Scoring of Writing Richard Haswell, Norbert Elliot, 2019-11-01 What is the most fair and efficient way to assess the writing performance of students Although the question gained importance during the US educational accountability movement of the 1980s and 1990s the issue had preoccupied international language experts and evaluators long before One answer to the question the assessment method known as holistic scoring is central to understanding writing in academic settings Early Holistic Scoring of Writing addresses the history of holistic essay assessment in the United Kingdom and the United States from the mid 1930s to the mid 1980s and newly conceptualizes holistic scoring by philosophically and reflectively reinterpreting the genre's origin development and significance The book chronicles holistic scoring from its initial origin in the United Kingdom to the beginning of its heyday in the United States Chapters cover little known history from the holistic scoring of school certificate examination essays written by Blitz evacuee children in Devon during WWII to teacher adaptations of holistic scoring in California schools during the 1970s Chapters detail the complications challenges and successes of holistic scoring from British high stakes admissions examinations to foundational pedagogical research by Bay Area Writing Project scholars The book concludes with lessons learned providing a guide for continued efforts to assess student writing through evidence models Exploring the possibility of actionable history Early Holistic Scoring of Writing reconceptualizes writing assessment Here is a new history that retells the origins of our present body of knowledge in writing studies

Assessing the Teaching of Writing Amy E. Dayton, 2015-03-15 Although fraught with politics and other perils teacher evaluation can contribute in important positive ways to faculty development at both the individual and the departmental levels Yet the logistics of creating a valid assessment are complicated Inconsistent methods rater bias and overreliance on student evaluation forms have proven problematic The essays in Assessing the Teaching of Writing demonstrate constructive ways of evaluating teacher performance taking into consideration the immense number of variables involved Contributors to the volume examine a range of fundamental issues including the political context of declining state funds in education growing public critique of the professoriate and demands for accountability resulting from federal policy initiatives like No Child Left Behind the increasing sophistication of assessment methods and technologies and the continuing interest in the scholarship of teaching The first section addresses concerns and advances in assessment methodologies and the second takes a closer look at unique individual sites and models of assessment Chapters collectively argue for viewing teacher assessment as a rhetorical practice Fostering new ways of thinking about teacher evaluation Assessing the Teaching of Writing will be of great interest not only to writing program administrators but also to those concerned with faculty development and teacher assessment outside the writing program

Resources in Education, 1992-10 Beyond Outcomes Richard Haswell, 2001-05-30 Writing assessment programs help place entering and mid career students in composition courses at the appropriate level monitor the progress of those students and assist in placing them in writing courses throughout their undergraduate careers These same universities also have writing instruction programs which might

include writing centers writing across the curriculum initiatives and freshman and advanced composition programs At many institutions though writing assessment is not necessarily considered fundamental to writing instruction and there is little communication between the assessment program and the composition program This book demonstrates that writing assessment and instruction programs may be successfully integrated The contributors analyze the development of the writing assessment and instruction program at Washington State University which is nationally recognized for its success In doing so they provide guidance to other institutions planning to develop similar integrated programs The volume argues that writing assessment and instruction should inform and influence each other that they should evolve together and that they should be developed locally By tracing the success of the WSU program the authors directly challenge the use of national packaged assessment programs such as standardized placement tests

Writing Program Administration and the Community College Heather Ostman, 2013-10-01 From the history of the community college in the United States to current issues and concerns facing writing programs and their administrators and instructors Writing Program Administration and the Community College offers a comprehensive look into writing programs at public two year institutions

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

Assessing Writing to Support Learning Sandra Murphy, Peggy O'Neill, 2022-11-08 In this book authors Murphy and O'Neill propose a new way forward moving away from high stakes test based writing assessment and the curriculum it generates and toward an approach to assessment that centers on student learning and success Reviewing the landscape of writing assessment and existing research based theories on writing the authors demonstrate how a test based approach to accountability and current practices have undermined effective teaching and learning of writing This book bridges the gap

between real world writing that takes place in schools college and careers and the writing that students are asked to do in standardized writing assessments to offer a new ecological approach to writing assessment Murphy and O'Neill's new way forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as inquiry It also brings the outside in by bridging the gap between authentic writing and writing assessment Through these two strands readers learn how assessment systems can be restructured to become better aligned with contemporary understandings of writing and with best practices in teaching With examples of assessments from elementary school through college chapters include guidance on designing assessments to address multiple kinds of writing integrate reading with writing and incorporate digital technology and multimodality Emphasizing the central role that teachers play in systemic reform the authors offer sample assessments developed with intensive teacher involvement that support learning and provide information for the evaluation of programs and schools This book is an essential resource for graduate students instructors scholars and policymakers in writing assessment composition and English education
