Parenting Plan Evaluations Kathryn Kuehnle, Leslie Drozd, 2012 When conducting parenting plan evaluations mental health professionals need to be aware of a myriad of different factors More so than in any other form of forensic evaluation they must have an understanding of the most current findings in developmental research behavioral psychology attachment theory and legal issues to substantiate their opinions With a number of publications on child custody available there is an essential need for a text focused on translating the research associated with the most important topics within the family court This book addresses this gap in the literature by presenting an organized and in depth analysis of the current research and offering specific recommendations for applying these findings to the evaluation process Written by experts in the child custody arena chapters cover issues associated with the most important and complex issues that arise in family court such as attachment and overnight timesharing with very young children dynamics between divorced parents and children s potential for resiliency co parenting children with chronic medical conditions and developmental disorders

domestic violence during separation and divorce gay and lesbian co parents and relocation among others The scientific information provided in these chapters assists forensic mental health professionals to proffer empirically based opinions conclusions and recommendations Parenting Plan Evaluations is a must read for legal practitioners family law judges and attorneys and other professionals seeking to understand more about the science behind child custody evaluations

Handbook of Family and Marital Therapy Sharon A. Shueman, Benjamin B. Wolman, 2012-12-06 Family and marital therapies are rapidly becoming highly used methods of treatment of mental disorders and are no longer ancillary methods to individual psychotherapy The last few decades have brought about an increasing awareness of the fact that excluding organic etiology practically all mental disorders are caused fostered and or related to faulty interpersonal relations As a rule the earlier in life one is exposed to noxious factors the more severe is the damage Thus early child parents and child siblings interactions are highly relevant determinants of mental health and mental disorder Moreover parents themselves do not live in a vacuum Their marital interaction significantly contributes to their own mental health or to its decline and parent child relationships are greatly influenced by the nature of intraparental relationships Parental discord conflicts and abandonment affect the child s personality development Thus family and marital therapy is more than therapy it is an important contribution to the prevention of mental disorder The present volume is comprised of three parts The first primarily theoretical analyzes the fundamental aspects of marital and family therapy The second part describes the various therapeutic techniques and the last deals with several specific issues It gives me great pleasure to acknowledge my gratitude to my coeditor Dr George Stricker Without his thorough and devoted efforts this volume could not have come into being I am also profoundly indebted to our consulting editors Dr James Framo Dr **Developmental Psychopathology, Volume 3** Dante Cicchetti, Donald J. Cohen, 2006-03-31 Developmental Psychopathology Volume 3 Risk Disorder and Adaptation provides a life span developmental perspective on high risk conditions and mental disorders Moreover it examines developmental pathways to resilient adaptation in the face of adversity *The 1980 Guide to the Evaluation of Educational Experiences in the Armed Services: Army* American Council on Education, 1980 Handbook of Effective Psychotherapy Thomas R. Giles, 2012-12-06 Handbook of Effective Psychotherapy is the culmination of 15 years of personal interest in the area of psychotherapy outcome research In my view this is one of the most interesting and crucial areas in the field it has relevance across disparate clinical disciplines and orientations it provides a measure of how far the field has progressed in its efforts to improve the effectiveness of psychotherapeutic intervention and it provides an ongoing measure of how readily clinicians adapt to scientific indications in state of the art care Regrettably as several of the chapters in this volume indicate there is a vast chasm between what is known about the best available treatments and what is applied as the usual standard of care On the most basic level there appears to be a significant number of clinicians who remain reluctant to acknowledge that scientific study can add to their ability to aid the emotionally distressed I hope that this handbook with its many delineations of

empirically supported treatments will do something to remedy this state of affairs **Couples in Conflict** Alan Booth, Ann C. Crouter, Mari L. Clements, Tanya Boone-Holladay, 2016-01-08 This classic volume provides a solid foundation for thinking about creative ways in which our society can work to prevent or minimize destructive couple conflict and enhance couples abilities to constructively handle their differences A common thread throughout is that constructive conflict and negotiation are beneficial for relationships The new introduction provides an overview of how this classic text is still relevant today Divided into four parts this book addresses the societal and bio evolutionary underpinnings of couple conflict presents the interpersonal roots of couple conflict and the consequences for individuals and couples discusses what effects couple conflict have on children and how individual differences in children moderate these effects outlines policies and programs that address couple conflict and concludes with an essay that pulls these four themes together and points to new directions for research and program efforts This book serves as a supplement in graduate or advanced undergraduate courses on interpersonal relationships couples and or family and conflict divorce couples and or family therapy taught in human development and family studies clinical or counseling psychology social work sociology and communications and it is also a helpful compendium for researchers and clinicians counselors interested in couple conflict
