Migration, Citizenship, and the European Welfare State Carl-Ulrik Schierup, Peo Hansen, Stephen Castles, 2006-03-16 This book provides a major new examination of the current dilemmas of liberal anti racist policies in European societies linking two discourses that are normally quite separate in social science immigration and ethnic relations research on the one hand and the political economy of the welfare state on the other The authors rephrase Gunnar Myrdal's questions in *An American Dilemma* with reference to Europe's current dual crisis that of the established welfare state facing a declining capacity to maintain equity and that of the nation state unable to accommodate incremental ethnic diversity They compare developments

across the European Union with the contemporary US experience of poverty race and class They highlight the major moral political dilemma emerging across the EU out of the discord between declared ideals of citizenship and actual exclusion from civil political and social rights Pursuing this overall European predicament the authors provide a critical scrutiny of the EU's growing policy involvement in the fields of international migration integration discrimination and racism They relate current policy issues to overall processes of economic integration and efforts to develop a European social dimension Drawing on case study analysis of migration the changing welfare state and labour markets in the UK Germany Italy and Sweden the book charts the immense variety of Europe's social and political landscape Trends of divergence and convergence between single countries are related to the European Union's emerging policies for diversity and social inclusion It is among other things the plurality of national histories and contemporary trajectories that makes the European Union's predicament of migration welfare and citizenship different from the American experience These reasons also account in part for why it is exceedingly difficult to advance concerted and consistent approaches to one of the most pressing policy issues of our time Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help to fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life such a family or religious behaviour What do the societies of Western Europe have in common with those further to the East This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a manner useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent The series editor is Colin Crouch

European Welfare States and Globalization Ali Hajighasemi, 2019 This timely book assesses how Europe's welfare states have dealt with the challenges of globalisation and the financial crisis It asks whether the European Union has adopted a general strategy for dealing with four major threats to the sustainable development of European societies the employability of a growing number of redundant workers an aging population low birth rates and the persistent problem of gender inequality The book will be an important read for social policy scholars particularly those focusing on European welfare states how they differ and lessons to be learnt from them It also highlights key lessons from a broad range of case studies to help policymakers in understanding how and where improvements may be made in the future

Race, Ethnicity and Welfare States Pauli Kettunen, Sonya Michel, Klaus Petersen, 2015-06-29 In this interdisciplinary volume leading and emerging scholars examine the relationship between homogeneity and welfare state development They trace Gunnar Myrdal's influence on thinking about race in the US and explore current European states approach

[A Democratic Architecture for the Welfare State](#) Victor A. Pestoff, 2008-10-27 The welfare state faces various challenges in Scandinavia and many European

countries today including a poor work environment in the public sector a growing democracy deficit and demographic obstacles In this new book Victor A Pestoff argues that the state cannot resolve these challenges alone or together with the market rather it requires the active participation of citizens and the third sector in order to overcome them and become more sustainable and flexible in the future This book addresses the need for a more democratic architecture for the European welfare state opening new perspectives for developing alternative channels for direct citizen participation at the sub municipal level of governance Pestoff finds that neither democratic theory nor welfare state theory devotes adequate attention to the contemporary role of the third sector as a service provider or to greater direct citizen participation in the provision of welfare services He shifts the focus of analysis from the input to the output side of the political system and explores new ways to promote a greater role for the third sector and more citizen participation in the provision of universal tax financed welfare services Part 1 discusses social economy actors in Sweden and Scandinavia both from a historical and future perspective Part 2 explores major issues for the third sector and welfare state including the allocation of an organization s surplus or profit work environment and service quality in public services and the third sector consumer perspectives on the social economy democratizing medical and health care in Japan and co production of childcare services in eight European countries Part 3 revisits the third sector and state in democratic theory and welfare theory as well as recognizing major hurdles to the third sector and democratization of the welfare state Part 4 concludes by summarizing the politics of participation in the welfare state

Welfare and Religion in 21st Century Europe Anders Bäckström, Grace Davie, Ninna Edgards, Per Pettersson, 2016-02-24 Historically European churches have played a large part in the provision of welfare Responsibility however has gradually shifted to the state a shift that forms an integral part of the process of secularization and one that has been readily accepted by European populations But what happens when the state itself begins to recede a process that is occurring in most if not all European societies for a wide variety of reasons The implications for welfare are considerable not least for the role of the churches which begin to resume the responsibilities previously shed but in new and different ways This book looks at the connections between religion and welfare in Europe exploring in detail eight European societies Finland Norway Sweden England Germany France Italy and Greece The different theological traditions different church state relationships and different welfare regimes are all examined The analysis is based on first hand empirical research which considers not only the changing situation on the ground but attitudes towards this within a range of different constituencies the churches local government and the general public Particular attention is paid to the significance of gender in both the process of change and in attitudes towards this

Resisting Punitiveness in Europe? Sonja Snacken,Els Dumortier,2013-03-01 This volume provides an important and exciting contribution to the knowledge on punishment across Europe Over the past decade punitiveness has been studied through analyses of increased or new forms of punishment in western countries Comparative studies on the other hand have illustrated important differences in levels of punitiveness between these countries and have tried to explain these differences by looking at risk and protective factors Covering both quantitative and qualitative dimensions this book focuses on mechanisms interacting with levels of punitiveness that seem to allow room for less punitive political choices especially within a European context social policies human rights and a balanced approach to victim rights and public opinion in constitutional democracies The book is split into three sections Punishment and Welfare Chapters look into possible lessons to be learned from characteristics and developments in Scandinavian and some Continental European countries Punishment and Human Rights Contributions analyze how human rights in Europe can and do act as a shield against but sometimes also as a possible motor for criminalization and penalization Punishment and Democracy The increased political attention to victims rights and interests and to public opinion surveys in European democracies is discussed as a possible risk for enhanced levels of punitiveness in penal policies and evaluated against the background of research evidence about the wishes and expectations of victims of crime and the ambivalence and polycentric consistency of public opinion formations about crime and punishments This book will be a valuable addition to the literature in this field and will be of interest to students scholars and policy officials across Europe and elsewhere *The Handbook of Community*

Michalos, 2008-09-16 Quality of life QOL research has made great strides since the social indicator movement started as a scientific enterprise in the 1960s Following the lead of pioneers in North America and Europe social scientists in other regions of the world have adopted and refined social data systems or barometers to monitor progress in enhancing the welfare and well being of citizens A distinctive feature of these barometers is that they measure both individual and societal quality of life While not overlooking the more basic needs and material standards of living the barometers also inform on issues of individual freedoms and choices and constraints on citizen empowerment that enhance and depress quality of life Designed to capture nuances in local definitions of the good life regional barometers are unique expressions of the obstacles facing different societies in their quest to achieve the good life Scholars of public policy as well as policy makers will find inspiration from reviews of innovative initiatives to monitor contemporary quality of life in six regions of the world spanning South America the Arctic Europe Africa Asia and Australia
