The first part brings together chapters dedicated to the following micro organizational variables: Job Crafting, reactions to organizational change, Psychological Wellbeing at Work, Bridge Employment, Assessment in the Work Retirement Transition, Resilience at Work, and Leadership in Organizations. The second part presents the state of the art of research on the following macro organizational constructs: Quality of Life at Work, Organizational Climate for Creativity, Values and Organizations, Assessments of Organizational Support and Contributions by Social Networks, Analysis and Organizational Effectiveness. The last chapter presents a critical discussion about the nature and future of organization behavior measuring. **Assessing Organizational Behaviors: A Critical Analysis of Measuring Instruments** is intended to help market professionals select the diagnostic instruments that best fit into their organizational reality in order to correctly assess organizational behavior.
