when the EU is busily negotiating so called mega FTAs such as the Transatlantic Trade and Investment Partnership TTIP and the plurilateral Trade in Services Agreement TISA Melo Araujo offers a timely insight into the important questions raised by such FTAs in particular concerning the future of the multilateral trade system the loss of policy autonomy and the democratic legitimacy of regulating through treaty making The book provides a detailed analysis of the regulatory disciplines included in the more recent EU FTAs and explores the possible implications of such disciplines Offering a significant contribution to a wider debate this is a must read for those interested in the legal dimension of the EU s deep trade agenda *European Union Trade Politics and Development* Gerrit Faber, Jan Orbie, 2007-05-07 The Everything But Arms EBA regulation of the European Union EU has been hailed as a groundbreaking initiative for developing countries Since 2001 EBA grants almost completely liberalized access to the European market for products from the least developed countries LDCs It quickly became the most symbolic European trade initiative towards the Third World since the first Lomé Convention in the 1970s Given its central position in EU discourse and its continuing relevance for the European and international trade agenda this book attempts to present a thorough analysis of EBA *European Union Trade Politics and Development* contains contributions from a diverse range of scholars who collectively present a comprehensive picture of EBA This volume also contains a broader analysis of EU trade politics towards the South focusing on agricultural policy reform Europe s evolving relationship with ACP countries ex colonies from Africa the Caribbean and the Pacific it links EBA with Europe s negotiating position within the World Trade Organization Contributions to this volume also consider the continuing negotiation leverage of EBA within the Doha Development Agenda make comparisons with United States trade policy vis vis the LDCs and focus on the economic effectiveness of EBA in terms of its stated objectives as well as on the institutional skirmishing within the EU

The European Union and the New Trade Politics JOHN PETERSON, Alasdair Young, 2013-10-18 The politics of international trade have changed dramatically over the past 20 years Advances in technology have spurred a new kind of trade involving transfers of components and materials across borders but within firms Trade in services foreign direct investment and sales by affiliates of foreign owned companies have grown more rapidly than trade in goods making national rules and regulations more significant barriers to trade The effects of non trade policies on trade have engaged new actors in trade politics not least in the European Union EU The emergence of a more active bloc of developing countries alongside a vibrant international civil society including environmental and consumer groups and ministries have made trade politics increasingly lively complex and challenging for the EU Meanwhile the World Trade Organization has become not only a primary focus for EU trade policy but also a lightning rod for protest a powerful legaliser of trade diplomacy and an arena where it is often difficult even impossible to separate private from public interests The European Union and the New Trade Politics provides a state of the art analysis of how the EU shapes and is shaped by the new trade politics This book was previously published as a special issue of The Journal of European Public Policy

The Political Economy of Normative Trade Power Europe Arlo Poletti, Daniela Sicurelli, 2018-05-07 This book critically engages with a long tradition of scholarly work that conceives of the European Union as a peculiar international actor that pursues a value based normatively oriented and development friendly agenda in its relations with international partners The EU is a pivotal player in international trade relations holding formidable power in trade but also exercising substantial power through trade Trade policy therefore represents a strategic field for the EU to shape its image as a healthy economy and a global power In this field the EU has declared a twofold ambitious goal namely that of fostering economic growth in Europe while at the same time promoting development and growth abroad both in developed and developing countries In other words the EU aims to increase its competitiveness in world trade while acting as an ethical and normative power Here Poletti and Sicurelli explore the tension between these two roles

Global Politics and EU Trade Policy Wolfgang Weiß, Cornelia Furculita, 2020-02-24 This book explores how the European Union designs its trade policy to face the most recent challenges and to influence global policy issues It provides with an interdisciplinary perspective by combining legal political and economic approaches It studies a broad set of trade instruments that are used by the EU in its trade policy such as trade agreements multilateral initiatives unilateral trade policies as well as internal market tools Therefore the contributions to this volume present the EU s Trade Policy through different lenses providing a complex view of it
