Evaluation And Accountability In Clinical Training:

Evaluation and Accountability in Clinical Training E. Berler, Barry A. Edelstein, 2012-03-30 Accountability in clinical training implies a strong relationship between the training outcomes touted by a training program and the performance of its graduates The training program and its faculty must be able to ensure that students have the competencies necessary for entering the profession and can offer competent services In addition responsibility for the quality and value of training must be assumed by the profession Pressure for accountability is becoming increasingly apparent as the public learns about fraud waste and abuse in publicly funded programs Fishman Neigher 1982 Federally supported clinical training programs have had to defend their training practices against threats of funding loss without the hard data needed to support their practices Funding seems to have been forthcoming mostly because of our ability to demonstrate the need for clinical counseling and school psychologists Graduates seeking professional careers in such applied fields demand considerable trust from their clientele and the public at large when they establish themselves offer and advertise their services make claims on public monies and profess to do good and no harm Neither their clientele nor the public are in the position to evaluate the services of the profession or the claims made for these American Psychological Association IAPA 1982 p

International Handbook of Behavior Modification and Therapy Alan S. Bellack, Michel Hersen, Alan E. Kazdin, 2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision

could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders
