Euthanasia And The Right To Death The Case For Voluntary Euthanasia:

Euthanasia and the Right to Death A. B. Downing, 1970 **Death and Dying** Thomas Anthony Shannon, 2004 Edited by Thomas A Shannon this series provides anthologies of critical essays and reflections by leading ethicists in four pivotal areas reproductive technologies genetic technologies death and dying and health care policy The goal of this series is twofold first to provide a set of readers on thematic topics for introductory or survey courses in bioethics or for courses with a particular theme or time limitation Second each of the readers in this series is designed to help students focus more thoroughly and effectively on specific topics that flesh out the ethical issues at the core of bioethics The series is also highly accessible to general readers interested in bioethics Encyclopedia of Death and Dying Glennys Howarth, Oliver Leaman, 2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study **Sex, Drugs, Death, and the Law** David A. J. Richards, 1986 Among the most commonly argued legal questions are those involving victimless crimes consensual adult sexual relations including homosexuality and prostitution the use of drugs and the right to die How can they be distinguished from proper crimes and how can we as citizens judge the complex moral and legal issues that such questions entail David Richards a teacher of law in the areas of constitutional and criminal law and a moral and legal philosopher concerned with the investigation of legal concepts applies an interdisciplinary approach to the question of overcriminalization he draws on legal and philosophical arguments and links the subject to history psychology social science and literature To demonstrate how gross and unjust overcriminalization has developed Professor Richards explores basic assumptions that often underlie the common American sense of proper criminalization **The Right to Die with Dignity** Derya Nur Kayacan, 2022-06-20 Can I choose to die As the number of requests for euthanasia and physician assisted suicide continues to rise human rights law faces a new conflict the right to die vs the right to life The right to die or in other words the right to choose the time and

manner of one's own death is a question of personal autonomy and its limits. This book provides a comprehensive understanding of the right to die and sheds light on its possible future under the European Convention on Human Rights. After setting a clear framework by defining the key terminology, the book takes a two-part approach to achieving its aim. The first part focuses on the right to die in practice by examining selected jurisdictions. Switzerland, which is famous for its assisted suicide organizations, and the Netherlands, which was the first country to legalize euthanasia, are examined in detail. Belgium, Germany, the United Kingdom, and, as an exception to the Convention perspective, Canada are also included. While this examination offers a better understanding of what the right to die looks like in practice, it also provides insights on the slippery slope argument, which serves as a counterweight to personal autonomy without making a definitive statement on its validity. This part also illustrates the different paths that led or did not lead to the right to die in practice. The second part is an analysis of the European Court of Human Rights case law on the right to die. The Court has made important statements in only very few cases, while its caution when approaching such a delicate and controversial topic among its 47 members is understandably emphasized. This analysis of the Court's approach to the balancing of personal autonomy against other interests allows us to take a look back at the practice in more permissive jurisdictions through the lens of the Convention. Taken together, the book's two parts provide valuable lessons for countries that decide to practice assisted dying, which are outlined in the conclusion. In addition, given that a purely legal approach can only offer a partial picture, the book argues that an interdisciplinary approach would be much more favorable in terms of providing the necessary basis for the right to die debate.

Reports of Cases Decided in the Appellate Division of the Supreme Court of the State of New York (New York State). Supreme Court, Appellate Division, 1980-02. *Voluntary Euthanasia and the Common Law* Margaret Otlowski, 1997. Margaret Otlowski investigates the complex and controversial issue of active voluntary euthanasia. She critically examines the criminal law prohibition of medically administered active voluntary euthanasia in common law jurisdictions and carefully looks at the situation as handled in practice. The evidence of patient demands for active euthanasia and the willingness of some doctors to respond to patients' requests is explored, and an argument for reform of the law is made with reference to the position in the Netherlands, where active voluntary euthanasia is now openly practiced. Life, Liberty and the Defense of Dignity Leon Kass, 2002. This book grapples with the moral meaning of the new biomedical technologies now threatening to take us back to the future envisioned by Aldous Huxley in *Brave New World*. In a series of meditations on cloning, embryo research, the sale of organs, and the assault on mortality itself, Kass questions the wisdom of trying to break down the natural boundaries given us and to remake the human body into an instrument of our will.
