**Assessment in the Classroom** Peter W. Airasian,1996 The special mission of Assessment in the Classroom is to show how assessment principles apply to the full range of teacher decision making from organizing the class as a social system to planning and conducting instructions to the formal evaluation of learning and finally to grading The goal is to show students that assessment is an everyday ongoing part of their teaching not some esoteric affair that is divorced from their daily routine With this in mind the following features have been built into this text

**Assessment in the Classroom: A Concise Approach** Peter Airasian,1999-08-30 This brief inexpensive version of the author s larger text is nearly 30% shorter and is designed either for the increasing number of brief 1 2 hour

assessment courses or for broader courses where assessment is one of several major topics covered. It is ideal for those 6-9 hour block courses sometimes spanning two semesters that cover a variety of major topics such as assessment, classroom management, and general methods. Like the bigger book, this one ties assessment into every type of teacher decision making, from organizing the class as a social system to planning and conducting instruction to the formal evaluation of learning and finally to grading. The goal is to show students that assessment is part of their daily routine. This edition features a new full chapter on sizing up assessment early in the school year, expanded treatment of accommodating pupils with disabilities, more on state-wide standards and assessments, updated performance alternative assessment, and descriptions of twenty Web sites related to educational assessment. It's not enough to say "I know it when I see it" not when we're expecting so much more from students and teachers than in the past. To help teachers achieve greater success with their students, we need new and better ways to identify and develop effective teaching. The Measures of Effective Teaching (MET) project represents a groundbreaking effort to find out what works in the classroom. With funding by the Bill & Melinda Gates Foundation, the MET project brought together leading academics, education groups, and 3,000 teachers to study teaching and learning from every angle. Its reports on student surveys, observations, and other measures have shaped policy and practice at multiple levels. This book shares the latest lessons from the MET project. With 15 original studies, some of the field's most preeminent experts tap the MET project's unprecedented collection of data to offer new insights on evaluation methods and the current state of teaching in our schools. As feedback and evaluation methods evolve rapidly across the country, *Designing Teacher Evaluation Systems* is a must-read and timely resource for those working on this critical task.
