Ornston,2012-07-28 At the close of the twentieth century Denmark Finland and Ireland emerged as unlikely centers for high tech competition In *When Small States Make Big Leaps* Darius Ornston reveals how these historically low tech countries managed to assume leading positions in new industries such as biotechnology software and telecommunications equipment In each case countries used institutions that are commonly perceived to delay restructuring to accelerate the redistribution of resources to emerging enterprises and industries Ornston draws on interviews with hundreds of politicians policymakers and industry representatives to identify two different patterns of institutional innovation and economic restructuring Irish policymakers worked with industry and labor representatives to contain costs and expand market competition Denmark and Finland adopted a different strategy converting an established tradition of private public and industry labor cooperation to invest in high quality inputs such as human capital and research Both strategies facilitated movement into new high tech industries but with distinctive political and economic consequences In explaining how previously slow moving states entered dynamic new industries Ornston identifies a broader range of strategies by which countries can respond to disruptive challenges such as economic internationalization rapid technological innovation and the shift to services

[The Oxford Handbook of British Politics](#) Matthew Flinders,Andrew Gamble,Colin Hay,Michael Kenny,2009-07-16 The study of British politics has been reinvigorated in recent years as a generation of new scholars seeks to build upon a distinct disciplinary heritage while also exploring new empirical territory and finds much support and encouragement from previous generations in forging new grounds in relation to theory and methods It is in this context that *The Oxford Handbook of British Politics* has been conceived The central ambition of the Handbook is not just to illustrate both the breadth and depth of scholarship that is to be found within the field It also seeks to demonstrate the vibrancy and critical self reflection that has cultivated a much sharper and engaging and notably less insular approach to the terrain it seeks to explore and understand In this emphasis on critical engagement disciplinary evolution and a commitment to shaping rather than re stating the discipline *The Oxford Handbook of British Politics* is consciously distinctive In showcasing the diversity now found in the analysis of British politics the Handbook is built upon three foundations The first principle that underpins the volume is a broad understanding of the political It covers a much broader range of topics themes and issues

than would commonly be found within a book on British politics This emphasis on an inclusive approach also characterises the second principle that has shaped this collection namely diversity in relation to commissioned authors The final principle focuses on the distinctiveness of the study of British politics Each chapter seeks to reflect on what is distinctive both in terms of the empirical nature of the issue of concern and the theories and methods that have been deployed to unravel the nature and causes of the debate The result is a unique volume that draws upon the intellectual strengths of the study of British politics reflects the innate diversity and inclusiveness of the discipline isolates certain distinctive issues and then reflects on their broader international relevance and finally looks to the future by pointing towards emerging or overlooked areas of research

**German-Irish Corporate Relationships** Niamh O'Mahony, 2004 Revision of the author's thesis doctoral Aston University Ireland

*European Unions* Roland Erne, 2011-05-02 Roland Erne's view of transnational trade union networks challenges the assertion that no realistic prospect exists for remedying the European Union's democratic deficit that is its domination by corporate interests and lack of a cohesive European people His book describes the emergence of a European trade union movement that crosses national boundaries Erne assesses national and EU level trade union politics in two core areas wage bargaining in the European Monetary Union and job protection during transnational corporate mergers and restructuring The wage coordination policies of the European metal and construction workers unions and the unions responses in the ABB Alstom Power and Alcan Pechiney Algroup merger cases Erne finds show that the activities of labor are not confined to the national level labor's policies have undergone Europeanization This cross national borrowing of tactics is itself proof of the increasing integration of European states and societies European Unions is based on an exceptionally wide range of research methods including statistical analysis participant observation and interviews with EU level national and local trade unionists and works councilors It also draws on a wide range of European German French Italian and Swiss union documents and a multilingual body of academic literature across several disciplines including political science sociology and law Erne's multilevel inquiry goes beyond country by country comparisons of national cases and his book will prove of great relevance to readers interested in the future of labor social justice and democracy in an increasingly integrated world

*The European Sectoral Social Dialogue* Anne Dufresne, Christophe Degryse, Philippe Pochet, 2006 SALTSA a joint

programme for working life research in Europe P facing t p      **Social Identity and Working Class Support for the Populist Radical Right** Eric G. Castater, Kyung Joon Han, 2025-02-04 Why are blue collar workers increasingly supporting the populist radical right in Western Europe Previous explanations for this phenomenon suggest that it is the result of their economic and cultural grievances and their general discontent towards the political system Social Identity and Working Class Support for the Populist Radical Right argues that these explanations are unable to account for why the working class despite their deteriorating economic position in recent decades would prefer to vote for a party family that they agree with more on cultural issues the populist radical right than economic issues the populist radical or mainstream left To explain this puzzle the book develops a theory utilizing the literature on social identity It argues and empirically finds that political and economic conditions relatively unfavourable to the working class increase blue collar worker support for the populist radical right in Western Europe by strengthening these workers national identity and thus also the salience they place on cultural issues Castater and Han s analysis suggests that if governing parties desire to reduce support for the populist radical right they should incorporate labour organizations into the welfare state reform process enact economic policies that improve the well being of a broad swath of the working class and reduce the types of economic inequality that most affect blue collar workers      Parties, Elections, and Policy Reforms in Western Europe Kerstin Hamann, John Kelly, 2010-08-30 This book provides a comparative assessment of social pacts between governments labor unions and employer organizations in Western Europe Using a dataset covering 16 European countries as well as eight in depth country case studies the authors argue that governments choice of social pacts or legislation is less influenced by economic problems but is strongly influenced by electoral competition
