European Encounters Migrants Migration And European Societies Since 1945:

European Encounters Rainer Ohliger, Karen Schönwälder, 2017-03-02 This book reminds us of Europe's multi-faceted history of expulsions, flight and labour migration and the extent to which European history since 1945 is a history of migration. While immigration and ethnic plurality have often been divisive issues, encounters between Europeans and newcomers have also played an important part in the development of a European identity. The authors analyze questions of individual and collective identities, political responses to migration and the way in which migrants and migratory movements have been represented both by migrants themselves and their respective host societies. The book's distinctive multi-disciplinary and international approach brings together experts from several fields including history, sociology, anthropology and political science. *European Encounters* will serve as an invaluable tool for students of contemporary European history, migration and ethnic identities.

Europe, Migration and Identity Jan Logemann, Donna Gabaccia, Sally Gregory Kohlstedt, 2015-10-14 This volume explores connections between migration studies and research in the history of Europeanization and Europeaness, areas which have generated much interest in recent years. Beyond histories of European political integration and the intellectual and elite movements that have supported this process, scholars increasingly pay attention to the constructed nature of Europeaness and European identities and to the multiplicity of ways in which this construction happens. Migrants can be a particularly useful lens on Europeanization processes as they provide a perspective from the periphery in two ways: by providing a view literally from the outside, as in the case of those who left the continent, or by providing a view from the margins of the European societies within which they live. The collection asks what Europe meant to migrants abroad, particularly within the transatlantic context and within the continent during the twentieth century. Contributions from a variety of disciplinary perspectives reflect both on the broader historical context and theoretical implications and highlight specific cases such as those of European labor migrants to the United States, of transatlantic exiles and migrants of Latin American immigrants in present-day Europe, as well as the experience of highly skilled migrants within the context of the European Union. Can we trace the emergence of European identities among different groups of migrants and if so, what forms did they take? This book was originally published as a special issue of *National Identities*.

The Unsettling of Europe Peter Gatrell, 2019-08-27 An acclaimed historian examines postwar migration's fundamental role in shaping modern Europe. Migration is perhaps the most pressing issue of our time and it has completely decentered European politics in recent years. But as we consider the current refugee crisis, acclaimed historian Peter Gatrell reminds us that the history of Europe has always been one of people on the move. The end of World War II left Europe in a state of confusion with many Europeans virtually stateless. Later, as former colonial states gained national independence, colonists and their supporters migrated to often unwelcoming metropolises. The collapse of communism in 1989 marked another fundamental turning point. Gatrell places migration at the center of post-war European history and the aspirations of migrants themselves.

Switzerland and Migration Barbara Lüthi, Damir Skenderovic, 2019-04-30 This book explores the history of migration in Switzerland from the late nineteenth century to the present day It brings together recent scholarship on Switzerland in the field of cultural and migration studies as well as migration history and combines various research approaches from postcolonial studies transnational studies border studies and history of knowledge Since the late nineteenth century Switzerland has gradually transformed into a migration society becoming one of the countries in Europe with the highest percentage of migrant population While migration has become one of most contentious issues in Swiss public and political debates the volume also shows how migrants have developed various strategies to deal with the country s discriminatory policies and distinct institutional settings The authors of the volume convincingly challenge the view that Switzerland still does not represent a migration or even post migrant society and substantially contributes to the long overdue acknowledgement of Switzerland in migration history and studies at the international level
