European Union Lobbying Changes In The Arena:

European Union Lobbying R. Pedler, 2002-01-30 This book presents 14 case studies of lobbying campaigns recently directed towards influencing policy and decisions in the EU and illustrates the effects of recent wideranging change Treaty revisions have modified the decision making process and balance of power between the EU institutions Company lobbying has changed as cross border mergers have concentrated their activity The balance of power between member state governments and their devolved regions has shifted and the regions are increasingly active players The ability of NGOs to take a recognised part in policy formulation has increased and this change is accelerating The included cases have been selected to illustrate the range of interest groups who lobby and to broaden the coverage of lobbying cases in Europe **EU Lobbying: Empirical and Theoretical Studies** David Coen, 2013-10-31 EU Lobbying Empirical and Theoretical studies offers an analysis of large empirical studies of interest group politics and Lobbying in Europe Recognising the continued European economic integration globalisation and the changing role of the state it observes significant adaptations in interest mobilisation and strategic behaviour This book assesses the logic of collective and direct action the logic of access and influence the logic of venue shopping and alliance building It addresses specific issues such as the emergence of elite pluralism in EU institutions the pump priming of political action by EU institutions and the growing political sophistication of private and public interests in Brussels Through these issues the book explores how interest groups lobby different European institutions along the policy process and how the nature of policy dictates the style and level of lobbying This book was previously published as a special issue of Journal of European Public Policy *Lobbying in the European Parliament* Maja Kluger Dionigi, 2016-12-01 This book explains when and how interest groups are influential in the European Parliament which has become one of the most important lobbying venues in the EU Yet we know little about the many ways in which interest groups and lobbyists influence parliamentary politics The author offers insights on four key cases of lobbying based on the analysis of EU documents lobbying letters and 150 interviews She argues that lobbying success depends on a number of factors most notably the degree of counter lobbying issue salience and committee receptiveness These factors are brought together in the framework of Triple I interests issues and institutions to determine the success or failure of lobbying This book will be of use to students and scholars interested in EU politics and governance EU decision making and interest group politics along with policy makers and practitioners Sustaining Industrial Competitiveness after the Crisis L. Ciravegna, 2012-05-22 Adopting a multi disciplinary approach and using the case of the automotive industry as a starting point this volume discusses how industrial companies can remain competitive in spite of the current economic downturn Local Government in the European Union Marius Guderjan, Tom Verhelst, 2021-09-30 This book addresses the bigger picture of local European relations and adds a new dimension to existing studies on multilevel governance and the Europeanisation of local government Drawing from a combination of European integration theories and operational

approaches it introduces the idea of an integration cycle in which local government responds to the top down impact of the EU internally horizontally and vertically This volume presents a wide range of empirical examples to demonstrate how local authorities across Europe have changed their practices orientation and preferences and adapted their institutions and organisation Not only do cities towns and counties cooperate with each other across borders and through transnational networks and partnerships but by mobilising formally and informally local actors participate in and influence European governance and contribute to the future trajectories of European integration thereby completing the integration cycle

Globalisation and EU Policy-making Ian Bartle,2005 Assesses and contrasts the roles of globalisation institutions and ideas on policy

making in the EU Views the creation of liberalised European single markets in the telecommunications and electricity supply sectors out of national monopolies as an example of the dramatic transformation of economic organisation across Europe in the last twenty years Connects micro policy making processes in two industrial sectors to macro international political economy Covers the period from the mid 1980s when the single market came on the agenda through the liberalising initiatives in the 1990s to the new regulatory framework in communications in 2002 and the 2003 directive on the full liberalisation of electricity by 2007 Will be of interest to anyone studying globalisation European integration and policy making regulation and policy in utility sectors Handbook of Public Affairs Phil Harris,Craig S Fleisher,2005-07-15

Drawing on the expertise of leading figures in the field this handbook provides an overview of public affairs and government relations for students CEOs association executives politicians lobbyists and business managers Interest Group Politics in Europe Jan Beyers,Rainer Eising,William A. Maloney,2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link states with citizens institutionalize the resolution of social conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks Consequently a not always complementary and fragmented series of findings has emerged This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been omitted from research programs and that ought to be part of future studies Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance This book was published as a special issue of West European Politics

Civil Society and Governance in Europe William A. Maloney,Jan W. Van Deth,2008-01-01 The research presented in this book based on new primary data demonstrates that in terms of civil society actors adapting to the European political space the Europeanization process has an uneven development This innovative book integrates top down approaches for the study of relationships within the developing EU multilevel system i e the consequences of Europeanization for civil society at the local level and bottom up approaches i e the consequences of civil society for the process of European integration and democracy in the EU The contributors argue that exploration of these recursive linkages requires a rethinking of the relationships between local national and trans national civil society on the one hand and multi level governance on the other In analyzing the opportunities for civil society associations to contribute to European integration and decision making from various perspectives the following findings are presented amongst others engagement with and confidence in the EU

compared to national institutions is relatively weak among associational members party elites play a key gatekeeper role in the European space the EU and interest groups have had limited success in stimulating the development of citizen engagement civil society and social capital in various countries In the rapidly expanding field of research on democratic decision making in Europe this book will be welcomed by academics and scholars alike at postgraduate levels and above Experts working in the field of European decision making such as lawyers and lobbyists who are looking for conclusions based on high quality empirical research will also find much in this book to engage them
