## European Financing Laws:

**European Financing Laws** Robert Drake, James Rider, 1994 European Financing Law provides a comprehensive guide to the legislation governing financial services and assistance across Europe. Written on a country by country basis, it considers the legal aspects of financing relevant to each country, offering comprehensive analyses of the relevant laws and sources.

*EU Sustainable Finance and International Trade Law* Sven Nikolai Pauls, 2024-11-09 This book offers an in-depth analysis of the interrelation between the European Union's ESG regulation or Sustainable Finance and international trade law, which to date have only been assessed separately. The inherent similarities and intersections between cross-border provision of financial services and international trade law may result in potential collisions and opportunities for advancing legislation in the field. The potential collisions and opportunities primarily stem from the differing approaches of these regulatory concepts. Whereas the standards derived from the General Agreement on Trade in Services (GATS) and the EU's free trade agreements aim at securing an overall balance of rights and obligations between states, Sustainable Finance intends to re-channel private capital into sustainable investments. Against this background, this book primarily intends to answer two interrelated questions: Are the EU's Sustainable Finance provisions legal under, in other words, consistent with international trade law? Which role can international trade law play in the propagation and justification of Sustainable Finance policy? Guided by these questions, this book offers the reader a three-step analytical approach towards the topic. First, this book provides a comprehensive overview of all relevant EU Sustainable Finance regulations and publications. The particular value of this overview results also from its focus on the respective legislative background and interrelation with international policy frameworks such as UN development and climate protection agreements or bilateral working groups. This overview is followed by an analysis of the potential for collision between the EU's Sustainable Finance legislation and its obligations under GATS and EU free trade agreements. Finally, this book identifies actual and possible channels of propagation and justification of Sustainable Finance policy through the WTO framework and the EU's free trade agreements. This analysis is further supported by an overview on best practices and regulatory proposals on potential future consolidation of Sustainable Finance and international trade law. This book is thus highly relevant both for practitioners in cross-border financial services and international trade law as well as researchers and EU legislators wishing to understand the challenges and opportunities of implementing Sustainable Finance in light of international trade law.

*The Enforcement of EU Financial Law* Jan Crijns, Matthias Haentjens, Rijnhard Haentjens, 2022-06-30 This book focuses on the enforcement of EU financial law on the national and supra-national levels. Emphasis is laid on the interaction between the EU and national levels: vertical interaction as well as between the private administrative and criminal law levels: horizontal interaction. The book takes a multi-jurisdiction and interdisciplinary approach and covers a range of issues that are highly topical, such as the new EU Anti-Money Laundering regime and the ReNEUAL model for administrative law. Over the last few decades, EU financial law has grown exponentially. Virtually all

these new rules and regulations require enforcement However the EU legislator generally has been reluctant to regulate enforcement at the national level and often does not prescribe whether enforcement should take place through national criminal administrative or private law This results in both practical and fundamental questions for the legal practitioner and the academic This book addresses those questions With contributions by leading academics and senior members of EU and national institutions the book will be of interest to professionals dealing with financial law in their daily practice such as lawyers bankers policy makers officers at supervisory authorities and judges but also for academics interested in fundamental questions of interaction between legal systems
