European Societies Thomas Boje, Thomas P. Boje, Bart van Steenberg, Sylvia Walby, 1999 This book brings together many of the leading experts in the field to ask whether recent developments in Europe have brought about a higher level of integration or are causing increased divergence and differences between countries

European societies Steffen Mau, Roland Verwiebe, 2010-10-08 This comprehensive textbook provides a thorough analysis of the nature of European societies across the expanded EU member states Using a wealth of data the authors compare the different dimensions of the territorial and social order of Europe and address a range of issues relating to Europeanisation and key topics such as inequality migration poverty population and family the labour market and education Presented in a student friendly way this book also helps unravel people's attitudes towards Europe European integration and citizens of other European countries It will be an essential read for under and post graduate students and academics of sociology European studies social stratification social policy and political sciences

Inclusions and Exclusions in European Societies Martin Kohli, Alison Woodward, 2004-01-14 European social development over the last century has been characterized by an increasing inclusiveness of people into the ever larger collectives of the nation state the European Union and categories of welfare entitlement Yet recent empirical data suggests that income gaps are growing and that within the physical borders of Europe there is a greater cultural and ethnic heterogeneity than ever before Effectively many of the processes of inclusion are accompanied by exclusion and the creation of new borders identities and rights

Inclusions and Exclusions in European Societies features eminent contributors from across Europe addressing the problems of inclusion and exclusion as they affect European societies today Amongst the topics addressed are to what extent classical theory provides useful ways of reframing European societies which inequalities in work and welfare persist today and in what ways they have been transformed in processes of European integration how considerations of new identities and the pressure of globalisation affect the forms of inclusion and exclusion in Europe This book constitutes a unique stock taking of many of the central issues in European social integration or disintegration today

Religion, Identity and Politics Haldun Gülalp, Günter

Seufert,2013-06-26 German Turkish relations which have a long history and generally unrecognized depth have rarely been examined as mutually formative processes Isolated instances of influence have been examined in detail but the historical and still ongoing processes of mutual interaction have rarely been seriously considered The ruling assumption has been that Germany may have an impact on Turkey but not the other way around Religion Identity and Politics examines this mutual interaction specifically with regard to religious identities and institutions It opposes the commonly held assumption that Europe is the abode of secularism and enlightenment while the lands of Islam are the realm of backwardness and fundamentalism Both historically and contemporarily Germany has treated religion as a core aspect of communal and civilizational identity and framed its institutions accordingly the book explores how there has been and continues to be a mutual exchange in this regard between Germany and both the Ottoman Empire and modern Turkey The authors show that the definition of identity and regulation of communities have been explicitly based on religion until the early and since the late twentieth century the period in between the age of secular nationalism which has always been treated as the norm now appears more clearly as an exception This book will be of interest to students and scholars of sociology politics history and religion *Baltic Biographies at Historical Crossroads* Aili Aarelaid-Tart,Li Bennich-Björkman,2012-06-12 Lying on the coastline of the Baltic Sea the small but strategically well located Baltic territories have historically found themselves in the middle of many power struggles between larger states empires and other power holders This book brings together life stories from five generations of Balts living through the diverse and recurring transformations of the 20th century occupations war independence totalitarianism and democratic rule and market economy **Artistic Practices** Tasos Zembylas,2014-04-03 Art matters It affects us in our daily lives and is full of meanings that are valuable to all of us As a catalyst for social interactions art may either cause public conflict and create dissensions or facilitate mutual understanding and strengthen collective bonds All of this is grounded in practices that develop and change along social interaction cultural dynamics as well as technological and economic lines So how is art formed and produced What are the relevant constraints and challenges that artists experience in the creative process And what constitutes artistic agency This collection of contributions from international interdisciplinary experts explores particular case studies to deeply analyse artistic practices Comprising eleven chapters relating to different art forms each chapter offers an original perspective conveying a comprehensive understanding of artistic practices as arrays of specific activities in contemporary art worlds This book will be important for both researchers and practitioners in the field It will help artists to deepen their analytical abilities enabling them to further their own creative practice It will allow students and researchers to gain insights into processes of artistic creation and thus into the reproduction of art as well as innovation in the arts *European societies: fusion or fission* European conference for sociology,1995 *Collective Memories in War* Elena Rozhdestvenskaya,Victoria Semenova,Irina Tartakovskaya,Krzysztof Kosela,2015-12-14 This edited collection offers an empirical exploration of social memory in the context of politics war

identity and culture With a substantive focus on Eastern Europe it employs the methodologies of visual studies content and discourse analysis in depth interviews and surveys to substantiate how memory narratives are composed and rewritten in changing ideological and political contexts The book examines various historical events including the Russian Afghan war of 1979-89 and World War II and considers public and local rituals monuments and museums textbook accounts gender and the body As such it provides a rich picture of post socialist memory construction and function based in interdisciplinary memory studies

Narrating European Society Hans-Jörg Trenz, 2016-03-21 Trenz introduces a sociological perspective on European integration by looking at different accounts of Europeanization as society building He observes how Europeanization unfolds in ongoing practices and discourses through which social relations among the Europeans are redefined and re embedded The chapters describe how the project of European integration has been powerfully launched in postwar Europe as a normative venture that comprises polity and society building how this project became ingrained in every day life histories and experiences of the Europeans how this project became contested and confronted resistances and ultimately how it went through its most severe crisis A sociology of European integration is thus outlined along four main themes or narratives first the elite processes of identity construction and the framework of norms and ideas that carries such a construction together with notions of European identity EU citizenship etc second the socialization of European citizens processes of banal Europeanism and social transnationalism through everyday cross border exchanges third the mobilization of resistance and Euroskepticism as a fundamental and collectively mobilized opposition to processes of Europeanization and fourth the political sociology of crisis linked not only to financial turmoil but also more fundamentally to a legitimization crisis that affects Europe and the democratic nation state

Cultural Overstretch? Jürgen Gerhards, 2007-08-03 Within a few years the European Union will be enlarged from fifteen to twenty eight member states including Turkey Do the new countries fit into the European Union or does the enlargement lead to a cultural overstretch Using survey data Cultural Overstretch describes the cultural differences between twenty eight European countries

Women and Citizenship in Central and Eastern Europe Joanna Regulska, 2017-03-02 The transformations seen in women's active citizenship in Central and Eastern Europe mirror the social political and economic transformations in the region since the fall of communism at the end of the 1980s This book challenges the universal notion of citizenship by focusing on the diversity of situations women in this region have found themselves in since the end of the 1980s looking at the challenges and struggles they have faced to assert themselves as citizens and their citizenship rights Featuring detailed case studies which demonstrate the social and political discrimination between women that still exists the book will be of interest to academics and post graduate students in women's gender studies political sociology and European studies

The Future of Feminism Sylvia Walby, 2013-04-17 Feminism is not dead This is not a postfeminist era Feminism is still vibrant despite declarations that it is over Feminism is a success although many gender inequalities remain Feminism is taking powerful new forms which makes it unrecognisable to some In

The Future of Feminism Sylvia Walby offers a provocative riposte to the notion that feminism is dead Substantiating her arguments with evidence of the vibrancy of contemporary feminism in civil society and beyond she provides a succinct yet comprehensive critical review of recent treatments of feminism explaining why they have got it wrong The book provides the definitive account of feminism s new and varied projects goals alliances and organizational forms including feminism as a global wave It offers engaged accounts of feminist activities across a range of domains in the economy polity violence and civil society Successful feminist projects are not always named as feminist sometimes being mainstreamed into coalitions with social democratic and global human rights activists Feminism is now global though also taking local forms and these new coalitions are the basis for the future of feminism On the future of feminism depends not only the future of gender inequality but the future of social inequality more generally

Heinz,Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on

crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina

Cosmopolitan Europe Ulrich Beck, Edgar Grande, 2014-11-05 Europe is Europe's last remaining realistic political utopia But Europe remains to be understood and conceptualized This historically unique form of international community cannot be explained in terms of the traditional concepts of politics and the state which remain trapped in the straightjacket of methodological nationalism Thus if we are to understand cosmopolitan Europe we must radically rethink the conventional categories of social and political analysis Just as the Peace of Westphalia brought the religious civil wars of the seventeenth century to an end through the separation of church and state so too the separation of state and nation represents the appropriate response to the horrors of the twentieth century And just as the secular state makes the exercise of different religions possible so too cosmopolitan Europe must guarantee the coexistence of different ethnic religious and political forms of life across national borders based on the principle of cosmopolitan tolerance The task the authors have set themselves in this book is nothing less than to rethink Europe as an idea and a reality It represents an attempt to understand the process of Europeanization in light of the theory of reflexive modernization and thereby to redefine it at both the theoretical and the political level This book completes Ulrich Beck's trilogy on cosmopolitan realism the volumes of which complement each other and can be read independently It is essential reading for anyone interested in the key social and political developments of our time

The Family in the Mediterranean Welfare States Manuela

Naldini, 2004-11-23 This work analyses in a historical and comparative perspective the relationship between the family and the welfare state in two Mediterranean countries Italy and Spain Two aims form the focus of the book Firstly to open the black box of the family in welfare state analysis introducing a focus on inter generational and kin relations Secondly to explain why the southern welfare states have offered very low support to families with children by taking into account several factors the legacy of fascism the role of the Church and the specific role played by leftist parties in defining family policy as labour policy
