Relevance of European Studies in Asia Maria Stoicheva, S. G. Sreejith, Indranath Gupta, 2023-12-18 This book provides perspectives on the relevance of European Studies as a disciplinary category for the Asian region. That being the primary focus, the book serves a larger purpose. First, it provides insights on European society, polity and economy including European Integration as they are accounted in European Studies. The epistemological character of the knowledge thus conveyed has larger credibility and reliability such that they can become policy inputs and imaginations for strengthening Asian-European relationship. This approach helps overcome the trap of subjectively motivated discourses on Europe which may fail potential collaborations between the regions. Second, the design and discursivity of European Studies will be an instruction to the Asian region on the constitutive potential of regional studies in society building. Third, the book works towards building the idea of Europe in terms of international law in the minds of Asian students, researchers and decision makers. This is extremely relevant for the future relationship and cultural engagement between the two regions. The book is of interest to policymakers, academics, embassies, state level government offices, researchers and students.

Japan and Enlarged Europe Takako Ueta, Eric Remacle, 2005 Japan and the European Union are two civilian powers that have dramatically extended and diversified their role on the world stage and that have launched together an Action Plan dealing with peace and stability, economic, environmental, commercial and financial governance and cultural exchanges and cooperation. Their bilateral cooperation has been intensified as well as their cross contribution to the G8 and multilateral organisations like the United Nations and the World Trade Organisation. In parallel, their respective domestic and international positions have changed. The EU has integrated ten new members, adopted a Constitution and developed a security and defence policy. Japan has widened its international and security role and reorganised most of its economic policies. Therefore, Japan and the enlarged European Union are actors and partners in the process of global governance. This book addresses the cooperation between Japan and the enlarged European Union for a more secure world, sustainable development and global governance. It gathers contributions from European and Japanese experts who have established a permanent network on this topic and meet every year for seminars in Brussels under the aegis of the Trans-European Policy Studies Association (TEPSA) and its Belgian member organisation Study Group on European Policies (SEP-GEPE) with the support of the Japan Foundation. The book is a joint Japanese-European contribution to the Year of Japan-European Union People to People Exchanges declared in 2005.
