## European Romanticism:

**European Romanticism** Stephen Prickett, 2014-04-14 Romanticism was always culturally diverse Though English language anthologies have previously tended to see Romanticism as predominantly British the term itself actually originated in Germany where it became the banner of a Europe wide movement involving the profound intellectual and aesthetic changes which we now associate with modernity This anthology is the first to place British Romanticism within a comprehensive and multi lingual European context showing how ideas and writers interconnected across national and linguistic boundaries By reprinting everything in the original languages together with an English translation of all non English material in parallel on the opposite page it offers a new intellectual map of Romanticism Material is thematically arranged as follows Art Aesthetics The Self History Language Hermeneutics Theology Nature The Exotic Science While focusing on European texts the inclusion of essays on their North American and Japanese reception means that Romanticism can be seen as a global phenomenon influencing a surprising number of the ways in which the modern world sees itself

*Orientation in European Romanticism* Paul Hamilton, 2022-10-20 Exploring the experiments in individual and national self consciousness conducted during the Romantic period this essential comparative study of European literature philosophy and politics makes original and often surprising connections and contrasts to reveal how personal and social identities were re orientated and disorientated from the French Revolution onwards Reviving a contested moment in the history of aesthetic theory this study shows how the growing awareness of irresolution in Kant s third Kritik allowed Romantic writers to put the aesthetic to radical uses not envisaged by its parent philosophy It also recounts how they would go on to force philosophy to revise received notions of authority empowering women and subordinated ethnic groups to re orientate existing hierarchies The sheer range and variety of writers covered is testament both to the breadth of writing that Kant s philosophy so rashly legitimated and to the wider importance of philosophy to the understanding of Romantic literature

*Stages of European Romanticism* Theodore Ziolkowski, 2018 Employs an innovative approach by stages to offer a unified vision of European Romanticism over the half century of its growth and decline Romanticism was a truly European phenomenon extending roughly from the French Revolution to the 1848 revolutions and embracing not only literature and drama but also music and visual arts Because of Romanticism s vast scope most treatments have restricted themselves to single countries or to specific forms notably literature art or music This book takes a wider view by considering in each of six chapters representative examples of works from across Europe and across a range of the arts that were created in a single year For instance in the first chapter focusing on the year 1798 Beethoven s Path tique sonata Wordsworth and Coleridge s Lyrical Ballads Tieck s novel Franz Sternbalds Wanderungen and Goya s painting El sue o de la raz n The following chapters treat works from the years 1808 1818 1828 1838 and 1848 This approach by stages makes it possible to determine characteristics of six stages of Romanticism in its historical and intellectual context and to note the conspicuous differences between these stages as

European Romanticism developed for example the waxing and waning of religious themes the shifting visions of landscape the gradual ironic detachment from early Romanticism In sum the volume offers a unified vision of European Romanticism in all its aesthetic forms over the half century of its growth and decline Theodore Ziolkowski is Professor Emeritus of German and Comparative Literature Princeton University

**The Oxford Handbook of European Romanticism** Paul Hamilton, 2016-01-14 TThe Oxford Handbook to European Romanticism brings together leading scholars in the field to examine the intellectual literary philosophical and political elements of European Romanticism The book focuses on the cultural history of the period extending from the French Revolution to the uprisings of 1848 It begins with a

series of chapters examining key texts written by major writers in languages including French German Italian Spanish Russian Hungarian Greek and Polish amongst others A second section then explores the naturally inter disciplinary quality of Romanticism exemplified by the different discourses with which writers of the time set up an internal comparative dynamic These chapters highlight the sense a discourse gives of being written knowledgeably against other pretenders to completeness or comprehensiveness of self understanding of the time Discourses typically advance their own claims to resume European culture collaborating with and at the same time trying to assimilate each other in the process The main examples featured here are history geography drama theology language philosophy political theory the sciences and the media Each chapter offers an original and individual interpretation of an inherently comparative world of individual writers and the discursive idioms to which they are historically subject Together the forty one chapters provide a comprehensive and provocative overview of European Romanticism
