Euthanasia And Law In The Netherlands:

Euthanasia and Law in the Netherlands John Griffiths, Alex Bood, Heleen Weyers, 1998 The Netherlands is the only country in the world in which euthanasia under narrow defined circumstances is legally permissible Considerable attention has been paid over a number of years to the problem of regulating it and information has been systematically collected concerning actual practice Therefore the Dutch experience is of interest not only to the Dutch but to anyone who is considering whether or not to make euthanasia a legal practice This book is written for a reader without specific knowledge of law The central focus of the book is on Dutch law pertaining to euthanasia but it also considers the moral and legal principles that have played a role in the Dutch debate the available evidence bearing on actual practice and on the effectiveness of legal control It ends with some reflections on the problem of the slippery slope and the question whether the Dutch experience is exportable It includes translations of the relevant legislation including proposed reforms and of three leading cases

Euthanasia in the Netherlands R. Cohen-Almagor, 2008-04-08 The Dutch experience has influenced the debate on euthanasia and death with dignity around the globe especially with regard to whether physician assisted suicide and euthanasia should be legitimized or legalized A review of the literature reveals complex and often contradictory views about the Dutch experience Some claim that the Netherlands offers a model for the world to follow others believe that the Netherlands represents danger rather than promise and that the Dutch experience is the definitive answer regarding why we should not make active euthanasia and physician assisted suicide part of our lives Given these contradictory views it has become clear that fieldwork is essential to developing a more informed opinion Having investigated the Dutch experience for a number of years and after thoroughly reading the vast literature published in English I went to the Netherlands for one month in the summer of 1999 to get a feel for the local situation I felt that this would provide the basis on which I could better interpret the findings of the available literature I visited the major centers of medical ethics as well as some research hospitals and spoke with leading figures in the euthanasia policy and practice The time spent was extremely beneficial and enriching I followed in the footsteps of Carlos Gomez who published a book following one month of extensive research in the Netherlands

Tolerance : Experiments with Freedom in the Netherlands Cees Maris, 2018-08-27 This book presents a collection of philosophical essays on freedom and tolerance in the Netherlands It explores liberal freedom and its limits in areas such as freedom of speech public reason sexual morality euthanasia drugs policy and minority rights The book takes Dutch practices as exemplary test cases for the principled discussions on these subjects from the perspective of political liberalism Indeed the Netherlands may be viewed as a social laboratory in human tolerance During the Cultural Revolution of the 1960s Holland took the lead in a global emancipation process towards a society based on equal freedom It was the first country to legalize euthanasia soft drugs and gay marriage In the final sections the book examines the question of whether the political murders on the politician Pim Fortuyn and the film director Theo van Gogh the reactions to Ayaan Hirsi Ali's film

Submission as well as the success of the populist politician Geert Wilders are signs of the end of Dutch tolerance Although it recognizes that the political climate has taken a conservative turn the book shows that the Netherlands still shows remarkable tolerance *International Perspectives on End-of-Life Law Reform* Ben P. White,Lindy Willmott,2021-12-09 Much has been written about whether end of life law should change and what that law should be However the barriers and facilitators of such changes law reform perspectives have been virtually ignored Why do so many attempts to change the law fail but others are successful *International Perspectives on End of Life Law Reform* aims to address this question by drawing on ten case studies of end of life law reform from the United Kingdom the United States Canada the Netherlands Belgium and Australia Written by leading end of life scholars the book s chapters blend perspectives from law medicine bioethics and sociology to examine sustained reform efforts to permit assisted dying and change the law about withholding and withdrawing life sustaining treatment Findings from this book shed light not only on changing end of life law but provide insight more generally into how and why law reform succeeds in complex and controversial social policy areas
