book explores the distinctive characteristics of emerging forms of economic enterprise under market socialism in China. Adopting a holistic view it explores how rapid environmental and institutional changes in economic reforms are impacting upon their practice and assesses the role of government policy in shaping their ownership and management processes. Through the changing patterns in the development of business ventures it outlines the dynamics of industrial and organizational change under the transitional phases of a market socialist economy and explores the tensions which emerge. This comparative perspective will be of interest to academics, researchers and advanced students of business growth and enterprise management particularly those wishing to explore China, Chinese business and emerging economies.

Foreign-Owned Firms R. Jungnickel, 2002-10-14 Foreign owned firms (FoFs) can have significant implications in terms of employment, income and technology for the national economies involved. This book compares the efficiency of domestic and FoFs and also looks at the performance of FoFs in several different countries. Contributors take a broad variety of research approaches with a focus on the use of firm specific data from France, Germany, Austria and Sweden. They conclude that foreign ownership matters but the real difference is not between FoFs and national firms but between multinational and domestic firms.
