European Naval and Maritime History, 300-1500 Archibald Ross Lewis, Timothy J. Runyan, 1985 This first general survey of European naval and maritime history for the period from A D 300 to 1500 focuses on Western Europe including the Baltic North Sea and Atlantic traditions and on the Mediterranean particularly Byzantine and Moslem naval history The authors survey a number of interconnected areas the use of seapower in international and intercultural relations commerce and trade routes naval technology and design military tactics the physical features of seafaring and the geography of the sea They make accessible to the general reader very technical scholarship and provide numerous maps and illustrations that explain the changes in ship design and construction The overall result is a powerful historical synthesis which gives students teachers and general readers a feel for the seafaring life and the place of the sea within medieval civilization *The Sea and Medieval English Literature* Sebastian I. Sobecki, 2008 A fresh and invigorating survey of the sea as it appears in medieval English literature from romance to chronicle hagiography to autobiography As the first cultural history of the sea in medieval English literature this book traces premodern myths of insularity from their Old English beginnings to Shakespeare's Tempest Beginning with a discussion of biblical classical and pre Conquest treatments of the sea it investigates how such works as the Anglo Norman Voyage of St Brendan the Tristan romances the chronicles of Matthew Paris King Horn Patience The Book of Margery Kempe and The Libelle of Englyshe Polycye shape insular ideologies of Englishness Whether it is Britain's privileged place in the geography of salvation or the political fiction of the idyllic island fortress medieval English writers' myths of the sea betray their anxieties about their own insular identity their texts call on maritime motifs to define England geographically and culturally against the presence of the sea New insights from a range of fields including jurisprudence theology the history of cartography and anthropology are used to provide fresh readings of a wide range of both insular and continental writings **The Age of the ΔΡΟΜΟΝ** John Pryor, Elizabeth M. Jeffreys, 2006-07-01 This volume examines the development and evolution of the war galley known as the Dromon and its relative the Chelandion from first appearance in the sixth century until its supersession in the twelfth century by the Galea developed in the Latin West Beginning as a small fully decked monoreme galley by the tenth century the Dromon had become a bireme the pre eminent war galley of the Mediterranean The salient features of these ships were their two banked oarage system the spurs at their bows which replaced the ram of classical antiquity their lateen sails and their primary weapon Greek Fire The book contextualizes the technical characteristics of the ships within the operational history of Byzantine fleets logistical problems of medieval naval warfare and strategic objectives Surviving Byzantine sources especially tactical manuals are subjected to close literary and philological analysis **Geography, Technology, and War** John H. Pryor, 1992-05-14 A study of the technological limitations of maritime traffic in the Mediterranean seen in conjunction with the geographical conditions within which it operated *Oceans, Seas, Shorelines and Warfare* Richard Harding, Ross Anderson, Mick de Ruyter, 2024-09-23 For

as long as humanity has ventured on the seas naval warfare has been an integral part of their activities and the focal point for many histories and ideas of heritage This book presents a rarely explored aspect the long term impact of those battles on shorelines seas and oceans Dramatic and altering the physical scars of battles remain with us today in the form of cultural landscapes and archaeological sites while the geopolitical consequences of warfare have been world changing The migrations of peoples across the seas accompanied by violence have done more to shape the demographic and cultural map of the modern world than almost anything else Both seaborne opportunities and threats have influenced the way of life of coastal communities Today technology has seen these threats extend far into the deepest ocean and reach across continents This book shows how despite being virtually invisible to an increasing percentage of the world s population the ocean is more significant now than it has ever been Ranging from the world of antiquity to the present day with a global perspective the volume is intended to appeal to those interested in history archaeology social sciences and the environment
