**The National Origins of Policy Ideas** John L. Campbell, Ove K. Pedersen, 2014-04-27 In politics ideas matter They provide the foundation for economic policymaking which in turn shapes what is possible in domestic and international politics Yet until now little attention has been paid to how these ideas are produced and disseminated and how this process varies between countries The National Origins of Policy Ideas provides the first comparative analysis of how knowledge regimes communities of policy research organizations like think tanks political party foundations ad hoc commissions and state research offices and the institutions that govern them generate ideas and

communicate them to policymakers John Campbell and Ove Pedersen examine how knowledge regimes are organized operate and have changed over the last thirty years in the United States France Germany and Denmark They show how there are persistent national differences in how policy ideas are produced Some countries do so in contentious politically partisan ways while others are cooperative and consensus oriented They find that while knowledge regimes have adopted some common practices since the 1970s tendencies toward convergence have been limited and outcomes have been heavily shaped by national contexts Drawing on extensive interviews with top officials at leading policy research organizations this book demonstrates why knowledge regimes are as important to capitalism as the state and the firm and sheds new light on debates about the effects of globalization the rise of neoliberalism and the orientation of comparative political economy in political science and sociology

*All Societies Die* Samuel Cohn, 2021-04-15 In *All Societies Die* Samuel Cohn asks us to prepare for the inevitable Our society is going to die What are you going to do about it But he also wants us to know that there s still reason for hope In an immersive and mesmerizing discussion Cohn considers what makes societies throughout history collapse *All Societies Die* points us to the historical examples of the Byzantine empire the collapse of Somalia the rise of Middle Eastern terrorism the rise of drug cartels in Latin America and the French Revolution to explain how societal decline has common features and themes Cohn takes us on an easily digestible journey through history While he unveils the past his message to us about the present is searing Through his assessment of past and

current societies Cohn offers us a new way of looking at societal growth and decline With a broad panorama of bloody stories unexpected historical riches crime waves corruption and disasters he shows us that although our society will inevitably die at some point there s still a lot we can do to make it better and live a little longer His quirky and inventive approach to an end of the world scenario should be a warning We re not there yet Cohn concludes with a strategy of preserving and rebuilding so that we don t have to give a eulogy anytime soon

**Locked in Place** Vivek Chibber,2011-06-27 Why were some countries able to build developmental states in the decades after World War II while others were not Through a richly detailed examination of India s experience Locked in Place argues that the critical factor was the reaction of domestic capitalists to the state building project During the 1950s and 1960s India launched an extremely ambitious and highly regarded program of state led development But it soon became clear that the Indian state lacked the institutional capacity to carry out rapid industrialization Drawing on newly available archival sources Vivek Chibber mounts a forceful challenge to conventional arguments by showing that the insufficient state capacity stemmed mainly from Indian industrialists massive campaign in the years after Independence against a strong developmental state Chibber contrasts India s experience with the success of a similar program of state building in South Korea where political elites managed to harness domestic capitalists to their agenda He then develops a theory of the structural conditions that can account for the different reactions of Indian and Korean capitalists as rational responses to the distinct development models adopted in each country Provocative and marked by clarity of prose this book is also the first historical study of India s post colonial industrial strategy Emphasizing the central role of capital in the state building process and restoring class analysis to the core of the political economy of development Locked in Place is an innovative work of theoretical power that will interest development specialists political scientists and historians of the subcontinent

**Against Islamophobia** Arno Tausch,2007 In this book the author presents optimistic socio liberal conclusions about Islam in the world system Countering some alarmist voices in the West neither migration nor Muslim culture are to be blamed for the contemporary crisis but the very nature of unequal capitalist accumulation and dependency that is at the core of the world capitalist system For one the analysis is based on current thinking on Kondratiev waves of world political development inherent in recent work by IIASA and the NATO Institute for Advanced Studies Analyses are also presented on the framework of the debate on cross national determinants of human well being in the world system While the author is cautiously optimistic about a socio liberal non interventionist policy alternative he has come to the conclusion that present patterns of global governance modeled around the neo liberal Washington Consensus and American hyperpower are doomed for failure A new socio liberal global consensus on global migration global order and global governance could emerge instead
