International Handbook of Human Response to Trauma Arie Y. Shalev, Rachel Yehuda, Alexander C. McFarlane, 2013-11-11 In 1996 representatives from 27 different countries met in Jerusalem to share ideas about traumatic stress and its impact For many this represented the first dialogue that they had ever had with a mental health professional from another country Many of the attendees had themselves been exposed to either personal trauma or traumatizing stories involving their patients and represented countries that were embroiled in conflicts with each other Listening to one another became possible because of the humbling humanity of each participant and the accuracy and objectivity of the data presented Understanding human traumatization had thus become a common denomi nator binding together all attendees This book tries to capture the spirit of the Jerusalem World Conference on Traumatic Stress bringing forward the diversities and commonalties of its constructive discourse In trying to structure the various themes that arose it was all too obvious that paradigms of different ways of conceiving of traumatic stress should be addressed first In fact the very idea that psychological trauma can result in mental health symptoms that should be treated has not yet gained universal acceptability Even within medicine and mental health competing approaches about the impact of trauma and the origins of symptoms abound Part I discusses how the current paradigm of traumatic stress disorder

developed within the historical social and process contexts It also grapples with some of the difficulties that are presented by this paradigm from anthropologic ethical and scientific perspectives Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 2002: Justification of the budget estimates, Department of Justice United States. underlying differences It presents theoretical models capturing the different types of implementations of victims rights and the purposes that they can achieve The book also offers a framework comprising the essential aspects involved in implementation of rights such as drafting and presentation their visibility and accessibility to victims enforcement of rights in case of breach and assessment and evaluation of rights to ensure constant monitoring and improvement in implementation The framework is tested by a sample case study in New Delhi India which showcases how the framework can be molded and applied to assess the existing implementation of victims rights and the scope for reform The book will be of interest to those working in the areas of criminal justice criminal procedure victimology and human rights *Strategic Plan* United States.
