Ports & Cities of the World W. H. Morton Cameron, 1926

A History of Business in Medieval Europe,

1200-1550 Edwin S. Hunt, James M. Murray, 1999-03-28 This book demolishes the widely held view that the phrase medieval business is an oxymoron. The authors review the entire range of business in medieval western Europe, probing its Roman and Christian heritage to discover the economic and political forces that shaped the organization of agriculture, manufacturing, construction, mining, transportation, and marketing. Businessmen's responses to the devastating plagues, famines, and warfare that beset Europe in the late Middle Ages are equally well covered. Medieval businessmen's remarkable success in coping with this hostile new environment was a harvest of adversity that prepared the way for the economic expansion of the sixteenth century. Two main themes run through this book: First, the force and direction of business development in this period stemmed primarily from the demands of the elite. Second, the lasting legacy of medieval businessmen was less their skillful adaptations of imported inventions than their brilliant innovations in business organization. European Business Neil Harris, 1999-11-11 European Business 2nd edition explores the interaction between European business and their environment using up-to-date case studies. Drawing upon a range of disciplines including economics, organizational behaviour, finance, and business strategy, it explores how and why modern businesses behave as they do and how and why the business environment is changing. A central theme of this substantially updated second edition is the position of Europe within the global economy. Also comprehensively examined is the developing nature of the European Union and the movement towards market economies in Central and Eastern Europe. **The Effectiveness of EU Business Associations** J. Greenwood, 2016-01-23 This is a unique collection of papers which brings together those who work in and with EU business associations at the very highest level, with many of the leading academic authors on associations over the past two decades. It examines the factors that influence the effectiveness of EU business associations and the prospects for associations and their members to influence these. It is designed to appeal both to analysts of debates about interest groups, collective action, and European integration and to those who work in and with EU business associations. **The Americanisation of European Business** Matthias Kipping, Ove Bjarnar, 2002-09-11 This book examines the mechanisms and channels through which American managerial know-how and US management models were transferred to Europe after 1945, as well as the actual influence on European industries, companies, and regions in the 1950s and 1960s. It explores the role of the European Productivity Agency, business leaders, US multinationals, regional networks, and institutions, as well as the actual transfer process and potential political, cultural, and institutional barriers. The final section contains the cases of three European companies which adopted American management methods to a considerable extent during the 1950s and 1960s. Eastern Europe Business Bulletin, 1991 The Routledge Companion to European Business Gabriele Suder, Monica Riviere, Johan Lindeque, 2018-07-20 International Business is a well-established research field in which regionalisation has recently gained significant prominence. Europe comprises marketplaces characterised by unique patterns of highly advanced economic integration. No other marketplace in the world has progressed to the same levels of harmonisation across sovereign countries.

and economies European Business is a subject in its own right with its own research momentum Contemporary research evidences that firms view Europe as a challenging mostly yet not entirely mature market location Yet this location often seen from a multi country perspective is subject to complexities revealing strategic corporate strengths and weaknesses Theory concepts and models known from International Business hence often vary in their applicability and relevance in this business environment This comprehensive reference volume brings together a global team of contributors to analyse and overview the key issues themes and phenomena that affect business in Europe With interdisciplinary perspectives the book covers crucial themes that any European Business research needs to acknowledge including business cultures and identity entrepreneurship and innovation M A and institutional trends European HRM migration climate change issues Brexit and more The selection of authors from 17 countries worldwide reflects the international scope of this research field and its agenda A unique resource this book provides an essential guide to researchers research students and scholars of business and the social sciences as well as the informed business community
