Evaluating With Validity:

Evaluating with Validity Ernest R. House, 2010-11-01 This reissued book is one of the key works that influenced and shaped the contemporary evaluation field. The book developed a new expanded conception of the validity of evaluation studies based on broad criteria of truth, beauty, and justice. It also presented a widely used typology of evaluation approaches and critiqued these approaches with the validity criteria. Its long-term influence is demonstrated by the book published in 1980 and criteria being prominently featured in the overall theme for the forthcoming American Evaluation Association's annual conference in November 2010.

Revisiting Truth, Beauty, and Justice: Evaluating With Validity in the 21st Century James C. Griffith, Bianca Montrosse-Moorhead, 2014-06-30 This issue discusses ways of constructing, organizing, and managing arguments for evaluation. Not focused solely on the logic of evaluation or predictive validity, it discusses the various elements needed to construct evaluation arguments that are compelling and influential by virtue of the truth, beauty, and justice they express. Through exposition, original research, critical reflection, and application to case examples, the authors present tools, perspectives, and guides to help evaluators navigate the complex contexts of evaluation in the 21st century. This is the 142nd issue in the *New Directions for Evaluation* series from Jossey-Bass. It is an official publication of the American Evaluation Association.

Evaluating Program Effectiveness Marc T. Braverman, 2022-10-24 The book shows how to apply validity concepts when planning and conducting an evaluation, thereby making sure that the evaluation stays true to the purposes for which it was initiated. Marc T. Braverman demonstrates that evaluating with validity means being able to answer the evaluation questions in a way that is useful, accurate, and reflective of the information needed from the evaluation. His approach is practical, with the goal of helping evaluators to conduct high-quality outcome evaluations, and he illustrates concepts with case study examples drawn from studies of intervention effectiveness over many years. The book begins by looking at the ways that validity is conceptualized and the uses to which it is put. Subsequent chapters analyze separate phases of the outcome evaluation process and the critical decisions about design and analysis that are typically required.
