European Regional Policy:

Cohherence of EU Regional Policy John Bachtler, Ivan Turok, 1997-05-02 This book brings together a rich selection of up to date practical experience of EU regional policy from across Europe It provides different perspectives on the design and operation of regional development strategies under the Structural Funds from people closely involved in studying managing or advising on the process at EU national and regional levels It therefore offers a more comprehensive and detailed understanding of the structural policies than has been available hitherto This will prove particularly useful to researchers practitioners and students interested in European regional policies and processes

Politics of European Union Regional Policy Ian Bache, 1998-12-01 This book provides an over view of the key developments in the politics of European Union regional policy from the creation of the EEC to the present day The discussion of who decides what and to what effect in relation to regional policy is part of the contemporary academic debate about the nature of politics and policy making in the EU Bache argues that no single theory can explain the complex politics of EU regional policy making In particular current theories pay insufficient attention to the importance of implementation in shaping policy outcomes The book concludes that the application of different analytical tools at different stages of policy making provides the fullest picture of the politics of EU regional policy This title is published in conjunction with UACES the University Association for Contemporary European Studies UACES web site can be found at www.uaces.org

Regions Matter, 2005

European Regional Policy and Development María del Carmen Sánchez-Carreira, Paulo Jorge Reis Mourão, Bruno Blanco-Varela, 2023-07-18 The shortcomings of traditional regional policies led to a major policy Thus regions have become more active in the design and implementation of policies following a bottom up approach and involving the participation of the local community in strategic planning as opposed to the traditional top down method This book addresses regional development theories and policies with a special focus on forgotten places and raises emerging questions about recent theoretical advances as well as trends and challenges in the field It examines two main and related issues the crucial role of regional actors for development and the role of Forgotten Spaces It emphasizes the spatial territorial approaches from different theoretical perspectives underlining place based approaches and compares the experiences of both successful and failed cases attempting to identify lessons and policy recommendations as well as adding empirical evidence to this field The different cases presented which focus on Forgotten Spaces allow the reader to assess the role of different actors for regional development as well as some sectoral approaches While there is a clear focus on European countries with different geographical institutional and sociocultural characteristics the book also examines good and bad examples of regional development and policies related to forgotten places from different regions worldwide including developed and developing countries The book benefits from contributions from over 20 authors from different nationalities and a rich diversity of case studies approaches and methods of discussion The authors

discuss practical examples and more complex theoretical approaches involving techniques of spatial analysis spatial econometrics social networks content analysis as well as regional planning techniques The book will appeal to an interdisciplinary audience and will provide academicians politicians and policy designers with original and detailed analyses

The Coherence of EU Regional Policy John Bachtler,Ivan Turok,2013-12-16 This book brings together a rich selection of up to date practical experience of EU regional policy from across Europe It provides different perspectives on the design and operation of regional development strategies under the Structural Funds from people closely involved in studying managing or advising on the process at EU national and regional levels It therefore offers a more comprehensive and detailed understanding of the structural policies than has been available hitherto This will prove particularly useful to researchers practitioners and students interested in European regional policies and processes European regional policy ,1985

The Regional and Urban Policy of the European Union Philip McCann,2015-01-30 The regional and urban development policy of the European Union or more precisely EU Cohesion Policy is undergoing change This development is driven by the enormous transformations in European regions and by shifts in thinking and analysis The iss **European Integration, Regional Policy, and Growth** Bernard Funck,Lodovico Pizzati,2003 This publication contains a number of papers presented by leading academics policy makers and practitioners from existing and new EU member countries at a conference in Barcelona in October 2002 These papers discuss key issues regarding the effectiveness of attempts to reduce regional disparities with the EU and the implications of current enlargement including the trade offs between promoting national growth and reducing relative disparities the role of growth poles the investment climate and labour market flexibility the role of the EU and regional policy overall **Regional Policy** Norbert Vanhove,Leo Hendrik Klaassen,1980 The Regional Puzzle Christian B. Breuer,2012 Regions have increasingly broken ground in the European sphere For decades they have been subject to forces both influencing them from above regionalisation as well as from below regionalism In the European Union the regions and their actors have mainly manifested themselves via EU Regional Policy Besides a closer look at the rationales behind this trend e g multi level governance and the changes in the decision making process three case regions have thoroughly been addressed Latvia Scotland and Saxony This dissertation highlights the pitfalls the possibilities and the position of regions and its actors in both the domestic and the European setting in a clear and structured way Dissertation Series European Regions Regionen in Europa Vol 4 Transition, Cohesion and Regional Policy in Central and Eastern Europe Ruth Downes,2019-07-17 This title was first published in 2000 One of the most comprehensive overviews of regional development and policy emergence in the Central and East European countries to date this book focuses on economic and social cohesion bringing together a wide range of empirical research and discussion material **Regional Policy** Norbert Vanhove,2018-09-05 First published in 1999 this volume combines the theory and practice of regional economic policy in Europe Six main topics are covered as follows theory of regional economic development and policy

Regional policy at the national level Regional disparities in the EU past and present Impact of the integration on regions Regional policy in the EU 1975 1999 The structural funds 2000 2006 and openness to Eastern European countries The book also includes an up to date bibliography on the topic covered *Does EU Regional Policy have a future and will Latvia be able to benefit from it?* Chris Breuer, 2004-12-15 Master's Thesis from the year 2004 in the subject Politics Topic European Union grade 2.0 B University of Münster 48 language English abstract In this thesis I took a closer look at the second largest and most flexible policy field of the EU Regional Policy At present there are debates about the future of EU Regional Policy closely linked to the current debate about the EU budget for the planning period 2007 2013 for it is this budget that sets the boundaries for the financial resources of EU Regional Policy I assume that the future of the EU its acceptance within the community and its legitimacy by the community is dependent on the outcome of this ongoing debates and the future of regional policy By analysing the developments and the ongoing debates concerning EU Regional Policy so far I give prospects for the future of the EU in general and EU Regional Policy in particular The eastern enlargement is highly influencing regional policy and will result in a financial shift from west to east I used Latvia as a case study to show in what way concrete structures of a post Soviet state are being influenced and developed In order to investigate and do the appropriate research concerning my case study I lived in Riga the capital and political Walhalla of Latvia for half a year By being there and participating in seminars and congresses and by carrying out a project with a main focus to bridge the information gap between local Latvian authorities and the EU I got a good overview how the different governmental officials but the normal people as well judge the EU and EU Regional Policy in particular I learned that regional policy is extremely subject to the spectators view The judgement of EU Regional Policy depends on different political social and moral argumentations That the angle on how to look at the topic is very different seems obvious Let's take a Latvian mayor who is also part time farmer as an example Although he is interested in EU support he is barely able to fulfil the administrative and material conditions necessary to be eligible for EU support His Dutch colleague on the other hand is concerned about the financing of his relatively efficient local administration and he might judge financial support to weaker EU regions as competition This example shows the different starting points The decision making process shows similar disparities At the moment there is a clear gap between net contributors and net beneficiaries within the Union They have not come to a compromise concerning EU Regional Policy and the budget yet European Regional Development Paweł Churski, Tomasz Herodowicz, Barbara Konecka-Szydłowska, Robert Perdał, 2021-11-18 This book offers a comprehensive overview of contemporary issues of regional development It places particular emphasis on its socio economic and socio political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within

the framework of present day socio economic megatrends The proposed approach to the development factors is also used for the author s operationalisation of the concept of territorial capital which is at the centre of regional place based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004 2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in Europe at three spatial levels pan European national and intra regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and extended observation periods 2004 2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less developed region they represent all growth types and functional test units identified in the course of the research Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels

EU Cohesion Policy and European Integration John Bachtler, Carlos Mendez, 2016-04-22 EU Cohesion policy accounts for a major share of the EU budget and is central to economic and social development in many European countries This book provides a comprehensive and theoretically informed analysis of how Cohesion policy has evolved over time in particular the budgetary and policy dynamics of the 2007 13 reform In the context of the budgetary politics of the EU the book examines the process by which the reform of Cohesion policy has been shaped it identifies the key factors that explain the allocation of funding assesses the roles of the Member States European Commission and European Parliament and tests whether the process and outcome are consistent with the expectations of EU decision making and integration theories Based on extensive EU wide research over a ten year period the book provides new insights into both the process and outcomes of EU policy reform Presenting original research in an accessible format this book will be of interest to scholars as well as undergraduate and postgraduate students in the fields of European integration and policy studies

Europe at the Service of Regional Development European Commission. Directorate-General for Regional Policy and Cohesion, 1996 *Future of Eu Regional Policy: Report with Evidence 19th Report of Session 2007-08: House of Lords Paper 141 Session 2007-08* Bernan, 2008-07-01 The present policies to tackle regional disparities in Europe

are rooted in the creation of the Social Fund in 1958 In the intervening time expenditure on the policies has grown to the extent that 36 per cent of the EU budget in 2008 The European Social Fund is still in place and has been joined by the European Regional Development Fund and the Cohesion Fund the triumvirate of Funds is colloquially known as the Structural Funds The majority of funding targets the poorest third of European regions but approximately one fifth is distributed across the remaining regions with the aim of improving their competitiveness With work now beginning to examine the priorities for the European budget in the period after 2014 this report examines the distribution management and impact of the Funds The Committee supports the underlying principle of intervention in the market to counter the uneven distribution of the benefits and costs of the single market but this support must be delivered in an efficient and effective manner The Committee finds that the Funds are effective and fit for purpose and that the size of the funding distributed to the poorest regions under the Convergence Objective is approximately correct Objections about the cost of management of the funds are overstated The funding and scope of the Convergence Objective which supports the poorest regions is appropriate and it should remain European Regional Development Fund Great Britain: Parliament: House of Commons: Communities and Local Government Committee,2012-07-13 The abolition of the Regional Development Agencies removed the main source of match funding for ERDF sponsored projects and the economic downturn has curbed alternative options for match funding even further There is a pressing need to spend each region s ERDF allocation before 2015 but unless ministers take urgent steps to deliver on the Government s promise to make it easier for projects to secure match funding through the Regional Growth Fund there is a significant risk that value for money will suffer and ERDF will not make the impact it could to help rebalance the UK s economy The Committee endorses a number of sensible rule changes that will govern the next ERDF round 2014 20 currently proposed and related proposals to give Member States the power to tailor the size of their Operational Programme areas which could permit Local Economic Partnerships in England to take responsibility for managing EU funds MPs also challenge the current allocation system where even the wealthiest Member States receive some ERDF funding when a portion of what they pay in originally gets recycled back to them The cross party group of MPs calls for this circular money flow to end and for England to retain this portion of funding to deliver its own regional policy The Government would have to guarantee the same level of funding across the EU s 7 year funding cycle This change would not affect the Government s contribution to ERDF for the poorer Member States Lastly MPs challenge the Government to evaluate the value for money of ERDF funded projects European Regional Planning Strategy Nicolas Momper,Council of Europe,European Conference of Ministers Responsible for Regional Planning,1992-01-01 1 folded map col in back plastic pocket
