EU-US Cooperation on Internal Security Dimitrios Anagnostakis, 2017-02-17 This book analyses the cooperation between the European Union and the United States on internal security and counter terrorism since the 9 11 terrorist attacks In particular four areas of cooperation are examined customs and supply chain security judicial cooperation the mutual legal assistance and extradition agreements law enforcement cooperation the Europol US agreements and the EU US agreements for the sharing of air passengers data PNR agreements These cases are analysed through a conceptual framework based on the theories of international regimes with the data being drawn from an extensive documentary analysis of media sources collected through the Nexis database official documents and from 13 semi structured elite interviews with US and EU officials The book argues that the EU and the US have established a transatlantic internal security regime based on shared principles norms rules and interests While at the beginning of this process the EU had a more reactive and passive stance at the later stages both the EU and the US were active in shaping the transatlantic political agenda and negotiations The book demonstrates how the EU has had a much more proactive role in its relations with the US than has often been assumed in the current literature This book will be of much interest to students of EU policy foreign policy international security and IR in general

Transatlantic Regulation Susanne Lütz,2016-03-16 The European and American economies are closely interlinked as mutually important investment and trading partners The growing intensity of economic interdependence has spurred the transatlantic coordination of rules and standards that can lead to the formation of non tariff barriers to transatlantic commerce But despite impressive government to government efforts to eliminate market barriers the E U and the U S have frequently clashed over each other s regulatory policies The aim of this book is to explore the domestic sources of cooperation or conflict in transatlantic regulation The book analyses the role of domestic factors through three theoretical lenses that are well established in the study of multilevel systems the principal agent approach the two level game metaphor and through a wider concept of institutionalism which emphasises the links between societal interests and regulatory ideas with institutional frameworks The book states that domestic factors embody more obstacles than opportunities for horizontal coordination It is argued that transatlantic relations will likely undergo a double movement of being simultaneously shifted upwards to become part of the global governance architecture and downwards towards broader involvement of legislators in regulatory matters Hence transatlantic regulation might in the near future be shaped more by political leaders rent seeking interest groups and legislators than by networks of technocrats This book was published as a special issue of the Review of International Political Economy
