the history of decolonial existentialist and phenomenological theory in the work of figures such as Simone de Beauvoir, Richard Wright, Franz Fanon, Lewis Gordon, Audre Lorde, Sylvia Wynter, and Jamaica Kincaid in order to reimagine and rewrite the philosophical canon. Phenomenology and existentialism study the structures of consciousness as experienced from the perspective of the subject, yet their methods have been markedly tied to the subjective lived experiences and perspectives of White Europeans and Americans. By centering the experiences of peoples of the African diaspora, gender-marginalized people, and queer peoples of Africa, decolonial existentialist and phenomenologist philosophers in the twentieth and twenty-first centuries have been able to generate new frameworks for understanding structures of meaning and consciousness within oppressive colonial orders, thus challenging histories of existentialism and phenomenology that bracket social markers of identity and experiences of social identity. This text represents a study of the philosophies of scholars that seek to decolonize hegemonic discourses and structures that impede the development of the selves and projects of colonized peoples.

Situating Existentialism Jonathan Judaken, Robert Bernasconi, 2012. This anthology provides a history of the systemization and canonization of existentialism, a quintessentially antisystemic mode of thought. Situating existentialism within the history of ideas, it features new readings on the most influential works in the existential canon, exploring their formative contexts and the cultural dialogues of which they were a part. Emphasizing the multidisciplinary and global nature of existential arguments, the chosen texts relate to philosophy, religion, literature, theater, and culture, and reflect European, Russian, Latin American, African, and American strains of thought. Readings are grouped into three thematic categories: national contexts, existentialism and religion, and transcultural migrations that explore the reception of existentialism. The volume explains how literary giants such as Dostoevsky and Tolstoy were incorporated into the existentialist fold and how inclusion into the canon recast the work of Kierkegaard and Nietzsche, and it describes the roles played by Jaspers and Heidegger in Germany and the Paris School of Existentialism in France. Essays address not only frequently assigned works but also underappreciated discoveries, underscoring their vital relevance to contemporary critical debate. Designed to speak to a new generation's concerns, the collection deploys a diverse

range of voices to interrogate the fundamental questions of the human condition *Cross-Cultural Existentialism* Leah Kalmanson, 2020-09-17 Engaging in existential discourse beyond the European tradition this book turns to Asian philosophies to reassess vital questions of life's purpose death's imminence and our capacity for living meaningfully in conditions of uncertainty Inspired by the dilemmas of European existentialism this cross cultural study seeks concrete techniques for existential practice via the philosophies of East Asia The investigation begins with the provocative writings of twentieth century Korean Buddhist nun Kim Iryop who asserts that meditative concentration conducts a potent energy outward throughout the entire karmic network enabling the radical transformation of our shared existential conditions Understanding her claim requires a look at East Asian sources more broadly Considering practices as diverse as Buddhist merit making ceremonies Confucian Ruist methods for self cultivation the ritual memorization and recitation of texts and Yijing divination the book concludes by advocating a speculative turn This speculative existentialism counters the suspicion toward metaphysics characteristic of twentieth century European existential thought and at the same time advances a program for action It is not a how to guide for living but rather a philosophical methodology that takes seriously the power of mental cultivation to transform the meaning of the life that we share **The A to Z of Existentialism** Stephen

Michelman, 2010-04-01 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre's hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly 20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement **Discovering Black Existentialism** E. The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century Peter E. Gordon, Warren Breckman, 2019-08-29 The Cambridge History of

Modern European Thought is an authoritative and comprehensive exploration of the themes thinkers and movements that shaped our intellectual world in the late eighteenth and nineteenth century. Representing both individual figures and the contexts within which they developed their ideas, each essay is written in a clear accessible style by leading scholars in the field and offers both originality and interpretive insight. This second volume surveys twentieth century European intellectual history conceived as a crisis in modernity. Comprised of twenty one chapters, it focuses on figures such as Freud, Heidegger, Adorno, and Arendt, surveys major schools of thought including Phenomenology, Existentialism, and Conservatism, and discusses critical movements such as Postcolonialism, Structuralism, and Post structuralism. Renouncing a single master narrative of European thought across the period, Peter E. Gordon and Warren Breckman establish a formidable new multi-faceted vision of European intellectual history for the global modern age.

Idealism and Existentialism Jon Stewart, 2010-06-02. The history of Continental philosophy is often conceived as being represented by two major schools: German idealism and phenomenology/existentialism. These two schools are frequently juxtaposed so as to highlight their purported radical differences. There is a commonly held view that an abrupt break occurred in the nineteenth century, resulting in a disdainful rejection of idealism in all its forms. This break is often located in the transition from Hegel to Kierkegaard. The history of philosophy in the first half of the nineteenth century has thus been read as a grand confrontation between the overambitious rationalistic system of Hegel and the devastating criticisms of it by Kierkegaard's philosophy of existence. This work aims to undermine this popular view of the radical break between idealism and existentialism by means of a series of detailed studies in specific episodes of European thought. As a whole, this book represents an important attempt to demonstrate the long shadow cast by Kant and Hegel over the subsequent history of European philosophy.

The Routledge Handbook of Contemporary Existentialism Kevin Aho, Megan Altman, Hans Pedersen, 2024-04-18. Of the philosophical movements of the twentieth century, existentialism is one of the most powerful and thought provoking. Its engagement with the themes of authenticity, freedom, bad faith, nihilism, and the death of God captured the imagination of millions. However, in the twenty-first century, existentialism is grappling with fresh questions and debates that move far beyond traditional existential preoccupations, ranging from the lived experience of the embodied self, intersectionality, and feminist theory to comparative philosophy, digital existentialism, disability studies, and philosophy of race. The Routledge Handbook of Contemporary Existentialism explores these topics and more, connecting the ideas and insights of existentialism with some of the most urgent debates and challenges in philosophy today. Eight clear sections explore the following topics: methodology and technology; social and political perspectives; environment and place; affectivity and emotion; death and freedom; value; existentialism and Asian philosophy; aging and disability. As well as chapters on key figures such as Kierkegaard, Nietzsche, Heidegger, Sartre, and Beauvoir, the Handbook includes chapters on topics as diverse as Chicana feminism, ecophilosophy, and the environment; Latina existentialism; Black nihilism; the Kyoto school; and southeast Asian
