The Wood Duck and the Mandarin Lawton L. Shurtleff, Christopher Savage, 1996-11-11 This is a story of conservation told through the natural histories of two of the world's most fascinating birds the Wood Duck of North America and the Mandarin of Asia The only two species in their genus *Aix* these Northern Wood Ducks are native to different continents but have long been kept together in captivity Now for the first time in history they are also flying side by side in the wild in a small area of northern California This rare circumstance has given Lawton L

Shurtleff and Christopher Savage the opportunity to observe the Northern Wood Ducks close relationship and is the starting point of this informative and beautifully rendered book The opening chapters tell how the Wood Duck and the Mandarin came to inhabit the Pacific Flyway and explain their extraordinary similarities Subsequent chapters discuss the distinctive histories of the two species and describe the birds throughout the seasons in their native flyways The Mandarins place in Asian art and literature is the subject of Chapter Five The final chapter illuminates the successful work done to protect the North American Wood Duck which has made a remarkable recovery from near extinction and the beginning efforts to protect the Mandarin whose existence in East Asia is seriously threatened Stunning full color photographs by renowned wildlife photographers along with photographs by the authors capture the exquisite beauty of these much revered birds Detailed maps show the Wood Ducks territory in North America and the Mandarins territory in East Asia and Great Britain Three appendices plans for building nestboxes instructions for banding birds and lists of books and conservation organizations and a thorough index are valuable resources in a book that will delight bird lovers and general readers alike

Now in its Sixth Edition, new contributing author Christopher Comer continues their legacy, accentuating the integration of ecology and wildlife management with new developments in the issues and challenges wildlife managers face every day. As awareness continues to grow of the complexities generated by the interactions of wildlife and society, the authors discuss these concerns with nongame and endangered wildlife, exotic species, wildlife diseases, conservation biology, and urban wildlife. Technology has fundamentally changed how wildlife managers learn about and manage wildlife; effective and informative advances include spatial analysis, molecular techniques, and methods to detect different species. A seminal text, *Wildlife Ecology and Management* continues to provide valuable insight into a dynamic and multifaceted field.
