## **Evaluating Information A Guide For Users Of Social Science Research Second Edition:**

*Evaluating Information* Jeffrey Katzner, Kenneth H. Cook, Wayne W. Crouch, 1978 This book introduces students to social science research from the consumer's point of view. The authors believe that while social science may not require that every student of the discipline will have to conduct research studies it is still essential for students to successfully read, understand, and evaluate the research published in their field. To that end, the authors of this text have streamlined their narrative, omitting the burden of technical jargon and focusing on the broad elements common to all kinds of social science research, such as experimental survey and case study. Questions to Ask, found at the end of each chapter, highlight the specific criteria to consider when evaluating research and offer a clear and accessible presentation of the general principles in social science research.

**Secondary Research** David W. Stewart, Michael A. Kamins, 1993 Celebrated in its first edition as an indispensable guide, *Secondary Research* has been revised to provide the latest information on computer-based storage and retrieval systems. This volume was originally designed to help locate and obtain secondary sources as well as evaluate and integrate the information from the various sources in order to answer specific research questions. The new edition features expanded coverage of computer-based information, including a new chapter on CD Rom products and updated coverage of online information search services. In addition, this volume includes beneficial material on how to conduct secondary analysis of specific sources such as commercial and government sources, including the 1990 U.S. Census and examples of information searches. A must read for anyone: professionals, researchers, professors, and students in the areas of research methods, evaluation, management, psychology, and sociology.

**GAO Review**, 1985 *Discovery and the Use of Quantitative Data* Barbara Harrison Linden, 1982 **Qualitative Research & Evaluation Methods** Michael Quinn Patton, 2014-10-29 Drawing on more than 40 years of experience conducting applied social science research and program evaluation, author Michael Quinn Patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods, inquiry frameworks, and analysis options available today. Now offering more balance between applied research and evaluation, this Fourth Edition illuminates all aspects of qualitative inquiry through new examples, stories, and cartoons; more than a hundred new summarizing and synthesizing exhibits; and a wide range of new highlight sections, sidebars that elaborate on important and emergent issues. For the first time, full case studies are included to illustrate extended research and evaluation examples. In addition, each chapter features an extended rumination written in a voice and style more emphatic and engaging than traditional textbook style about a core issue of persistent debate and controversy.

*Resources for Nursing Research* Cynthia G. L. Clamp, Marie P. Ballard, Stephen Gough, 1994 *Social Working* Gerald A. J. De Montigny, 1995-01-01 de Montigny uses the tension between his experience of growing up working class and the difficult process of becoming a social worker to explore the practical activities professionals use to secure organizational power and authority over clients.
