European Industrial Organisation Alex Jacquemin, H. W. de Jong, 1977

France, 1940-1952 Luc-André Brunet, 2017-06-08 This book is a detailed and original look at the radical reorganisation of French heavy industry in the turbulent period between the establishment of the Vichy regime in 1940 and the creation of the European Coal and Steel Community ECSC the forerunner to the European Union in 1952 By studying institutions ranging from Vichy's Organisation Committees to Jean Monnet's Commissariat Général du Plan CGP Luc-André Brunet challenges existing narratives and reveals significant continuities from Vichy to post-war initiatives such as the Monnet Plan and the ECSC Based on extensive multi-archival research this book sheds important new light on economic collaboration and resistance in Vichy the post-war revival of the French economy and the origins of European integration

Industrial Organization in the European Union Stephen Davies, Bruce Lyons, 1996 This book fills an important gap in our knowledge of the organization of EU manufacturing industry At the empirical level it draws on a newly constructed micro-level database the European market share matrix to present the first ever comprehensive picture of the concentration integration multinationality and diversification of EU industry and firms However its purpose is not primarily descriptive At the theoretical level it develops a new way of integrating the insights of international trade industrial organization international business and corporate strategy A central thesis is that by understanding the reasons for the industrial structure we observe much can be understood about the underlying competitive process that generated this structure in the context of current European integration In this R&D advertising and government intervention each play important and pervasive roles The insights from an econometric analysis of the various dimensions of industrial structure are applied to address policy relevant questions such as is the industrial organization of the member states integrated at the EU level Are diversification and multinationality random or do they follow an industrial logic Which industries and firms pose the most serious potential problems for competition policy How do the largest EU firms achieve their size Do certain member states dominate the ownership or location of production

Pioneers of Industrial Organization H. W. de Jong, William G. Shepherd, 2007-01-01 this collection should be viewed as a pioneering effort this book would most likely serve as a useful quick reference source for students of industrial economics It can also serve as a valuable point of departure for those who wish to study intellectual developments in a major field in more detail John Howard Brown *Journal of the History of Economic Thought* This work will be indispensable for anyone who undertakes serious scholarly research in industrial organization With its knowledgeable authors and editors this book offers us valuable materials about the work of writers long forgotten and others inadequately recognized that can contribute much to understanding in the field William J Baumol New York University and Princeton University US This encyclopaedic work celebrates the scores of leading pioneers who created the modern economic field of industrial organization at the heart of which lie competition and monopoly the two great forces that

drive modern markets Their pioneering work has shaped the field's growing research as well as the past present and future debates in Europe and America over several centuries This landmark book includes authoritative entries on all the major figures in both Europe and North America *Pioneers of Industrial Organization* also reveals how public policies such as antitrust and regulation and deregulation since the 1970s can promote or impede economic results and progress Readers will find the intellectual pioneers the theories and policies and the debates in all their variety herein Some pioneers have been free market advocates others have been more protective of popular values but all have strained to make the economic engine promote more wealth progress and fairness This book presents the people ideas and debates with careful neutrality and also with clear concise writing For all those interested in modern economic progress and its problems this book provides deep insight as well as great personal colour It will be an essential source of reference for students researchers and professors of economics as well as those concerned with the historical foundations or the conceptual and thematic developments in industrial organization

Industrial Organization Kenneth George, Caroline Joll, E L Lynk, 2005-08-11 As most economies remain caught in a global recession that shows little sign of abatement the importance of maintaining a flourishing industrial sector for the economic wellbeing of a country has rarely been so relevant *Industrial Organisation* has long served as a basic introduction to this subject The book is concerned with economic problems and policy issues that arise from the activities of firms The authors reject the traditional micro economic analysis of market structure in favour of studying conduct and performance in the context of macro economic policy and the environment which this provides for firms Substantially revised and updated to take account of developments in the subject since the publication of the last edition *Industrial Organization* includes four new chapters which reflect the major new areas of interest in industrial economics over the last decade These include the increasing importance of the service sector and problems of relatively low productivity growth within this and questions relating to increased levels of international competition in a more open world economy This is a comparative study drawing on empirical evidence from the UK USA and the EC Mathematical and econometric requirements are kept to a minimum and the text has long been regarded as the most accessible introduction to the subject

North Africa and the Making of Europe Muriam Haleh Davis, Thomas Serres, 2018-02-22 This innovative edited collection brings together leading scholars from the USA the UK and mainland Europe to examine how European identity and institutions have been fashioned through interactions with the southern periphery since 1945 It highlights the role played by North African actors in shaping European conceptions of governance culture and development considering the construction of Europe as an ideological and politico economic entity in the process Split up into three sections that investigate the influence of colonialism on the shaping of post WWII Europe the nature of co operation dependence and interdependence in the region and the impact of the Arab Spring *North Africa and the Making of Europe* investigates the Mediterranean space using a transnational interdisciplinary approach This in turn allows for historical analysis to be fruitfully put into conversation with contemporary politics The book

also discusses such timely issues such as the development of European institutions the evolution of legal frameworks in the name of antiterrorism the rise of Islamophobia immigration and political co operation Students and scholars focusing on the development of postwar Europe or the EU s current relationship with North Africa will benefit immensely from this invaluable new study *The European Community and its Mediterranean Enlargement* Loukas Tsoukalis,2022-12-09 First published in 1981 The European Community and its Mediterranean Enlargement examines the background to the economic developments in Greece Spain and Portugal their relationship with the Community and the political and economic interests at issue during negotiations At the same time the study of enlargement provides an excellent opportunity for a critical appraisal of existing Community policies especially those affecting industry and agriculture and a discussion of likely future developments and pressures for change within the context of the Community of Twelve Loukas Tsoukalis combines a thorough familiarity with Community affairs with a good knowledge of Southern Europe and the ability to work in several European languages This book crosses many disciplinary boundaries and is a must read for scholars and researchers of European politics European Union international relations and European history **European Works Councils** Ian Fitzgerald,John Stirling,2013-02-01 This book covers the key themes related to the introduction growth development and future of European Works Councils the European Works Council Directive itself European Works Council Agreements Employers strategies for managing European Works Councils in practice and trade union strategies for the development of European Works Councils The book features contributions from key writers in the field and covers both theoretical models and questions of practice *The New European Industrial Policy* Franco Mosconi,2015-05-22 The years since the global financial crisis have seen something of a renaissance in the manufacturing industry The United States has launched its Advanced Manufacturing Partnership and China owes much of its spectacular economic boom in the last decades to its being the world s factory Is there room for the EU in this landscape This timely new book explores Europe s role in this evolving environment It argues that on the one hand in terms of sheer numbers the role of the manufacturing industry in the EU is on a par with other major global economies However the book also states that Europe falls short of its global competitors the USA in particular in terms of its involvement in the most innovative manufacturing sectors The volume therefore argues that this creates the opportunity for a new European industrial policy Exploring the development of current EU policy the book puts forward suggestions as to how the EU can improve in terms of the competitiveness of its technology policy Placing the EU s position in the context of the industrial structures of the USA Japan and the BRICs the book blends theoretical models and practical examples in order to offer a the state of the art look at the current and future direction of Europe s industrial policy This book will be of relevance to all those with an interest in European economics industrial economics public policy European politics and European studies **Mainstreams in Industrial Organization** H.W. de Jong,William G. Shepherd,2013-06-29 The present two volumes contain the essays and part of the discussions as presented at the conference

on Mainstreams in Industrial Organization held at the University of Amsterdam 21-23 August 1985 The theme was chosen because the field of studies commonly designated industrial organization in the Anglo Saxon countries or market theory in Continental Europe has experienced important alterations during the past decade Partly this reflects changing theoretical views inside the field in which shifts in the core concepts have occurred and different emphasis is laid on time honoured views and results Partly critical views have been voiced from outside the field As in all open scientific debate they have to be weighed and if necessary taken into account Partly also divergent developments in thinking between the Anglo Saxon European and Japanese areas need to be considered because both the problems and the ways of approaching them still differ The variety of views theories and results is testimony to the vitality of this field of economics variety is generated by the creative endeavours from which the chaff is being beaten out by critical discussions That is especially true for the concept of competition itself which industrial organization economists are debating intensively EU Competition Law and the Information and Communication Technology Network Industries Andrej Fatur, 2012-03-08 Competition policies have long been based on a scholarly tradition focused on static models and static analysis of industrial organisation However recent developments in industrial organisation literature have led to significant advances moving beyond traditional static models and a preoccupation with price competition to consider the organisation of industries in a dynamic context This is especially important in the field of information and communication technology ICT network industries where competition centres on network effects innovation and intellectual property rights and where the key driver of consumer benefit is technological progress Consequently when an antitrust intervention is contemplated a number of considerations that arise out of the specific nature of the ICT sector have to be taken into account to ensure improved consumer welfare This book considers the adequacy of existing EU competition policy in the area of the ICT industries in the light of the findings of modern economic theory Particular attention is given to the implications of these dynamic markets for the competitive assessment and treatment of the most common competitive harms in this area such as non price predatory practices tying and bundling co operative standard setting platform joint ventures and co operative R D **IOCB 2010 Industrial Organization: a Contract Based approach**, *Trademarks and Their Role in Innovation, Entrepreneurship and Industrial Organization* Carolina Castaldi, Jörn Block, Meindert J. Flikkema, 2021-06-14 Trademarks are the most widely used intellectual property right by companies worldwide Their strategic importance is increasing as reputational assets become more relevant for companies than ever in national and global markets Trademarks also represent key tools for companies to profit from innovation and can make the difference for start ups and entrepreneurial firms by allowing them to gain legitimacy and fostering fund raising from investors This book Trademarks and Their Role in Innovation Entrepreneurship and Industrial Organization takes stock of the emerging academic research on how companies use trademarks It collects a rich set of contributions from several research perspectives and disciplines and proposes an integrated view bridging different levels of

analysis individual firm industry and country level Specifically the book combines an industrial organization innovation and entrepreneurship perspective to understand why when and with what effects entrepreneurs innovators and firms use trademarks The book is targeted toward academic readers to gain a better understanding of the emerging and interdisciplinary field of trademark research as well as interested practitioners from the area of intellectual property IP management and policy making The chapters in this book were originally published in Industry and Innovation

Perspectives in Industrial Organization B. Dankbaar, John Groenewegen, H. Schenk, 2012-12-06 This book contains the key note lectures and a selection of papers that were presented at the 15th Conference of the European Association for Research in Industrial Economics EARIE held under the auspices of GRASP at Erasmus University Rotterdam in 1988 plus an introductory chapter by the Editors Upon suggestions by the Editors all papers have been revised for this book some more extensively than others Robin Marris has added to his lecture a synopsis of the contributions to the Round Table on the Micro Macro Interface which he chaired during the Conference The papers cover issues that seem to be both interesting and relevant for the 1990s While some of the papers are cast in a rather established research frame enabling the use of regular academic routines others are first attempts at delineating the contours of areas that are peripheral to what is often considered as the core of Industrial Organization In their introductory chapter the Editors set forth that a neglect of those areas may well relegate Industrial Organization to social irrelevancy Therefore it is hoped that the book will also contribute to a reflection on the main lines of Industrial Organization research for the 1990s thus helping to create a healthy perspective for this part of economics at a time when macroeconomics is undergoing a severe crisis **The Origins and**
