E. Trainer, 1995-09-15 Moving beyond the now widely accepted assertion that the current way of life in rich countries is not sustainable Australian environmentalist Trainer describes what a sustainable society might look like and suggest paths to get from here to there Arguing that the basis must be more materially simple living standards and small scale self sufficient local economies he discusses housing food production energy the design of settlements the development of a new economy and the shift to new values The examples of change already implemented and measures to accelerate them focus on nudging local communities rather than overturning governments and corporations Paper edition unseen 19 95 Distributed in the US by Humanities Press Annotation
