America at a time when women were not even thought of as citizens Then there is the innovative genius of the Burma Shave signs that sold shaving cream all over the country History is a very delicate subject The reader is at the mercy of the eye witness account of a person s actions or an event taking place The eye witness from one side will see it one way while the person recording the event from the other side may see it differently It is then up to the historian to decipher these varying accounts and determine what really happened It is possible that both sides were wrong Historians have the task of inspecting as many versions of the same story as possible to come to some reasonable expectation of what actually took place A case in point would be the story of the Alamo Texans tell the story as they wanted it while the Mexicans tell a story that is completely opposite See Dequello inside The stories in this book have been compared and researched as honestly as it is possible to do remembering that there are precious few eye witnesses left
