Critical Management Research in Eastern Europe M. Kelemen, M. Kostera, 2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement

Evolution of Italian Enterprises in the 20th Century Renato Giannetti, Michelangelo Vasta, 2009-06-10 During the first two thirds of the 20th century the themes of sectorial structure and compared performance prevail in Italian economic historiography In contrast in the last part of the century attention is focused on the behavior of single economic actors and their micro economic strategies This book intends to act as a bridge between the two approaches and reconstructs the secular journey of Italian industrial enterprise through an original study

Human Resource Management in Europe Chris Brewster, Wolfgang Mayrhofer, Michael

Morley,2004 The essential book for developing and learning about European HR practice **Issues of Human Resource Management** Ladislav Mura,2017-06-07 The book Issues of Human Resource Management written by well known authors is a result of a teamwork of specialists who have been dealing with the issue of managing human resources in different contexts The authors from Germany Spain Turkey Slovakia and Romania have submitted results of their current research and have presented important findings that are becoming a starting point for making managers decision so that their businesses can be competitive You have put your hands on a selection of the best scientific contributions that have been reviewed and now are offering a space for an active debate on partial issues of the given topic The authors in their work examined also the factors of psychology applied in HRM the organisation of companies and its impact on human resource management workers motivation and incentives and investment into human resources development they searched the field of human resource management in family businesses the quality of relationship in a workplace and specifics of human resource management in non governmental organisation **Global Trends in Eastern Europe** Nikolai Genov,2016-04-22 Eastern Europe was once clearly defined by the centralized political and economic organization of the societies in the region They shared the same official ideology and were members of the same alliances After 1989 the region collapsed in an economic political and cultural implosion What were the moving forces of this profound change What are its consequences Could we try to reasonably foresee any future developments In this thought provoking book Nikolai Genov presents a systematic description and explanation of Eastern European societal transformations after 1989 They are interpreted as adaptations to four global trends upgrading the rationality of organizations individualization spreading of instrumental activism and universalization of value normative systems Adaptations to these trends have generally been successful However Genov notes that the process is marked by many failures as well They are mostly caused by path dependency in the societal development and by the varying quality of relevant decisions other destructive developments are due to contradictions in the global trends themselves Guided by the assumption that the societal and supranational integration mechanisms in Eastern Europe before 1989 could not resist the overwhelming power of global trends Genov s controversial findings question visions about the end of history and simultaneously strengthen the confidence that most complex macro social processes can be rationally managed A timely book allowing for a much needed engagement in contemporary debates on the controversial processes in Eastern European transitions East-West Trade United States.
