European Snow Atlas & Guide 2005 Tony Brown, 2004-09 This guide is a unique publication and the only one of its kind in Europe aimed at skiers and snowboarders. It is compiled with the very latest up to date maps making it the essential atlas which can not only be used to locate any one of 500 listed ski resorts in the winter but as an everyday UK European atlas to plan journeys at any time of the year. European Solar Radiation Atlas Wolfgang Palz, J. Greif, Commission of the European Communities (CEC), 2012-12-06 This atlas is a revised and updated version of the European Solar Radiation Atlas published in 1984. The revised version contains tables and maps displaying monthly means of global diffuse and beam solar radiation as well as sunhours for a large number of representative sites in Europe. Tables show radiation on both horizontal and inclined surfaces. The revisions reflect the political developments in the European Union and within neighbouring countries. The presentation of the tables has been improved and additional information is included. An enlarged text section provides an introduction to the systematics of solar radiation measurement and calculation. The solar data presented in this book is a useful source of information for the estimation of the energy harvest potential for solar systems. The data base is provided on two 3 1/2 disks for more ease in computer assisted design work.

Recent Advances in Environmental Science from the Euro-Mediterranean and Surrounding Regions (3rd Edition) Mohamed Ksibi, Abdelazim Negm, Olfa Hentati, Achraf Ghorbal, Arturo Sousa, Jesus Rodrigo-Comino, Sandeep Panda, José Lopes Velho, Ahmed M. El-Kenawy, Nicola Perilli, 2024-05-03 This edited book includes over one hundred and eighty short papers that were presented during the third edition of EMCEI which was held in Sousse, Tunisia, in June 2021. Nowadays, experts as well as most of the general public know that the Mediterranean and surrounding regions are facing environmental degradation that is accelerating at an unprecedented rate. The main causes are the natural and human induced climate change, increasing pollution, urban growth and the overexploitation and unsustainable use of resources due to rapid population growth. The effects are seen in several indicators such as the warming, more frequent extreme events, severe droughts, water shortages, contraction of natural resources, changes in land use and landscape deterioration, decreasing agricultural yields, biodiversity loss, deterioration of the ecosystems, corrosion of the natural coastal environment, sea level rise and ocean acidification. In addition to these more recent issues, the Mediterranean and surrounding region naturally experience a number of hazards such as floods, droughts,

desertification fires catastrophic forest diebacks earthquakes and volcanic eruptions By presenting a wide range of environmental topics and new findings relevant to a variety of problems in these regions this book appeals to anyone working in the subject area and especially students interested in learning more about new developments in environmental research initiatives in light of the worsening environmental degradation of the Mediterranean and surrounding areas making environmental and resource protection an increasingly important issue that impedes sustainable development and social well being The book addresses emerging environmental issues along with new challenges by focusing on innovative approaches that contribute to achieving a sustainable environment in and around the Mediterranean Sea and by highlighting to decision makers from relevant sectors the environmental considerations that should be integrated into their own activities **The**
