Georges Louis de Buffon an aristocratic polymath and keeper of France's royal garden viewed life as a dynamic swirl of complexities Each began his task believing it to be difficult but not impossible How could the planet possibly hold more than a few thousand species or as many could fit on Noah's Ark Both fell far short of their goal but in the process they articulated starkly divergent views on nature the future of the Earth and humanity itself Linnaeus gave the world such concepts as mammal primate and Homo sapiens but he also denied that species change and he promulgated racist pseudoscience Buffon formulated early prototypes of evolution and genetics warned of global climate change and argued passionately against prejudice The clash of their conflicting worldviews continued well after their deaths as their successors contended for dominance in the emerging science that came to be called biology In *Every Living Thing* Jason Roberts weaves a sweeping unforgettable narrative spell exploring the intertwined lives and legacies of Linnaeus and Buffon as well as the groundbreaking often fatal adventures of their acolytes to trace an arc of insight and discovery that extends across three centuries into the present day

Every Living Thing James Herriot, 2011-11-15 The 1 New York Times bestselling author of *All Creatures Great and Small* reflects on the rewards of training the next generation of veterinarians As an aging James Herriot begins to see more house pets than livestock the challenge of treating animals and reassuring their owners provides plenty of excitement mystery and moments of sheer delight After building up his own practice the renowned country vet begins to teach a new generation about a business both old fashioned and very modern He watches with pride as his own children show a knack for medicine and remarks on the talents and quirks of a string of assistants There is no perfecting the craft since people and their animals are all remarkably different but Herriot proves that the best healers are also the most compassionate

The Electricity of Every Living Thing Katherine May, 2021-10-26 The New York Times bestselling author of *Wintering* writes a life affirming exploration of wild landscapes what it means to be different and above all how we can all learn to make peace with our own unquiet minds In anticipation of her 38th birthday Katherine May set out to walk the 630 mile South West Coast Path She wanted time alone in nature to understand why she had stopped coping with everyday life why motherhood had been so

overwhelming and isolating and why the world felt full of expectations she couldn't meet. She was also reeling from a chance encounter with a voice on the radio that sparked her realisation that she might be autistic. And so begins a trek along the ruggedly beautiful but difficult path by the sea that takes readers through the alternately frustrating, funny and enlightening experience of re-awakening to the world around us. *The Electricity of Every Living Thing* sees Katherine come to terms with that diagnosis, leading her to re-evaluate her life so far with a much kinder, more forgiving eye. We bear witness to a new understanding that finally allows her to be different rather than simply awkward, arrogant or unfeeling. The physical and psychological journeys of this joyous and inspiring book become inextricably entwined, and as Katherine finds her way across the untameable coast, we learn alongside her how to find our way back to our own true selves. *The Desire of Every Living Thing* Don Gillmor, 2011-08-24. At the age of eighty, Don Gillmor's grandmother let slip the defining secret of her life: her twin sister Jean was not her twin but her aunt, and her family had emigrated from Scotland to Winnipeg to escape the stigma of her illegitimacy. That revelation set Gillmor off on what seemed at first like the most personal of quests to track down his ancestors. *The Desire of Every Living Thing* is also the story of the New World, the story of Winnipeg, the story of this country. Both an evocative family memoir and a brilliant feat of historical imagination, the book's most moving theme is how the discarded past haunts and shapes our lives without us even noticing. *Every Living Thing* James Herriot, 2005-11-15. Veterinarian Herriot continues his delightful recollections of his work among the animals and people of the Yorkshire Dales in the 1950s. Lectures on the Pentateuch and the Moabite stone John William Colenso, 1873. These lectures are intended to lay before English readers who cannot devote the time and thought needed for the study of larger and more technical works the most important results of the criticism of the Pentateuch and incidentally of other portions of the Hebrew scriptures.
