European Economic Prehistory A New Approach:

European Economic Prehistory Robin Dennell,1983 **New Approaches to the Study of Religion** Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 The Pleistocene Old World Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually un touched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole c nstructs of functioning so ciocuhural entities This volume presents our current state of knowledge about a variety of regional adaptations that characterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider the behavior of humans rather than that of objects or features and present data and models for various aspects of past cultures and for culture change These presentations integrate findings and understandings derived from a number of related disciplines actively involved in researching the past Data and interpretations are offered on a range of Old yorld regions during the Paleolithic induding Africa Asia Australia and Europe and chronological coverage spans from the Early to Late Prehistory at Cambridge and Beyond Grahame Clark, 1989-08-25 Grahame Clark s book examines the Pleisto cene development of prehistoric archaeology at Cambridge and the achievements of its graduates placing this theme against the background of the growth of archaeology as an academic discipline worldwide Prehistory in Cambridge began to be taught formally in 1920 and emerged as a full tripos soon after the Second World War From the outset it focused on the aims and methods of archaeological research providing in addition for combinations of study options ranging from early prehistory to the archaeology of the major civilisations of the Old World and the protohistory of Northern Europe The measure of its success is shown by the achievement of Cambridge graduates at home and overseas in both the study and the field A significant outcome of their work has been the widespread recognition of archaeology as a subject of broad educational value not merely for undergraduates but for human beings the world over <u>Dwelling</u> Philip Tonner, 2017-08-03 Dwelling Heidegger Archaeology Mortality negotiates the discourses of phenomenology archaeology and palaeoanthropology in order to extend the dwelling perspective an approach in the social sciences particularly associated with Tim Ingold and a number of other thinkers including Chris Tilley Julian Thomas Chris Gosden and Clive Gamble that developed out of an engagement with the thought of Martin Heidegger This unique book deals with Heidegger's philosophy as it has been explored in archaeology and anthropology seeking to expand its cross disciplinary engagement into accounts of early humans and death awareness Tonner reads Heidegger's thought of dwelling in connection to recent developments in the archaeology of

Perspectives on the Past Geoffrey A. Clark, 2017-11-15 Perspectives on the Past shows how knowledge of the past is contingent and is largely determined by the social and intellectual milieu in which those who study it have received their training In the original essays that comprise the volume field archaeologists discuss their own biases and the effects these biases have on the way they conduct their research on hunter gatherers in the Mediterranean Southern Asia. Australia, and the Search for Human Origins Robin Dennell, Martin Porr, 2014-02-24 This is the first book to focus on the role of Southern Asia and Australia in our understanding of modern human origins and the expansion of Homo sapiens between East Africa and Australia before 30 000 years ago With contributions from leading experts that take into account the latest archaeological evidence from India and Southeast Asia this volume critically reviews current models of the timing and character of the spread of modern humans out of Africa It also demonstrates that the evidence from Australasia should receive much wider and more serious consideration in its own right if we want to understand how our species achieved its global distribution Critically examining the Out of Africa model this book emphasises the context and variability of the global evidence in the search for human origins **The Oxford Handbook of Neolithic Europe** Chris Fowler, Jan Harding, Daniela Hofmann, 2015-03-26 The Neolithic a period in which the first sedentary agrarian communities were established across much of Europe has been a key topic of archaeological research for over a century However the variety of evidence across Europe the range of languages in which research is carried out and the way research traditions in different countries have developed makes it very difficult for both students and specialists to gain an overview of continent wide trends The Oxford Handbook of Neolithic Europe provides the first comprehensive geographically extensive thematic overview of the European Neolithic from Iberia to Russia and from Norway to Malta offering both a general introduction and a clear exploration of key issues and current debates surrounding evidence and interpretation Chapters written by leading experts in the field examine topics such as the movement of plants animals ideas and people including recent trends in the application of genetics and isotope analyses cultural change from the first appearance of farming to the first metal artefacts

domestic architecture subsistence material culture monuments and burial and other treatments of the dead In doing so the volume also considers the history of research and sets out agendas and themes for future work in the field Maps of Time David Christian, 2011-09 Introducing a novel perspective on the study of history David Christian views the interaction of the natural world with the more recent arrivals in flora fauna including human beings *Late Stone Age Hunters of the British* Isles Christopher Smith, 2002-09-09 For 7 000 years after the last ice age the people of the British Isles subsisted by hunting wild game and gathering fruits of the forest and foreshore Belonging to the late Upper Palaelithic and Mesolithic periods these hunter gatherers have hitherto been viewed mainly in terms of stone tool typologies late Stone Age Hunters of the British Isles departs from this conventional approach reassessing the archaeological evidence and placing it within a wider ecological and geographical context This well illustrated study which includes case studies maps and photographs provides a balanced approach to the study of a period that demands multi disciplinary treatment It outlines a range of considerations that have a bearing on the study of early societies in the British Isles and also forms a useful guide to communities themselves as represented by known archaeological sites Chronology and Evolution within the Mesolithic of North-West Europe Philippe Crombé, Joris Sergant, Mark Van Strydonck, 2020-06-12 Since its development in 1949 radiocarbon dating has increasingly been used in prehistoric research in order to get a better grip on the chronology of sites cultures and environmental changes Refinement of the dating sampling and calibration methods has continuously created new and challenging perspectives for absolute dating In these proceedings the focus lies on the contribution of carbon 14 dates in current Mesolithic research in North West Europe Altogether 40 papers dealing with radiocarbon dates from 15 different countries are presented Major themes are the typo technological evolution of lithic and bone industries changes in settlement patterns burial practices demography and subsistence human impact on the Mesolithic environment and the neolithisation process Some papers also deal with more methodological aspects of carbon 14 dating e g calculation of various reservoir effects the use of cumulative calibrated probability distributions and related techniques e g stable isotope analysis for palaeodiet reconstruction The Origins And Spread Of Agriculture And Pastoralism In Eurasia David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geogrpahical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity s almost complete dependence on relatively few domesticated animals and plants The

subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization The Fragile Environment L. E. Friday, Laurie Friday, R. A. Laskey, 1991-05-09 The Fragile Environment explores the impact of the human species on its Greece Before History Curtis Runnels, Priscilla M. Murray, 2002-08-01 This book a guide and companion to the prehistoric archaeology of Greece is designed for students travelers and all general readers interested in archaeology Greece has perhaps the longest and richest archaeological record in Europe and this book reviews what is known of Greece from the earliest inhabitants in the Stone Age to the end of the Bronze Age and the collapse of the Minoan and Mycenaean civilizations The book describes the prehistoric cultures of Greece in chronological order and illustrates with 98 detailed drawings each culture s typical artifacts architecture burial customs and art Written in an informal and accessible style free of scientific jargon the book can be used in the classroom or as a guide for the traveler or read simply for pleasure by anyone with a curiosity about the earliest ages of this fascinating region Although intended for a wide audience the book has a solid scientific foundation The authors are professional archaeologists with more than 25 years of experience in the field and with a first hand knowledge of the methods and results of contemporary research There is no other book today that covers the same range of periods and subjects making it essential reading for anyone interested in the early civilizations that shaped the Greek landscape laid the foundations for Classical Greek civilization and contributed in many ways to the formation of the modern Greek world The authors have been careful to address the many questions concerning prehistoric Greece that have been asked them by students and visitors to Greece through the years The illustrations were created especially for this book showing familiar artifacts and sites from a new perspective and selecting others for illustration that rarely if ever appear in popular publications Boats of the World Sean McGrail, 2004 Maritime archaeology the study of man's early encounter with the rivers and seas of the world only came to the fore in the last decades of the twentieth century long after its parent discipline terrestrial archaeology had been established Yet there were seamen long before there were farmers navigators before there were potters and boatbuilders before there were wainwrights In this book Professor McGrail attempts to correct some of the imbalance in our knowledge of the past by presenting the evidence for the building and use of early water transport rafts boats and ships Companion Encyclopedia of Archaeology Graeme Barker, 2002-08-13 This comprehensive fully illustrated Companion answers the need for an in depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field The work brings together the myriad strands and the great temporal and spatial

breadth of the field into two thematically organized volumes In twenty six authoritative and clearly written essays this Companion explores the origins aims methods and problems of archaeology Each essay is written by a scholar of international standing and illustrations complement the text Neanderthals in the Levant Donald O. Henry, 2003-10-01 The volume traces the controversy that revolves around the bio cultural relationships of Archaic Neanderthal and Modern humans at global and regional Levantine scales The focus of the book is on understanding the degree to which the behavioral organization of Archaic groups differed from Moderns To this end a case study is presented for a 44 70 000 year old Middle Paleolithic occupation of a Jordanian rockshelter The research centering on the spatial analysis of artifacts hearths and related data reveals how the Archaic occupants of the shelter structured their activities and placed certain conceptual labels on different parts of the site The structure of Tor Faraj is compared to site structures defined for modern foragers in both ethnographic and archaeological contexts to measure any differences in behavioral organization. The comparisons show very similar structures for Tor Faraj and its modern cohorts The implications of this finding challenge prevailing views in the emergence of modern human controversy in which Archaic groups are thought to have had inferior cognition and less complex behavioral social organization than modern foragers And it is generally thought that such behaviors only emerged after the appearance of the Upper Paleolithic dated some 10 20 000 years later than the occupation of Tor Faraj Companion to South Asia in the Past Gwen Robbins Schug, Subhash R. Walimbe, 2016-05-16 A Companion to South Asia in the Past provides the definitive overview of research and knowledge about South Asia's past from the Pleistocene to the historic era in India Pakistan Sri Lanka Bangladesh and Nepal provided by a truly global team of experts The most comprehensive and detailed scholarly treatment of South Asian archaeology and biological anthropology providing ground breaking new ideas and future challenges Provides an in depth and broad view of the current state of knowledge about South Asia's past from the Pleistocene to the historic era in India Pakistan Sri Lanka Bangladesh and Nepal A comprehensive treatment of research in a crucial region for human evolution and biocultural adaptation A global team of scholars together present a varied set of perspectives on South Asian pre and proto history The British Palaeolithic Paul Pettitt, Mark White, 2012 The British Palaeolithic provides the first academic synthesis of the entire British Palaeolithic from the earliest occupation to the end of the Ice Age It fills a major gap in teaching resources as well in research by providing a current synthesis of the latest research on the period
