**Event Horizon** Eric Mendoza, 2020-04-15 When the Event Horizon a spacecraft that vanished years earlier suddenly reappears a team is dispatched to investigate the ship Accompanied by the Event Horizon s creator William Weir Sam Neill the crew of the Lewis and Clark led by Capt Miller Laurence Fishburne begins to explore the seemingly abandoned vessel However it soon becomes evident that something sinister resides in its corridors and that the horrors that befell the Event Horizon s previous journey are still present **Event Horizon** Steven McDonald, 1997-07-02 2046 A D Seven years ago an experimental space vessel disappeared under mysterious circumstances Now the ship has been found orbiting Neptune When a salvage team is sent to investigate they encounter the ultimate horror that lurks behind the Event Horizon Paramount s major motion picture will be released in August and stars Sam Neill Laurence Fishburne Kathleen Quinlan Richard T Jones and Joely Richardson **From the Big Bang to the Big Crunch and Everything in Between** Vlad Van

Rosenthal, 2011-10-07 In our passionate curiosity to unravel the mysteries of the world life and the universe humans have contrived numerous theories both scientific and religious with each claiming more relevance than the last Despite all of these influential postulates however the real truth remains obscured to us as it likely will until the moment of our eventual extinction In *From the Big Bang to the Big Crunch and Everything in Between A Simplified Look at a Not So Simple Universe* Dr Vlad Van Rosenthal explores the subjects made complex by science and religion those concerning our planet our solar system and our civilization Van Rosenthal s compelling and accessible style introduces us to the fundamental explanations of the origin and future of our universe and of human life From the cataclysmic explosion at the beginning to the one at the end either from asteroids colliding with the earth the nuclear explosion of nearby stars or the fatal swelling of our own sun we are a unique species on an unique planet that has most likely seen numerous civilizations and will hopefully see many more We are all invited to form and debate our own perspectives on the earth time and space for we are truly beholden to no one s mind but our own [Sixteenth Marcel Grossmann Meeting, The: On Recent Developments In Theoretical And Experimental](#)

[General Relativity, Astrophysics, And Relativistic Field Theories - Proceedings Of The Mg16 Meeting On General Relativity \(In 4 Volumes\)](#) Remo Ruffini, Gregory Vereshchagin, 2022-12-15 The proceedings of MG16 give a broad view of all aspects of gravitational physics and astrophysics from mathematical issues to recent observations and experiments The scientific program of the meeting included 46 plenary presentations 3 public lectures 5 round tables and 81 parallel sessions arranged during the intense six day online meeting All talks were recorded and are available on the ICRANet YouTube channel at the following link [www.icranet.org/video\\_mg16](http://www.icranet.org/video_mg16) These proceedings are a representative sample of the very many contributions made at the meeting They contain 383 papers among which 14 come from the plenary sessions The material represented in these proceedings cover the following topics accretion active galactic nuclei alternative theories of gravity black holes theory observations and experiments binaries boson stars cosmic microwave background cosmic strings dark energy and large scale

structure dark matter education exact solutions early universe fundamental interactions and stellar evolution fast transients gravitational waves high energy physics history of relativity neutron stars precision tests quantum gravity strong fields and white dwarf all of them represented by a large number of contributions The online e proceedings are published in an open access format

**Decoding the Message of the Pulsars** Paul A. LaViolette, 2006-04-21 Paul LaViolette's 25 years of research into the precisely timed radio pulses from extraterrestrial sources known as pulsars shows that they are distributed in the sky in a nonrandom fashion often marking key galactic locations and that their signals are of intelligent origin warning about a past galactic core explosion that could recur in the near future

**Faster than Light** Robert J. Nemiroff, 2023-09-09 Albert Einstein knew already in the early 1900s when he first published his famous paper about the constancy of the speed of light that not only did this constancy imply that mass contains energy  $E = mc^2$  but that faster than light motion could lead to paradoxes some that seemed to involve backwards time travel What are these paradoxes Why is light and its speed relevant This book will lead you through an obstacle course of conundrums and oddities building up your understanding of how light's speed creates simple but mind expanding paradoxes one conceptual riddle at a time This is not your average popular science book This is also not a textbook This book takes one theme the universally constant speed of light and shows how it may appear compromised on scales from the quantum mechanics of the very small to the cosmology of the very large and the resulting surprising implications can result

Book Review 1 Imagine embarking on a journey to comprehend the physics of the entire universe with a guide who's not only an expert but makes the concepts digestible and entertaining Robert J Nemiroff offers such a journey in *Faster Than Light* a book that initially describes the speed of light then touches on subjects as esoteric as time travel using the theory of relativity and speculation on how to send information back in time among other subjects

blue ink Book Review 2 takes readers on a wild ride through the ins and outs of the speed of light in this mind bending guide His primary approach is through a series of humorous thought experiments explanations are clear and concise and most of them require only logic to sort out making the book more accessible than similar titles

Booklife Book Review 3 A fresh and joyous ride through the mind bending puzzles at the heart of nature's most fundamental speed that remind us that the universe is strange beyond belief

**Quantum gravity without trouble** René Friedrich, 2024-06-06 A large panorama of innovative suggestions and ideas for people interested in physics Instead of complex theories and mathematical speculation direct possibilities of pertinent simplification are shown so that general relativity including quantum gravity is becoming accessible to a large audience Prior knowledge of special relativity is recommended but an overview is provided in the introduction

Contents Special relativity briefly The nature of time The mistaken assumption of a spacetime manifold Quantum gravity by elimination of spacetime Black holes the infinity at the event horizon Gravitational attraction and repulsion Understanding the wave particle duality of light

**Meaning,**

**Language, and Time** Kevin J. Porter,2006-03-11 Given the history of concepts like meaning time language and discourse any serious attempt to understand them must be interdisciplinary so MEANING LANGUAGE AND TIME draws on a wide range of important work in the history of philosophy rhetoric and composition In this groundbreaking work Porter joins these conversations with the aim of breaching the traditional disciplinary walls and opening new areas of inquiry Numerical Relativity Masaru Shibata,2015-11-05 This book is composed of two parts First part describes basics in numerical relativity that is the formulations and methods for a solution of Einstein s equation and general relativistic matter field equations This part will be helpful for beginners of numerical relativity who would like to understand the content of numerical relativity and its background The second part focuses on the application of numerical relativity A wide variety of scientific numerical results are introduced focusing in particular on the merger of binary neutron stars and black holes **THE UNIVERSE:RE-EXPLAINED** RITUPARN SHUKLA,2012-09-07 this major book open all secrets of the universe many cosmologist believe that there was a big bang but this book says no this the major book which covers topic from beginning to end of universe **Bang to Eternity and Betwixt** John Hussey,2014-07-31 Covering the Cosmos from before the Big Bang through to the creation of our universe and up to but not including our arrival on stage our will is not yet imposed we had no hand act nor part in its provisions beyond investigating to understand what has been delivered us The many aspects of the Cosmos are melded in a headline driven style to paint a cohesive picture as well as allowing the reader choose to delve further where they may choose to paint their personal picture Cosmos includes The creation mechanism for our Universe and why there exists a possible Multiverse The creation mechanisms of the galaxies with their diversity of Star types The space exploration of our Solar System The Earth and Moon from their birth to their life driving engines for our planet The evolutionary processes that led to our arrival on the planet Our natural world with its great events Documentary video links on all topics of the book are included The story is factual in manner in the proper tradition of reporting no personal opinions are expressed The life stories of the standout personalities in text and video without whom what is now known could not have been unraveled in the case of Cosmos they are Galileo Galilei Isaac Newton Albert Einstein Charles Darwin This is a Video Book vBook beyond its text there are 150 video titles 100 viewing hours downloaded and stored locally on your computer to be able to watch anytime offline without the need for local internet connection Google Cosmos and you get about 27 800 000 search results so over these last several years I ve searched out the best documentary videos with their hyperlinks included here blending their content to report cohesively supplementing where appropriate from Wikipedia and also include those hyperlinks for readers wanting to delve further The List of Contents runs to 6 levels to provide a form of map to the reader as the reporting sequence is not a mere chronology of Cosmic events it delves as necessary into the stories as to how the events became understood to us There is a 7th level hyperlinked at its base which brings further background content from Wikipedia to those who choose to read further into any of the topics The Index allows navigation for the reader who has

**Spacecraft for Astronomy** Joseph A. Angelo, 2014-05-14 Presents a history of astronomical instruments such as space telescopes and probes as well as related scientific concepts and brief biographies of important individuals

**Understanding Relativity** Wouter Schmitz, 2022-12-17 This book bridges the huge gap between popular science and mathematical treatments of Einstein s theories It explains special and general relativity gravity black holes and gravitational waves also presenting current ideas about dark matter and dark energy The explanations are entirely non mathematical using many color pictures and clear concepts In this way the reader is led to a much deeper understanding than any popular science book can provide The author has written this book for everyone who wants to go beyond superficial descriptions of relativity s remarkable phenomena but is not equipped to read the professional literature and complicated math behind the theory By providing a complete description in terms of concepts and pictures the book answers many questions about why the theory works as it does For example it explains why and how momentum and pressure are related to gravity why and how mass causes spacetime to curve and how curvature tells objects how to move it also reveals the origin of the ring seen around the first ever image of a black hole Not least the reader will learn in detail how gravitational waves are produced and measured Since their conception the theories of relativity have appealed to the public s imagination Thanks to this book readers now have the opportunity to convert their fascination with the topic to a deep understanding

*Springer Handbook of Spacetime* Abhay Ashtekar, Vesselin Petkov, 2014-09-01 The Springer Handbook of Spacetime is dedicated to the ground breaking paradigm shifts embodied in the two relativity theories and describes in detail the profound reshaping of physical sciences they ushered in It includes in a single volume chapters on foundations on the underlying mathematics on physical and astrophysical implications experimental evidence and cosmological predictions as well as chapters on efforts to unify general relativity and quantum physics The Handbook can be used as a desk reference by researchers in a wide variety of fields not only by specialists in relativity but also by researchers in related areas that either grew out of or are deeply

influenced by the two relativity theories cosmology astronomy and astrophysics high energy physics quantum field theory mathematics and philosophy of science It should also serve as a valuable resource for graduate students and young researchers entering these areas and for instructors who teach courses on these subjects The Handbook is divided into six parts Part A Introduction to Spacetime Structure Part B Foundational Issues Part C Spacetime Structure and Mathematics Part D Confronting Relativity theories with observations Part E General relativity and the universe Part F Spacetime beyond Einstein
