Evaluating the Organizational Impact of Health Care Information Systems James G. Anderson, Carolyn Aydin, 2005-10-07 Innovative 2nd edition heavily updated and revised from the 1st edition Introduction to various survey and evaluation methods involving IT systems in the healthcare setting Critical overview of current research in health and social sciences Emphasizes multi method approach to system evaluation Includes instruments suitable for research and evaluation Discusses computer programs for data analysis and evaluation resources Essential reference for anyone involved in planning developing implementing utilizing evaluating or studying computer based health care systems

Handbook of Evaluation Methods for Health Informatics Jytte Brender McNair, 2006-01-17 The Handbook of Evaluation Methods for Health Informatics provides a complete compendium of methods for evaluation of IT based systems and solutions within healthcare Emphasis is entirely on assessment of the IT system within its organizational environment The

author provides a coherent and complete assessment of methods addressing interactions with and effects of technology at the organizational psychological and social levels It offers an explanation of the terminology and theoretical foundations underlying the methodological analysis presented here The author carefully guides the reader through the process of identifying relevant methods corresponding to specific information needs and conditions for carrying out the evaluation study The Handbook takes a critical view by focusing on assumptions for application tacit built in perspectives of the methods as well as their perils and pitfalls Collects a number of evaluation methods of medical informatics Addresses metrics and measures Includes an extensive list of annotated references case studies and a list of useful Web sites Mobile Computer Usability Gamel O. Wiredu, 2013-11-19 This book explains how mobile computer usability is shaped by the increasing integration of personal circumstances in organization It represents an attempt to conceptualize an alternative model of mobile computer usability It is motivated by the author's conviction that we do not yet have an adequate understanding of this concept because we have not taken seriously the transformation of human personality by the co evolution of organization and ICTs The author argues that the transformation has resulted in a human personality whose personal and organizational activities are characterized by strong continuities between them This characterization reflects a new kind of personality of the worker and is a critical determinant of mobile computer usability The word organizational is used to describe this kind of personality hence an alternative organizational personality perspective on mobile computer usability This perspective suggests that a mobile computer is more usable to a person than another one because of its satisfaction of both his personal and organizational motives which are in turn shaped by the co evolution of organization technology and personality

Ethics, Computing, and Medicine Kenneth W. Goodman, 1998 New technology always raises compelling ethical questions As those in medicine increasingly depend on computers and other intelligent machines the intersection of ethics computing and the health professions grows much more complex and significant This book attempts systematically to identify and address the full range of ethical issues that arise when intelligent machines are used in medicine nursing psychology and allied health professions It maps and explores a variety of important issues and controversies including ethics and evaluation in computational medicine patient and provider confidentiality responsibility for use of computers in medicine appropriate use of decision support systems outcomes of research and computational prognosis including mortality predictions and computer based biomedical research especially meta analysis This book is accessible to participants in the fields of bioethics and medical informatics It is appropriate for physicians nurses administrators ethicists health attorneys advanced undergraduates and graduate students **Simulation-based Medical Training** Erik Löfvquist, 2011-05-25 This volume explores the development process of a Virtual Reality VR and web based medical training system from a user centred perspective It highlights the importance of user participation in this context by analysing two case studies concerned with the development of a VR and web based medical training system for Spinal Anaesthesia It illustrates the relationship between

user participation and the development process of a VR and web based medical training system User groups along with their input and degrees of participation and influence are classified It shows how a democratic arrangement between users and developers is beneficial and maybe even mandatory in order to utilise the users guidance efficiently In this arrangement the use of prototypes is instrumental in bridging the expertise and knowledge gap between users and developers Reading this volume may aid other research teams developing VR and web based medical training systems in deciding if why and how to involve relevant user groups in the overall development process
